ANNEX [to the Order](#) of the Minister of Higher Education, Science and
Innovation of the Republic of Uzbekistan No. 99 dated March 10, 2026

On higher education

REGULATION

This Regulation determines the organization of the higher education process and system, its financial, property and international cooperation relations, the training of highly qualified personnel in higher education institutions in accordance with the 6th and 7th qualification [levels](#) of the National Qualifications Framework of the Republic of Uzbekistan , as well as

the rights and obligations of students and employees of higher education institutions.

This Regulation does not apply to higher military and paramilitary educational institutions.

This Regulation applies to foreign higher education institutions operating in Uzbekistan and their branches in accordance with legislative acts.

The provisions of this Regulation are of a recommendatory nature for non-state higher education organizations.

Chapter 1. General provisions

1. The following basic concepts are used in this Regulation:

higher education - [a type](#) of education that provides training of highly qualified personnel in undergraduate and graduate specialties ;

Bachelor's degree - a basic higher education [level](#) that provides in-depth knowledge, qualifications, and skills in one of the areas of higher education, with a duration of study of at least three years ;

Master's degree - a higher education [level](#) based on a relevant bachelor's degree in a specific specialty, with a duration of at least one year ;

Bachelor's degree - an academic degree awarded to a person who successfully graduates from a higher education institution in a specific field of study;

Master's degree - an academic degree awarded to a person who has successfully graduated from a higher education institution in a specific specialization;

Diploma specialist - persons who have a diploma of higher education obtained in higher education institutions according to specialty programs introduced [before 1997](#) ;

higher education organization - a legal entity that provides education in accordance with legislative acts in specific undergraduate and

graduate specialties in accordance with state educational standards and educational programs of higher education;

State educational standards of higher education - Uz DSt 3556:2021 “[State educational standard of higher education. Basic provisions](#)” (registration number 43, October 27, 2021) and [State educational standard of higher education](#). Classifier of directions and specialties of higher education (registration number 3781, February 28, 2026), approved by the Ministry of Higher Education, Science and Innovations of the Republic of [Uzbekistan](#) (hereinafter referred to as the Ministry), which establishes requirements for the content and quality of higher education by the state ;

State-standard document on higher education (diploma) - a state-standard document issued to a graduate of a state-accredited (licensed) higher education institution that trains personnel based on state educational standards of higher education, confirming his or her bachelor's or master's academic degree, giving him or her the right to continue his or her studies at the next stage of continuing education or to work in accordance with the academic degree obtained;

qualification requirements - a normative and methodological document approved by the ministry that determines the field, objects and types of professional activity of a bachelor's or master's degree graduate of higher education institutions, the requirements for professional competencies, specialization (qualification), as well as the catalog of compulsory academic subjects that serve to form these competencies;

curriculum - a normative and methodological document approved by higher education institutions that determines the types of educational activities, the composition of academic subjects and courses, the sequence of their study, the volume in hours and credits for the entire period of education in a specific undergraduate or graduate specialty of higher education;

academic discipline - a systematized scientific and methodological complex that is part of the curriculum and the content of education, the mastery of which is determined in a specific educational field and specialty, and embodies the knowledge, skills, and competencies that a student must acquire;

curriculum - a normative and methodological document approved by higher education institutions that defines the content of education, indicating the main topics of the subject, its content, the most optimal methods of mastering it, types of classes, and sources of information;

Study load - the number of academic hours (credits) required to complete the curriculum;

Student - a person who has been admitted to a higher education institution in accordance with the established procedure and is studying for a bachelor's or master's degree.

2. Higher education ensures the training of highly qualified personnel in undergraduate and graduate specialties .

3. The undergraduate stage of higher education is carried out on the basis of general secondary (eleven-year education), secondary specialized (nine-year basic secondary and two-year secondary specialized education), primary vocational education (nine-year basic secondary and two-year primary vocational education), and, until the entry into force of the Law of the Republic of Uzbekistan "On Education" , secondary specialized, vocational education (nine-year general secondary and three-year secondary specialized, vocational education).

