1. STRATEGY FOR THE DEVELOPMENT OF TERMEZ STATE UNIVERSITY FOR 2025–2027: TARGET MODEL AND ITS KEY CHARACTERISTICS

1.1. Purpose and Scope of the Document

This Strategic Development Plan defines the roadmap for the institutional advancement of Termez State University (TerSU) for the years 2025–2027. The document identifies the university's mission, tasks, values, and strategic objectives, and serves to establish directions for sustainable development. The plan is aimed at enhancing the quality of education, strengthening scientific capacity, promoting innovation and research, and ensuring a positive impact on society.

1.2. University Mission

To contribute to the intellectual and cultural development of the Surkhandarya region and the country as a whole by training knowledgeable, academically competent and socially responsible specialists, developing scientific research, and implementing innovations to support sustainable socio-economic growth.

1.3. Vision for the Future

By 2027, Termez State University aims to become:

- one of the leading universities in Central Asia,
- a decisive scientific centre for regional development,
- an institution where education, scientific research, and entrepreneurship are harmoniously integrated,
- a university occupying a respectable position in national and international rankings.

1.4. Core Values

1. Respect – prioritising mutual respect and humane relations among all academic staff, students, and employees.

2. Responsibility – ensuring every individual is accountable for their actions and recognises their responsibility not to damage the reputation and standing of the university.

3. Scientific Approach – adopting scientific methodology in education and management, and making decisions based on research.

4. Openness and Innovation – actively utilising digital technologies, eco-technologies, and solutions based on artificial intelligence.

5. Cooperation and Teamwork – maintaining openness to local and international partnership, fostering communication and a culture of collaborative work.

6. Harmony of Heritage and Modernity – grounding activities in the cultural, scientific, and historical heritage of Termez and Surkhandarya, while striving for modern knowledge and technologies.

1.5. Strategic Objectives

1. Improving and Digitalising the Quality of Education:

- Implementing a competency-based and digital education model;
- Undergoing international accreditation.

2. Developing Scientific Activity:

- Advancing scientific research;
- Increasing the number of publications in Scopus/Web of Science.

3. Engagement in Regional Development:

- Developing solutions to the economic and social issues of Surkhandarya through the “Regional Research Centre”;
- Implementing environmental initiatives within the framework of the “Uzbekistan – 2030” Strategy through the State Programme on the “Year of Environmental Protection and Green Economy”.

4. Internationalisation:

- Achieving respectable positions in international rankings;
- Establishing joint programmes with foreign universities (including bachelor’s, master’s, and PhD programmes);
- Attracting international students and researchers.

5. Modernising Infrastructure:

- Developing an intellectual campus, laboratories, an electronic library, research accommodation facilities, and green energy systems.

1.6. Brief Historical Overview of the University

Termez State University commenced its activities on 28 February 1992 on the basis of the Termez State Pedagogical Institute, and has since become a major higher education institution in the Surkhandarya region.

The history of the university begins with the relocation of the Margilan Teachers’ Institute to the city of Termez on 24 February 1954. Subsequently, the institution operated under the name of the Termez Teachers’ Institute and, in its first academic year, established departments of Uzbek Language

and Literature, Russian Language and Literature, Physics and Mathematics, as well as Natural Sciences and Chemistry. A total of 175 students were admitted to these departments.

In the 1956–1957 academic year, 187 students graduated from the institute and were assigned to work in the relevant fields. That same year, the institute was transformed into the Termez State Pedagogical Institute, thereby expanding its scope of activity as the first higher education institution in the Surkhan oasis.

In 1960, due to the dissolution of Kashkadarya region, the institute was merged with the Karshi State Pedagogical Institute. However, in 1964, when the Kashkadarya region was restored and the demand for higher education in Surkhandarya increased, the Termez State Pedagogical Institute resumed its operations on 24 April 1965.

During the years of independence, on 15 March 1992, the institute was elevated to the status of Termez State University, and since then it has served as a major centre of education and science in the southern region.

Throughout its history, the university has made a significant contribution to the training of qualified pedagogical specialists in the region and has played an important role in advancing the education system to a new level.

Today, TerSU enrolls more than 15,000 students and comprises 14 faculties, 4 centres, 44 departments, as well as possessing a robust scientific and laboratory base within the region's major "Surxon Innovation Cluster". This strategic document serves as a programme foundation for elevating this historical legacy to a new stage and transforming the university into a **3.0 model** based on digital, green, and entrepreneurial principles.