The master's degree stage of higher education is carried out on the basis of a corresponding bachelor's degree.

Chapter 2. The purpose and objectives of higher education

4. Taking into account the country's prospects, the main goal of higher education is to train highly qualified, competitive, highly educated specialists

who contribute to the development of science, are able to think independently, and have a sense of patriotism.

5. The following are the main tasks of the higher education sector:

To train highly qualified, independent, creative and analytically thinking personnel based on state educational standards and international standards of higher education, to create the necessary conditions for their intellectual abilities to be demonstrated and for their formation as spiritually mature individuals;

to create a healthy competitive environment in the sector, expand educational services and opportunities for higher education, as well as the scope of higher education based on the needs of the labor market and the demands and aspirations of society;

ensuring the academic, organizational, managerial, and financial independence of higher education institutions;

ensuring the international competitiveness of higher education, improving the quality of education through the widespread introduction of international standards, digital and information technologies, advanced modern methods and pedagogical technologies into the educational process;

implementation of mutually beneficial international cooperation, introduction of international scientific and academic projects, joint educational programs, exchange of professors, teachers and students, and experience-building;

To implement the undergraduate and graduate education process in accordance with state educational standards, qualification requirements, curricula and training programs of higher education, to improve the quality of education, and to widely involve personnel customers in the process of training highly qualified specialists;

ensuring the effectiveness of research work in higher education institutions, wide involvement of students in scientific activities, formation of

an innovative infrastructure of science, and training of scientific and scientific-pedagogical personnel at the institute of postgraduate education;

ensuring the integration of higher education, science, and production and increasing the innovative and investment attractiveness of the higher education system;

to create conditions for the scientific and creative activities and research of professors, teachers and students aimed at the development of science, technology, and engineering, to ensure their social protection, and to encourage them to achieve effective achievements in the process of this activity;

Systematic development of higher education institutions, improvement of management activities, strengthening of material and technical support, combating corruption, and introduction of effective mechanisms to ensure transparency.

Chapter 3. Structure of the higher education system

6. The higher education system consists of :

state educational standards of higher education, qualification requirements, curricula, training programs and higher education organizations implementing them;

scientific and pedagogical organizations that carry out research necessary to ensure the functioning and development of the higher education system;

organizations that assess the quality of education;

the state body authorized to manage higher education, as well as organizations under its jurisdiction.

7. In higher education institutions that issue state-standard documents (diplomas) of higher education, the training of bachelors and masters is carried out on the basis of state educational standards of higher education, qualification requirements for bachelor's degree programs and master's degree specialties, curricula and training programs.

8. There are the following types of higher education institutions:

university;

institute;

academy;

conservatory;

high school;

branch;

other higher education institutions whose status is equal to theirs in accordance with legislative documents.

9. The types of higher education institutions are defined as follows:

university - a large higher education organization that trains personnel in at least three fields of higher education and postgraduate education, retrain and improves the skills of personnel, and is highly engaged in scientific and research activities;

Institute - a higher education organization that trains personnel in at least two fields of higher education and postgraduate education, retrain and improves the skills of personnel, and is engaged in scientific and research activities;

Academy - a higher education organization that trains personnel in specific areas and specialties of higher and postgraduate education, retrain personnel and improves their skills, and carries out scientific and research activities in a specific area;

Conservatory - a higher education organization that provides higher and postgraduate education in the field of musical art, retraining and advanced training of personnel in this field, and scientific research activities;

higher education institution - a higher education institution that trains practical specialists in specific areas and specialties of education and carries out scientific and research activities;

Branch - a structural unit of a higher education organization with the status of a legal entity established in the regions, which trains personnel in

high-demand areas and specialties of higher education, retrain and improves their qualifications, and carries out scientific research activities.

10. In higher education institutions, faculties, registrar's offices, branches, departments, educational, training and scientific laboratories, scientific organizations, IT clusters (information technology parks, technoparks) and other structural divisions are organized in accordance with the procedure established by legislative documents, depending on the areas of personnel training and forms of education.

11. The Ministry shall monitor the implementation of state educational standards of higher education, qualification requirements for undergraduate and graduate programs, and the quality of personnel training and advanced training in higher education institutions .

Chapter 4. Bachelor's and Master's Degrees

12. Education at higher education institutions at the undergraduate level is carried out in full-time, part-time, evening, distance, dual, and other forms of education established by law.

13. The duration of study at the undergraduate level of education is at least three years . The duration of study at the undergraduate level, without separation from production, is extended by at least one academic year in the form of part-time education, and at least half an academic year in the form of evening education, compared to the full-time form of education.

14. Bachelor's and master's degree graduates of higher education institutions that train personnel based on state educational standards of higher education are issued a state-standard document (diploma) and its appendix on higher education in the relevant bachelor's degree field of study and specialty (qualification) or master's degree field of study and specialty (qualification) based on the results of state certification.

15. Requirements for the training of bachelors and masters are established in the state educational standards of higher education,

qualification requirements for bachelor's degree programs and master's degree specialties.

16. General requirements for the content of curricula and training programs for undergraduate and graduate studies of higher education and their development, the main rules of qualification requirements and the procedure for their development, the volume of the training load, and the assessment of the quality of personnel training are determined on the basis of Uz DSt 3556:2021 “ [State Educational Standard of Higher Education. Basic Provisions](#) ” (issue number 43, October 27, 2021).

The fields of knowledge, areas of education, and undergraduate and graduate specialties of higher education are determined in the State Educational Standards of Higher Education. [The Classifier](#) of Higher Education Areas and Specialties (registration number 3781, February 28, 2026).

17. The field of professional activity, objects and types of professional activity, requirements for professional tasks and competencies, specialization (qualification) of a bachelor's and master's degree, as well as the catalog of compulsory subjects that serve to form these competencies are determined in the qualification requirements developed for each bachelor's degree program and master's degree specialty.

18. Qualification requirements for bachelor's degree programs and master's degree specialists are developed by higher education institutions (associations of higher education institutions by educational field) directly based on the requirements and proposals of personnel customers and employing organizations and in cooperation with them.

Curriculum and training programs (syllabuses) are developed and approved by higher education institutions based on the qualification requirements for undergraduate and graduate programs.

19. Bachelor:

work in positions that require a person with a higher education;

continuing higher education at a master's degree in the chosen specialty based on a suitable and related educational field of the bachelor's degree;

Prepared to obtain additional professional knowledge in the system of retraining and advanced training of personnel.

20. A set of normative and methodological documents consisting of qualification requirements, curriculum, educational programs (syllabuses) and relevant methodological guidelines for a specific undergraduate educational field (master's degree specialty) of higher education is called the educational program of this educational field (specialty).

21. The main rules, procedure and requirements for the preparation of magistracy and masters are determined by the Regulations on Magistracy, approved by Resolution No. 36 of the Cabinet of Ministers of the Republic of Uzbekistan dated March 2, 2015 .

Chapter 5. Organization of the educational process

22. The educational process in higher education institutions that issue a state-standard document (diploma) of higher education is organized in accordance with state educational standards of higher education, qualification requirements for relevant undergraduate and graduate specialties, curricula and training programs.

23. Higher education institutions introduce the following types of training: lecture, seminar, practical training, laboratory work, colloquium, course work (project), individual training, consultation, independent study, independent work, field training, professional practice, experience acquisition (internship), graduation qualification work for bachelor's students, diploma project, master's thesis for master's students, and other types of training.

24. The educational process is carried out in accordance with the national credit-module system based on the European Credit Transfer and Accumulation System (ECTS).

The introduction of the credit-module system into the educational process is carried out on the basis of the Regulation on the Procedure for Introducing the Credit-Module System into the Educational Process in Higher Educational Institutions, approved by Resolution No. 824 of the Cabinet of Ministers of the Republic of Uzbekistan dated December 31, 2020, and the State Educational Standards of Higher Education.