1.7. Methodological Basis and National Context

Decree of the President of the Republic of Uzbekistan No. PF-4958 of 16 February 2017 "On further improving the postgraduate education system", Decree of the President of the Republic of Uzbekistan No. PF-5847 of 8 October 2019 "On approving the concept for the development of the higher education system of the Republic of Uzbekistan until 2030", Decree of the President of the Republic of Uzbekistan No. PF-6097 of 29 October 2020 "On the concept for the development of science until 2030", Resolution of the President of the Republic of Uzbekistan No. PQ-5047 of 1 April 2021 "On measures to further improve state policy and state administration in the field of science and innovative development", Decree of the President of the Republic of Uzbekistan No. PF-6198 of 1 April 2021 "On improving the system of state administration for the development of scientific and innovative activity", Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 226 of 13 October 2008 "On awarding and providing material

incentives to talented youth of Uzbekistan”, Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 365 of 28 December 2012 “On measures to improve the system of postgraduate education and the certification of highly qualified scientific and scientific-pedagogical personnel”, Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 36 of 2 March 2015 “On approving the regulation on Master’s Degree programmes”, Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 365 of 28 December 2012 “On measures to improve the system of postgraduate education and the certification of highly qualified scientific and scientific-pedagogical personnel”, Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 36 of 2 March 2015 “On approving the regulation on Master’s Degree programmes”, Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 304 of 22 May 2017 “On measures to further improve the postgraduate education system”, Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 937 of 22 November 2017 “On measures to further improve the procedures for the training and certification of highly qualified scientific and scientific-pedagogical personnel”, Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 606 of 19 July 2019 “On improving the system of targeted training of highly qualified scientific and scientific-pedagogical personnel”, Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 133 of 9 March 2020 “On measures to further improve the regulatory and legal framework for the development of research and innovative activity”, and others.

2. THE UNIVERSITY’S DEVELOPMENT MODEL FOR 2025–2027

The Concept for the Development of Higher Education in Uzbekistan up to 2030 stipulates the phased introduction of the “University 3.0” model. “University 3.0,” or the “third-generation university,” is not limited to education and research alone; it also engages in the commercialisation of their outcomes, the creation of start-ups, and the registration of patents. This model is characterised by a developed culture of entrepreneurship and effective cooperation with representatives of the business sector. Research indicates that a significant proportion of universities around the world have already embarked upon the transition to this model. As global universities strive towards this direction, TerSU likewise defines its own trajectory of development accordingly. Based on the idea of “University 3.0,” TerSU will create its own “Integrated Strategic Management and Development Model” and establish it as the central objective of the 2025–2027 Development Strategy.

Purpose of the Model: To systematically manage the long-term strategic development of TerSU, to harmonise the activities of all vice-rectorates within an integrated framework, and to cultivate a management culture aligned with contemporary trends in higher education.

Within this model, the following programmes are defined as the university's strategic pillars:

1. **"A Driver of regional development"**
2. **"Digital and competence-based education"**
3. **"Scientific advancement and innovative transformation"**
4. **"Student development based on social engagement and moral resilience"**
5. **"Academic Globalisation and Integration into International Rankings"**
6. **"Sustainable Infrastructure and a Green Campus"**

2. OUR STRATEGIC INSTITUTIONAL PROGRAMMES

3.1. "REGIONAL DEVELOPMENT LOCOMOTIVE" PROGRAMME

The **"Regional Development Driver"** is the regional strategic leadership programme of Termez State University.

Programme objective: Based on its academic capacity, research potential and practically oriented strategic approach, Termez State University shall function as an intellectual centre that supports the comprehensive development of Surkhandarya Region through scientific and innovative approaches.

The University's *Regional Studies Centre* serves as the institutional body ensuring a systematic and scientific approach to regional issues and acts as the responsible and leading structure for the implementation of this strategic pillar.

The centre participates in development programmes across all districts of the region by providing scientifically grounded recommendations.

Programme tasks: This programme identifies the key directions for the socio-economic development of Surkhandarya Region as follows and submits scientifically based proposals to the relevant organisations:

1. Development of the agrarian sector:

Cultivation of high value-added crops; introduction of modern agrotechnologies; seedling production; expansion of agricultural processing; digitalisation of agriculture; livestock farming.

2. Development of industry and infrastructure:

Support for small and medium-sized industry using local raw material resources; improvement of logistics and transport networks; mining.

3. Development of tourism:

Enhancing domestic and international tourism potential based on historical, cultural and natural sites; upgrading tourism infrastructure.

4. Support for employment, small business and entrepreneurship:

Creation of new jobs; promotion of youth and women's entrepreneurship; vocational training.