In accordance with the decisions of the President or the Government of the Republic of Uzbekistan, based on the specific characteristics of higher education institutions, the educational process may be carried out on a system other than the credit-module system.

25. In higher education institutions, the academic year is usually divided into two semesters, ending with a final assessment conducted to monitor student learning.

Monitoring and assessment of student knowledge in higher education institutions is carried out on the basis of the Regulation on the system of monitoring and assessment of student knowledge in higher education institutions (registration number 3069, September 26, 2018).

26. All types of internships are conducted in state higher education institutions, on the basis of a bilateral agreement between the higher education institution and the organization where the internship is intended, in accordance with curricula and legislative documents.

27. The results of mastering the curriculum and educational programs in undergraduate and graduate specialties of higher education are assessed in accordance with the Regulation on the procedure for conducting final state certification of graduates of higher education institutions, approved by Resolution No. 836 of the Cabinet of Ministers of the Republic of Uzbekistan dated December 13, 2024 .

28. Individuals have the right to receive second and subsequent higher education on a contractual basis.

29. Integration of higher education with science and production is carried out through the following methods:

creation of educational-scientific-production complexes;

involving leading scientists and industry specialists in the educational process and scientific research;

In accordance with current legislation, create branches of centers, laboratories and departments of higher education organizations in scientific organizations, enterprises and institutions.

Chapter 6. Students of a higher education institution

30. A student may be issued a student ID card.

31. Student education activities in higher education institutions are regulated and monitored using the Higher Education Process Management Information System.

32. Students of higher education institutions have the following rights:

receive high-quality higher education in accordance with state educational standards of higher education;

to make proposals to the management of the higher education organization on further improving the curricula and educational programs of undergraduate and graduate programs in accordance with the current level of development of science, technology, and modern technologies;

participate in discussions related to the educational process in the activities of higher education organizations;

free use of the services of the library, information resources, educational, scientific, medical and other departments in accordance with the procedure established by the charter of the higher education organization;

participation in scientific research and scientific-creative work, conferences, symposiums, international and republican exhibitions, and festivals;

submit research papers for publication;

If you are dissatisfied with the decisions of the management of a higher education institution, appeal in accordance with the established procedure;

participation in academic [mobility](#) and joint [education](#) programs of students of a higher education institution .

Students may also have other rights set forth in law.

33. Students who have not undergone military training in educational departments of a higher educational institution [are called up](#) for military service after graduating from the educational institution in accordance with [the Law](#) of the Republic of Uzbekistan "On General Military Obligation and Military Service" .

34. It is prohibited to involve students in work unrelated to their studies in higher education institutions.

35. Students must acquire the knowledge specified in the educational programs, master the compulsory and elective subjects recommended in the curriculum, complete the tasks assigned in all types of classes provided for in the curriculum within the specified time, and comply with the regulations of the higher education institution, internal regulations, and student housing requirements.

[36. Students studying full-time are paid a scholarship in accordance with the Regulation](#) on the procedure for assigning and paying scholarships to students of higher educational institutions, approved by Resolution No. 59 of the Cabinet of Ministers of the Republic of Uzbekistan dated January 31, 2020 .

[37. Students may receive state scholarships named after the President of the Republic of Uzbekistan and in accordance with the Resolution](#) of the Cabinet of Ministers of the Republic of Uzbekistan No. 226 dated October 13, 2008 "On rewarding and providing financial incentives to talented youth of Uzbekistan" .

38. Students studying full-time may work in the higher education institution itself or in other enterprises and organizations on the basis of an employment contract in accordance with labor legislation and in an amount not exceeding the standards established therein, without harming the study process, during their free time.

39. Students may be granted academic leave during the educational process. Academic leave is granted in accordance with [the Regulations on granting academic leave to students of higher educational institutions of the Republic of Uzbekistan, approved by Resolution No. 344 of the Cabinet of Ministers of the Republic of Uzbekistan dated June 3, 2021.](#)

[40. Students](#) who have failed to master the subjects specified in the educational program are considered academic debtors, and issues related to the process of eliminating academic debts are regulated by legislative acts.

41. Students from other cities who need accommodation [may](#) be provided with accommodation in student dormitories for a certain period of time, based on the capabilities of the higher education institution, in accordance with the established procedure .

60% of students of state higher education institutions who are not covered by student housing and live on a lease basis in a house that does not belong to them, including their parents (legal representatives), will be reimbursed 50% of the monthly rent paid by them from the State Budget of the Republic of [Uzbekistan](#) .

[Higher education institutions may](#) also reimburse part of the monthly rent for other students living on a rental basis using extrabudgetary funds from these organizations .

It is not allowed to use student housing for purposes other than those specified in the legislation (rental, sale, donation, etc.).

42. In accordance with the internal regulations and rules of conduct of higher education institutions, students:

a) in case of missing 18 hours of classes (except for cases where a medical certificate of the prescribed form is provided due to health reasons), a warning will be issued by the higher education institution;

b) In case of missing 30 hours of classes (except for cases where a medical certificate of the prescribed form is provided due to health reasons), the higher education organization will issue a strict warning and the parents (replacement persons) will be notified.

43. Expulsion from the ranks of students of a higher educational institution is carried out in accordance with the Regulation on the procedure for transferring, reinstating and expelling students of higher educational institutions, approved by Resolution No. 578 of the Cabinet of Ministers of the Republic of Uzbekistan dated September 13, 2025.

Chapter 7. Employees of a higher education institution

44. In higher education institutions, teaching staff, administrative, technical, service and teaching support staff work in accordance with the standard staffing of administrative, technical, service and teaching support staff of higher education institutions (registration number 2859, February 21, 2017).

The teaching staff includes persons working in the positions of head of department, professor, associate professor, senior lecturer, assistant, teacher, and intern teacher.

The status of a pedagogical employee and restrictions on engaging in pedagogical activities are determined in accordance with the Law of the Republic of Uzbekistan "On the Status of a Pedagogue" .

45. The number of professors and teachers of a higher education institution must comply with the norms of the ratio of the number of students per teacher in higher education institutions in the areas of education (fields of study) at the bachelor's and master's levels, respectively (registration number 3345, January 24, 2022).

46. The volume of the teaching load of professors and teachers according to the position they hold is reviewed by the Council of the higher education organization before the start of the next academic year in accordance with the proposals of the dean of the faculty (head of department) and [approved](#) in a single distribution form .

47. The curriculum of professors and teaching staff of a higher education institution and the determination of educational, teaching-methodical, research, "teacher-student" and other types of work are determined in accordance [with the Rules for](#) Determining the Curriculum of Professors and Teaching Staff of a Higher Education Institution and the Determination of Educational, Methodological, Research and "Teacher-student" Work (registration number 3076, October 8, 2018).

When determining the workload of professors, their academic level and academic title may also be taken into account.

48. Teaching staff in higher education institutions are recruited in accordance with [the Regulations](#) on the Procedure for Competitive Recruitment of Teaching Staff in Higher Education Institutions, approved by Resolution No. 20 of the Cabinet of Ministers of the Republic of Uzbekistan dated February 10, 2006 .

[49. Qualification frameworks and professional standards for teaching staff positions in higher education institutions are determined in accordance with the Resolution](#) of the President of the Republic of Uzbekistan No. PQ-345 dated September 30, 2024 "On measures to further improve the national qualification system of the Republic of Uzbekistan" .