5. Improvement of the social sphere:

Enhancement of the condition of schools and hospitals; strong emphasis on the quality of education; modernisation of social infrastructure.

3.1.1. MAIN COMPONENTS OF THE PROGRAMME

1. TerSU's operation as a scientific-analytical centre within the region:

- Establishing analytical groups on sector-specific regional issues;
- Developing “scientifically grounded decision-making packages” for local administration, districts and cities.

2. Regional specialisation of personnel training:

- Diversifying bachelor's and master's degree programmes based on the socio-economic profile of districts;
- Forming district-based analyses of personnel demand.

3. Contribution to economic activity through innovative projects and start-ups:

- Initiatives such as “Sherabad Agro-Start-up Zone”, “Darband Eco-Tourism Incubator”;
- Project platforms such as “Artificial Intelligence + Agriculture” (AgroAI).

4. Cluster-based cooperation with local government and enterprises:

- Linking “science – education – practice” clusters to issues of production, healthcare and environmental challenges in districts;
- Provision of scientific services based on initiative budgets and social orders.

3.1.2. EXPECTED OUTCOMES OF THE PROGRAMME

- 1.** TerSU will operate as a center providing the scientific foundation for major decision-making at the regional level.
- 2.** A clear scientific engagement and interest of TerSU in the socio-economic development of the region will be formed.
- 3.** Research activities and the educational process will become closely integrated with the needs of the region.

4. For donors and international organisations, TerSU will be recognised as a reliable scientific partner.

3.1.3. IMPLEMENTATION MECHANISMS OF THE PROGRAMME

To ensure the implementation of this programme, under the leadership of the University Rector, the Vice-Rector for Research and Innovation, and the Regional Studies Centre (RSC) shall function as the execution, monitoring and reporting body of this model. They shall establish the following implementation mechanisms:

- Establish thematic groups within faculties to study economic, social, demographic and environmental issues in each district. These groups shall consist of research-active professors and teachers, PhD researchers, master's students and research interns;
- Create cooperation structures with district sector leaders, city administration, production enterprises and NGOs;
- Consolidate all analytical data, reports, recommendations and survey results in the RSC's digital database, and regularly submit them to regional and district administration;
- Present information in open format on a dedicated page of the university's official website;
- Launch activities to integrate faculties into the solution of regional issues;
- Take measures to orient research topics, graduation papers, internships and expeditions towards the problems of these districts;
- Prepare proposals for introducing the model of "teaching through research" (research-based education) into the educational process;
- Develop recommendations on establishing regional analysis and practical modules for bachelor's and master's students;
- Prepare proposals for implementing practical training and summer expeditions in the "student + district + research" format;
- Under the leadership of the vice-rectors and the RSC, organise annual reporting meetings and strategic review sessions.

3.1.4. PROGRAMME ROADMAP

1st chart

No	Stage / Activity	Term	Responsible Parties (Performer)	Expected Outcome
1	Approval and implementation of the "Regional Development Model" through an official decision.	2025 year III-quarter	Responsible Vice-Rector, RSC	The document is approved

OFFICIAL TRANSLATION

2	Restructuring of the organisational framework of the Regional Studies Centre.	2025 year III-quarter	Responsible Vice-Rector, RSC	The structural framework is established
3	Establishment of scientific-analytical groups by district (organised by faculties).	2025 year III-quarter	Responsible Vice-Rector, RSC, faculties	Scientific groups are formed
4	Preparation of district-specific regional analyses and problem maps.	2025 year IV-quarter	Scientific groups, RSC	A problems database is created
5	Introduction of the “Regional Researchers’ Group” system.	2025 year III-quarter	Responsible Vice-Rector, RSC, scientific department	The activities of the specialized groups commence
6	Alignment of research topics with district issues (for Master’s and PhD students).	2025 year II-IV- quarters	Scientific departments, chairs	Increase the number of localized research activities
7	Implementation of the “Regional Research Day” format.	2025 year IV-quarter	Responsible Vice-Rector, RSC	Conducts public activities.
8	Execution of Memoranda with local sectors and administration.	2025- 2026 years	Responsible Vice-Rector, RSC	Cooperation becomes institutionalized
9	Engagement of students in practical research within regional projects.	From 2025 onwards	Responsible Vice-Rector, RSC, faculties	Practice + research integration
10	Participation in international and national grant competitions.	From 2025 onwards	RSC, International Department	Grants allocated
11	Submission of the final report and results for 2025-2027 to the relevant authorities.	IV-quarter of each year	Responsible Vice-Rector, RSC	Enhancement of TerSU’s public reputation

3.1.5. PROGRAMME INDICATORS: TARGET METRICS

2nd chart

No	Activity indicator	2025 y.	2026 y.	2027 y.
1	Number of analytical reports by district on regional issues	6	12	15
2	Number of scientific recommendations submitted to district and city administration	20	25	30
3	Number of active faculties within the “Research Group on Regional Issues”	5	10	12

OFFICIAL TRANSLATION

4	Number of student research papers and master's dissertations directed to each district	30	40	50
5	Number of initiative projects (agriculture, tourism, water, social sector)	8	10	12
6	Participation in regional scientific and practical conferences	3	5	6
7	Financial income derived from scientific services (expert examination, analysis, consultancy) (in million soums)	400 mln.	700 mln	1000 mln
8	Number of events held in the "Regional Research Day" format	2	4	6
9	Regional projects participated in within international and national grant programmes	2	4	6
10	Memoranda signed with regional partner organizations (district administration, enterprises)	5	10	15
11	Number of sectors and districts for which the "Regional Development Atlas" / information bulletin is prepared	3	7	10
12	Regional start-ups implemented with student participation	2	4	6
13	Public surveys and analyses on regional issues	4	8	14
14	Practical workshops on socio-economic development of regions conducted on-site	3	6	12
15	Number of proposals accepted by district administration for implementation	3	6	12

3.1.6. PROGRAMME ACTION PLAN

3-chart

№	Activity indicator	Implementation mechanism	Execution timeframe	Responsible executing parties
1	Analytical reports by districts	Establishing scientific groups, collecting data, and conducting analysis for each district	2025 year III-quarter	Regional research centre, departments
2	Preparation of scientific recommendations	Preparing infographic-based recommendations on the basis of the analysis results	Ongoing (permanent)	Regional research centre, departments
3	"Regional researchers' group" within faculties	Establishing a coordinating group and conducting seminars	2025 year III-IV quarter	Responsible Vice-rector, deans of faculties

OFFICIAL TRANSLATION

4	Localisation of scientific works and dissertations	Guidelines for academic supervisors and a database of local research topics	Commences in III quarter of 2025-ongoing	Scientific department, department of Master's, departments
5	Regional initiative projects	Competitions for agro, eco, water, and social start-ups	2025-2027, one competition per year	Scientific department, incubation centre, youth union
6	Financial revenue from scientific services	Contracts with district administrations and economic organisations	Ongoing (permanent)	Scientific department, commercialisation department
7	"Regional Research Day"	Presentation of research outcomes in each district	According to the plan	Regional research centre, "Regional researchers' group"
8	Participation in national and international grants	Preparing applications for Erasmus+, KOICA, UNDP, and ISTTP	Ongoing (permanent)	Regional research centre, scientific department, international department
9	Drafting a memorandum	Negotiations with district administrations, local sectors, and enterprises	Ongoing (permanent)	Rector, responsible Vice-rector, economic division, regional research centre
10	"Regional development atlas"	Compilation of datasets, maps, and analyses	Ongoing (permanent)	Regional research centre
11	Student start-ups	Business incubator, mentorship, and financing	Annual competitions	Scientific department, incubation centre, youth union
12	Social surveys and analyses	Conducting social surveys among students and the local population	Once or twice per year	Regional research centre
13	Practical seminars on socio-economic development of districts on site	Thematic masterclasses and open discussions	Once per year in each district	Regional Research Centre, "Regional Researchers' Group", departments

Note: The funding sources for the Action Plan may include the university budget, initiative-based budgets, grants, and commissioned services. The Action Plan shall be implemented in an integrated manner in cooperation with enterprises, local authorities, and international partners.

3.2. “DIGITAL AND COMPETENCY-BASED EDUCATION” PROGRAMME

The “**Digital and competency-based education**” Programme is an advanced educational initiative that defines TerSU’s strategic leadership direction in the academic sphere.

Programme objective: To organise the educational process at TerSU in alignment with digital technologies, a competency-based approach, and the requirements of the labour market, thereby ensuring the preparation of specialists who possess strong practical knowledge, skills, and competitiveness.

Programme task: To reinforce theoretical knowledge with practical skills based on employer requirements; to cultivate the ability to make prompt decisions in real situations; and to prepare competitive specialists who possess sufficient understanding of the current state and future prospects of their respective fields.