50. Teaching staff of higher education institutions [have](#) the following rights :

receive wages, bonuses, and material incentives in the manner and amounts established by legislative acts;

free choice and use of modern pedagogical technologies, teaching and learning tools and methods;

develop and implement author's programs and teaching methodologies in accordance with the established procedure, demonstrate creative activity, as well as use relevant academic disciplines, courses and modules;

to demand the creation of necessary conditions for the implementation of professional activities;

free use of the services of state information resource and information library centers in educational, scientific and methodological areas;

participate in the process of developing state educational standards, qualification requirements, curricula and training programs for higher education;

carrying out scientific, research and creative activities, participating in experimental and testing activities, developing and implementing innovations;

taking creative and labor leave in accordance with legislative documents;

participate in the management of the educational organization, as well as in the discussion of issues related to the activities of the educational organization;

to join and participate in public associations of teachers to express and protect their professional rights and interests;

protection from unlawful interference with one's professional activities;

Independently assess the knowledge of students in the course (group) assigned to them during their pedagogical activities;

to demand that students and their parents (their substitutes, legal representatives) treat the profession of a teacher with respect;

free mandatory medical examinations at state healthcare facilities (for state educational institutions);

participate in protecting the rights and legitimate interests of higher education students;

To appeal in accordance with the procedure established by law if dissatisfied with the orders and decisions of the management of a higher education institution.

Teaching staff may also have other rights in accordance with legislative acts.

51. The responsibilities of teaching staff of higher education institutions include the following :

- respect for the honor, dignity, and professional reputation of participants in the educational process;

- conduct high-quality training sessions in accordance with curricula and state educational standards;

- taking necessary measures to improve the level of knowledge of learners during training sessions;

- use of information and communication technologies, advanced and innovative forms and methods of teaching and upbringing;

- To form appropriate competencies in students in their chosen field (specialization) through the subjects they teach;

- take into account the psychological and individual characteristics, physical and mental health, and physiological development of learners, pay attention to creating conditions for educating individuals with special educational needs, and do not discriminate against them;

- regularly improve their qualifications and undergo periodic certification in terms of suitability for the position they hold;

- compliance with the charter and (or) other constituent documents of the higher education organization, internal labor regulations, and pedagogical ethics;

- ensuring high efficiency of educational and research processes;

develop independent thinking, initiative, and creative abilities in students;

must undergo mandatory medical examinations on time.

Pedagogical staff may also be assigned other responsibilities in accordance with legislative acts.

52. Retraining and advanced training of personnel in higher education institutions is carried out in accordance with the Resolution of the Cabinet of Ministers of the Republic of Uzbekistan dated September 23, 2019 No. 797 "On additional measures to further improve the system of advanced training of managerial and pedagogical personnel of higher educational institutions . "

53. Teaching staff of higher education institutions may engage in post-graduate educational activities.

Postgraduate education in higher education institutions is carried out on the basis of the Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 304 dated May 22, 2017 "On measures to further improve the system of postgraduate education."

A specialist diploma with a diploma is considered equivalent to a master's diploma for admission to a post-secondary educational institution and for engaging in pedagogical activities in scientific and higher education organizations .

Chapter 8. Governance of the Higher Education System

54. The management of higher education institutions in the Republic of Uzbekistan is carried out by the Cabinet of Ministers of the Republic of Uzbekistan, ministries, ministries and departments under whose jurisdiction higher education institutions are located, within the framework of the powers granted to them on the basis of legislative acts.

55. A state higher education organization shall have a seal, stamp, forms with the image of the State Emblem of the Republic of Uzbekistan and

its name in the state language, and other service marks and requisites necessary for its activities in accordance with legislative acts.

56. The direct management of higher education institutions is carried out by their rector (director).

57. The rector of a higher education institution with state and state share (local rector or director, executive director of a branch of a foreign higher education institution) is appointed and dismissed by the Cabinet of Ministers of the Republic of Uzbekistan in consultation with the Administration of the President of the Republic of Uzbekistan upon the recommendation of the head of the relevant ministry and department under his/her [subordination](#) .

58. The rector (director) is responsible for the activities of a higher education institution.

59. The rector (director) acts on behalf of the higher education organization in accordance with the legislative acts of the Republic of Uzbekistan and the charter of the higher education organization, owns property in accordance with the established procedure, concludes contracts, and issues powers of attorney.