3.2.1. Key components of the programme

1. Full transition to a digital learning environment

- implementing comprehensive utilisation of HEMIS, LMS, and other educational platforms to organise and manage the learning process effectively.
- integrating electronic learning resources, online assessments, video materials, and feedback systems into the teaching process.
- developing a university platform to support grant competitions in compliance with Presidential Decree No. PF-76.
- establishing a platform to optimise accommodation use and monitor room occupancy efficiently.
- organising transparent selection processes for subjects and academic staff.
- setting up a system to monitor graduates’ readiness for the State Attestation Examination (Baccalaureate and Master level).
- managing student transfers and reinstatements through a dedicated platform.
- providing access to the university’s electronic library collection for pupils of affiliated schools, polytechnics, and technical colleges.

- increasing student engagement with digital resources and continuously expanding the electronic library collection to ensure accessibility and ease of use.
- developing the EduVision AI platform, integrating artificial intelligence to enhance the quality of teaching and learning.
- introducing a distance learning platform to complement on-campus teaching.
- gradually upgrading and integrating all existing educational platforms for cohesive operation.
- applying modern digital technologies to deliver student-centred, convenient, and effective educational services.

2. Adoption of competence-based programmes from Top-300 Global Universities

- review and analyse the curricula of top-300 global universities;
- enhance the University's programmes by aligning them with the curricula of international universities ranked within the top-300;
- redesign the curricula based on a competence-oriented approach;
- revise the programmes according to an outcome-based framework;
- deliver courses through practical assignments, case studies, and project-based learning.

3. Enhancing the effectiveness of the educational process and the preparation of competitive specialists

- engaging qualified faculty members from top 1,000 international universities in the educational process;
- facilitating the professional development of departmental faculty at leading national and international enterprises and organisations, while selectively preparing promising young specialists for targeted programmes such as “El-Yurt Umidi” and various grants;
- organising student internships in enterprises and organisations equipped with modern technologies relevant to their fields of study, establishing departmental branches to optimise the use of material and technical resources, and coordinating educational sessions, final qualification works (BSc/ MSc theses), and dissertation defences;
- gradually increasing the number of final qualification works in accordance with the students' numbers, taking into account scientific potential, material and technical resources, and the specifics of academic programmes, while directing their topics towards research addressing regional and sectoral challenges with practical solutions;

- staffing the Information and Resource Centre (IRC) with highly qualified specialists holding advanced degrees in the relevant fields;
- targeted preparation of master's students in specialised areas at leading national universities and key partner institutions.

4. Development of the material-technical base

- establish SMART (subject-specific) classrooms aligned with degree programmes in each faculty at the start of the new academic year;
- purchase monitors, modern whiteboards, e-podiums, and visual aids to enhance the effectiveness of lectures;
- set up computer laboratories in each faculty, equipped with the necessary software;
- renovate classroom furniture and laboratory spaces, and procure new laboratory equipment and chemical reagents;
- refurbish the Information Resource Centre, install a new internet network, and furnish it with modern furniture.

5. Enhancing the University's Attractiveness and Implementing High-Quality Educational Services

- conduct teaching of specialised subjects in English;
- organise educational services in formats that are convenient for international students;
- ensure relevant study programmes are accredited in line with the demands of the education market;
- establish hostels to support dual education in the Tourism study programme;
- provide specialised learning equipment, Braille literature, and audio materials for students with disabilities and special needs;
- set up specialised courses enabling graduates to acquire additional certifications required for employment, including foreign language proficiency and IT literacy in their respective specialisations;
- offer courses in psychology, law, tourism, accounting, language learning, sports coaching, and other areas within the university;
- organise Uzbek language courses for international students;
- conduct teaching by grouping students into beginner and advanced classes based on foreign language proficiency;
- establish language courses for professors and academic staff.

6. Labour market-aligned education

- develop elective courses based on labour market demands and employer requirements.

- elevate the integration of enterprises, practical training, and final-year projects to a new level.
- establish a permanent dialogue platform with the country's leading enterprises and organisations to facilitate graduate employment.
- continuously monitor and analyse regional vacancies, ensuring graduates can establish direct connections with the relevant enterprises and organisations.

3.2.2. Expected Outcomes of the Programme

1. All educational processes will be fully digitised and coordinated by the office registrar.
2. The quality of courses, student outcomes, and teaching performance will be monitored in real time via EduVision AI.
3. Platforms such as HEMIS, LMS, test.tersu.uz, magistr.tersu.uz, and kpi.tersu.uz will be integrated with AI.
4. Monitoring of final qualification (BSc/MSc) defences, student accommodation, and study transfer processes will be implemented.
5. Library user engagement will double, and access to the electronic collection at the Information Resource Centre (IRC) will operate online 24/7.
6. Students will acquire practical skills and soft skills alongside theoretical knowledge.
7. Alignment with international best practices will ensure parity with high-ranking global universities.
8. Departmental branches will be established at practical training bases relevant to each programme.
9. The volume of final qualification projects will increase by 30%, with research directed towards practical, production-oriented solutions.
10. A pool of candidates for the “El-Yurt Umid” and other grant programmes will be established.
11. All faculties will conduct classes in SMART-enabled classrooms.
12. A practical learning environment will be created using 3D printers, electronic podiums, monitors, and new laboratory equipment.
13. The Information Resource Centre will be transformed into a digital, interactive, and modern knowledge hub.
14. Facilities for students with disabilities will be enhanced, equipped with specialised Braille, audio, and visual resources.
15. Graduates will be equipped with IT and foreign language certifications to ensure competitiveness in the labour market.

16. Supplementary courses within the university will provide additional services and revenue streams for students and the community.
17. The university will emerge as a leading regional centre for education.

3.2.3. PROGRAM EXECUTION MECHANISMS

To ensure the effective implementation of this programme, under the leadership of the University Rector and the Vice-Rector for Academic Affairs, in collaboration with the Information Technology Centre, the Academic Methodology Department, the Information Resource Centre, the Registrar's Office, Faculty Deans, and Heads of Departments, the following implementation mechanisms will be established progressively:

- utilisation of educational platforms to organise the teaching and learning process efficiently.
- application of modern technologies to provide students with accessible and high-quality educational services.
- study and localisation of curricula from international (Top-300) universities.
- enhancement of the effectiveness and efficiency of the educational process.
- development of faculty professional capacity and preparation of young specialists for participation in international programmes.
- expansion and modernisation of the material and technical base.
- improvement of the University's attractiveness and appeal.
- preparation of competitive graduates and the development of their practical skills.
- integration of education with labour market needs.

3.2.4. PROGRAMME ROADMAP

1-chart

No	Stage / Activity	Term	Responsible parties (performer)	Expected outcome
1	Effective utilisation of educational platforms to optimise the teaching and learning process	During 2025-2027 years	Vice-Rector for teaching and academic affairs, academic office, part-time education department	Students' level of knowledge will increase, the efficiency of teachers' work will improve, and the university's digital image will be strengthened.
2	Deployment of modern technologies to deliver accessible and high-quality educational	During 2025-2027 years	Vice-Rector for teaching and academic affairs,	Students will have the opportunity to access academic sources online 24/7 from any location and

OFFICIAL TRANSLATION

	services across the university		information resource centre(IRC), academic office, part-time education department	to find information (articles, books, video lectures) quickly and accurately.
3	Analysis and localisation of curricula from top-300 global universities	During 2025-2027 years	Vice-Rector for teaching and academic affairs, academic office, heads of department	The university's academic programmes will become closer to international standards, students' competitiveness in the labour market will increase, and opportunities for advancing in academic rankings will be achieved.
4	Enhancement of teaching and learning effectiveness and overall academic performance	During 2025-2027 years	Vice-Rector for teaching and academic affairs, Vice-Rector for international relations, academic office, heads of department	Students' theoretical knowledge will be further reinforced, and their practical skills and competencies in working with modern technologies will be enhanced.
5	Strengthening the professional capacity of academic staff and preparing promising young specialists for international programmes	During 2025-2027 years	Vice-Rector for teaching and academic affairs, Vice-Rector for international relations, HR department, academic office, heads of department	The professional capacity of academic staff will be improved, and a pool of promising young specialists will be formed, ensuring their participation in various grants.
6	Development of the university's material-technical infrastructure	During 2025-2027 years	Vice-Rector for teaching and academic affairs, Vice-Rector for Finance and Economic Affairs, IRC, academic	A convenient, modern, and technologically equipped environment for the educational process will be created.

			office, heads of department	
7	Augmentation of the university's attractiveness and reputation as a centre of excellence	During 2025-2027 years	Vice-Rector for teaching and academic affairs, Vice-Rector for Finance and Economic Affairs, IRC, academic office, heads of department	A comfortable and modern learning environment will be established for both international and local students at the university.
8	Preparation of competitive graduates equipped with advanced practical and transferable skills	During 2025-2027 years	Vice-Rector for teaching and academic affairs, Vice-Rector for finance and economic affairs, academic office, heads of department	Students' practical skills and essential knowledge such as foreign languages, IT, legal literacy, and psychology will be improved. They will be shaped into specialists who are competitive in the labour market and meet contemporary requirements.
9	Alignment and integration of educational programmes with labour market requirements	During 2025-2027 years	Vice-Rector for teaching and academic affairs, academic office, career centre, heads of department	Academic programmes will be aligned with real employer demands, the connection between graduates and job positions relevant to their specialisation will become easier, and their employment indicators will increase.