60. Within the powers of a higher education institution, the rector (director) shall:

defines the specific tasks, obligations and responsibilities of vice-rectors (deputy directors), deans and other structural units;

The higher education organization issues orders and instructions that are mandatory for employees, professors, and students to follow;

hires and dismisses workers, employees, and teaching staff in accordance with the procedure established by the legislative acts of the Republic of Uzbekistan;

determines the powers of research, experimental and other organizations and departments within the higher education institution and approves regulations (instructions) on them;

determines bonuses and other additional payments to the salaries of employees of a higher education institution in accordance with the procedure established by legislative acts;

approves internal regulations in consultation with the trade union committee or other authorized state body;

performs other powers in accordance with the law.

61. The rector (director) has the right to establish and liquidate faculties, departments and other structural divisions (with the exception of higher education institutions granted financial independence) upon the recommendation of the Council of the higher education institution, in agreement with the authorized state body for the management of higher education.

62. A Council of a higher education organization shall be established to consider the main issues of the activities of a higher education organization.

The composition, powers, procedure for formation, and activities of the Council of a higher education institution are determined by the rector of the higher education institution.

63. Vice-rectors of state and state-owned higher education institutions (directors of branches of local higher education institutions, their deputies, deputy directors of foreign higher education institutions) are appointed and dismissed from their positions by the head of the relevant ministry and department under their subordination based on the recommendation of the rector of the higher education institution, in which cases of agreement are carried out in accordance with the procedure established by [law](#) .

64. Deans of faculties and heads of departments of state higher education institutions are appointed and dismissed by the rector of the higher education institution.

65. A higher education institution may establish a Board of Trustees (Supervisory Board) as a public management body. As a rule, it shall include

representatives of the founder(s), local executive authorities, ministries and departments, institutions and organizations, employers, industrial partners, other educational organizations, public organizations, foundations and sponsors.

66. The higher education organization provides educational and methodological support to the activities of its academic lyceums and specialized schools .

67. In accordance with the current legislation and the charter of a higher education organization, public organizations, scientific and voluntary societies, scientific, scientific-methodical, scientific-technical councils that award academic degrees may be established within it.

68. The structures of higher education institutions are approved by the rectors of the relevant higher education institutions (directors of branches of local higher education institutions) in accordance with the standards established for higher education institutions in coordination with the relevant ministry and department under their subordination (with the exception of higher education institutions granted financial independence).

Chapter 9. Property of a Higher Education Organization

69. A higher education organization may have reserves and working capital, as well as other material resources necessary to ensure the activities established by its charter.

70. A higher education organization has the right to receive and independently dispose of funds and property transferred to it by individuals and legal entities in the form of sponsorship, gratuitous assistance, as well as property gratuitously provided within the framework of projects implemented in cooperation with international and financial organizations and representative offices of foreign states, as well as profits from entrepreneurial activities and income from the use of property on economic accounts, in accordance with legislative acts.

71. The procedure for using the property of a higher education organization, as well as the procedure for obtaining and using the income of a higher education organization, shall be determined by its charter.

72. A higher education institution has the right to own the intellectual and creative products of its activities.

73. Land plots allocated to a state higher education institution in accordance with the established procedure shall be attached to it for permanent free use.

Chapter 10. Funding, Accounting, and Reporting

74. Funding for higher education institutions is provided from the republican budget in accordance with state grants allocated for the training of specialists, as well as from extra-budgetary sources attracted in accordance with current legislative acts and these Regulations.

Funds received from enterprises, organizations, and citizens on a contractual basis are used by higher education institutions in accordance with legislative documents and the purposes stipulated in the terms of the contract.

75. Scientific research conducted by higher education institutions is financed from the budget of the Republic of Uzbekistan allocated for these purposes in accordance with the Regulation on State Orders for Scientific and Research Works, approved by Resolution No. 133 of the Cabinet of Ministers of the Republic of Uzbekistan dated March 9, 2020, at the expense of funds from customers and other sources not prohibited by legislative acts.

76. A higher education organization shall maintain budget accounting and prepare financial statements, and conduct statistical and accounting records in accordance with the procedure established by legislative acts.

77. Control over the budget and financial discipline in a higher education organization is carried out in accordance with the procedure established by legislative acts on the budget.