3.2.5. PROGRAMME INDICATORS: TARGET METRICS

2-chart

3.2.6. PROGRAM ACTION PLAN

2-chart

No	Activity indicator	Implementation mechanism	Execution timeframe	Responsible executing parties
1	Utilisation of educational platforms to organise the learning process effectively	1. Gradual integration of existing university platforms such as HEMIS, LMS, test.tersu.uz, kpi.tersu.uz, magistr.tersu.uz, and ofis.tersu.uz with artificial intelligence. 2. Enhancement of educational quality and real-time monitoring of student and academic staff performance through EduVision AI. 3. Utilisation of a dedicated LMS e-platform for distance learning, incorporating video lectures, online assessments, grading, and feedback systems.	Regular During 2025-2027 years During 2025-2026	Vice-Rector for teaching and academic affairs, academic office, part-time education department
2	Application of modern technologies to provide accessible and efficient educational services at the university	1. Establishing access to the digital library and the electronic resources of the Information Resource Centre. 2. Training all academic staff to utilise the LMS system in the course of teaching and providing methodological support. 3. Developing new platforms to enhance the quality of educational services for students.	During 2025-2026 2025 year 3d-4th quarter During 2025-2027 years	Vice-Rector for teaching and academic affairs, IRC, PTTM, academic office, part-time education department
3	Study and localisation of curricula from TOP-300 universities	1. Studying the curricula of universities ranked in the TOP-300. 2. Improving the university's curricula through alignment with the programmes of international higher education institutions ranked in the TOP-300.	During 2025-2026 During 2025-2026	Vice-Rector for teaching and academic affairs, academic office, heads of department

4	Enhancement of the efficiency of the learning process	1. Engaging qualified academic staff from higher education institutions ranked within the TOP-1000 in the teaching process. 2. Organising student placements at enterprises and organisations equipped with modern technologies relevant to the academic programmes, utilising the departmental branches to make effective use of the material and technical resources, and coordinating the organisation of teaching sessions, final qualification works (BSc/MSc theses), and their defences.	During 2025-2026 Regular	Vice-Rector for teaching and academic affairs, Vice-Rector for foreign affairs, academic office, heads of department
5	Development of academic staff professional capacity and preparation of promising young personnel for international programmes	1. Facilitating the professional development of departmental academic staff in their respective specialisations at leading domestic and international enterprises and organisations, and selecting promising young specialists for targeted preparation for the “El-Yurt Umid” programme and various grants. 2. Conducting targeted preparation of master’s students in specialised fields at leading and foundational higher education institutions across the country within the departments. 3. Equipping the Information and Resource Centre (IRC) with highly qualified specialists possessing advanced expertise in the relevant fields.	During 2025-2027 years During 2025-2027 years 2025 year 4th quarter	Vice-Rector for teaching and academic affairs, Vice-Rector for foreign affairs, academic office, heads of department
6	Advancement of the university’s material and technical base	1. Establishing SMART (subject-specific) classrooms aligned with the educational programmes. 2. Procuring monitors, modern whiteboards, e-podiums, and visual aids to enhance the effectiveness of lecture sessions.	2025 year 3d-4th quarter During 2025-2026 y.	Vice-Rector for teaching and academic affairs, Vice-Rector for finance and economic affairs, IRC, academic office, heads of department

		3. Refurbishing classroom furniture and laboratory rooms, and purchasing new laboratory equipment and chemical reagents. 4. Renovating the Information and Resource Centre, installing a new internet network, and equipping it with modern furniture.	During 2025-2027 years During 2025-2026	
7	Enhancement of the university's attractiveness	1. Conducting subject-specific lessons in English. 2. Organising educational services in formats convenient for international students. 3. Providing specialised learning equipment, Braille literature, and audio materials for students with disabilities and special needs. 4. Conducting lessons by dividing students into beginner and advanced groups according to their foreign language proficiency. 5. Organising language courses for academic staff.	During 2025-2027 years 2025 year 3d-4th quarter During 2025-2027 years	Vice-Rector for teaching and academic affairs, Vice-Rector for finance and economic affairs, IRC, academic office, heads of department
8	Training of competitive personnel and development of their practical skills	1. Establishing "HOSTELS" to implement dual education in the Tourism programme. 2. Organising specialised courses to enable graduates to obtain additional certificates required for employment, including foreign language proficiency, IT literacy, and their professional specialisation. 3. Offering courses within the university in psychology, law, tourism, accounting, language learning, sports coaching, and other areas.	During 2025-2027 years During 2025-2027 years During 2025-2027 years	Vice-Rector for teaching and academic affairs, Vice-Rector for finance and economic affairs, IRC, academic office, heads of department

OFFICIAL TRANSLATION

		4. Organising Uzbek language courses for international students.	During 2025-2027 years	
9	Strengthening the integration of labour market-oriented education with professional competency development	1. Continuously updating the curriculum content based on the demands and requirements of enterprises and organisations. 2. Establishing a permanent platform for dialogue with the country's leading enterprises and organisations to facilitate graduate employment. 3. Conducting ongoing monitoring and analysis of vacancies in the region and ensuring that graduates can establish contact with the relevant enterprises and organisations.	Regular Regular Regular	Vice-Rector for teaching and academic affairs, academic office, career centre, heads of department

Note: The funding sources for the Action Plan may include the university budget, initiative-based budgets, grants, and commissioned services. The Action Plan will be implemented in an integrated manner in cooperation with enterprises, local authorities, and international partners.

3.3. «SCIENCE DEVELOPMENT AND INNOVATIVE TRANSFORMATION» PROGRAMME

«Science Development and Innovative Transformation» is TerSU's strategic leadership programme in the field of scientific research and innovation.

Programme objective: the development of science at TerSU, the enhancement of the scientific capacity of academic staff and young researchers, going beyond education and research to commercialise scientific achievements, and turning the university into a scientific-innovation centre at regional and national levels.

Programme task - to increase scientific capacity at TerSU, to direct scientific research towards solutions to regional and sectoral problems, to encourage young researchers, and to develop innovative products and start-ups, thereby transforming the university into a leading scientific-innovation centre at national and international levels. Within the framework of this programme, the integration of research, education, and practice will be ensured, and close cooperation will be established among Doctors of Science (DSc), PhD researchers, master's students, students, and production sectors.

3.3.1. KEY COMPONENTS OF THE PROGRAMME

1. Increasing scientific capacity direction:

- Strengthening programmes for enhancing the capacity of academic staff;
- Expanding the base of doctoral studies and PhD research;
- Developing the tradition of “master–apprentice” mentorship;
- Developing scientific schools on the basis of the master–apprentice model;
- Attracting talented students to the master's and doctoral schools.

2. Directing Scientific Research Towards Regional and Sectoral Problems:

- Ensuring the integration of science and practice;
- Linking bachelor's theses, master's dissertations, and PhD research topics to regional problems;
- Establishing a “scientific order” system for forming bachelor's theses, master's dissertations, and PhD topics jointly with regional sectors and enterprises;

- Establishing strategic cooperation with the state, business, and universities, and aligning research with industrial needs.

3. Strengthening Innovation Activity:

- Increasing the number of start-up and spin-off projects at the university;
- Increasing the number of innovative products (patents, software, inventions);
- Creating an incubation and acceleration environment for young researchers;
- Prioritising high-impact publications in prestigious scientific journals;
- Promoting TerSU's scientific activities to the wider public through international conferences and forums;
- Enhancing the dissemination of scientific results to society.

4. Expanding International Scientific Cooperation:

- Involving PhD and master's students in 1+1 supervisor and mobility programmes;
- Increasing the number of SCOPUS and WoS publications;
- Participating in international scientific conferences and projects.

5. Projects:

- Participating in competitions for innovative, fundamental, and applied projects announced by the Agency for Innovative Development;
- Attracting major international research grants;
- Implementing joint scientific projects in cooperation with foreign organisations, research institutes, and higher education institutions;
- Strengthening cross-border research with international scientific institutions;
- Improving mechanisms for technology transfer and commercialisation.

6. Research Management:

- Further reforming the system of managing scientific research;
- Coordinating the duties of academic staff to ensure balance between scientific and teaching workloads;
- Strengthening scientific supervision programmes and incentive systems;
- Promoting standards of scientific ethics and integrity.

7. Aligning Scientific Activity with International Ranking Criteria:

- Analysing ranking criteria and determining the required tasks;
- Integrating ranking criteria into the scientific planning and reporting system;
- Implementing practical measures to achieve target indicators;

- Creating complete information profiles for all researchers on platforms such as Google Scholar, ORCID, and ResearchGate, and linking them to the ranking system.

3.3.2. EXPECTED OUTCOMES OF THE PROGRAMME

1. **Scientific capacity will increase** — the number of Candidates of Science and Doctors of Science will grow, and the school of scientific supervisors will develop.
2. **The share of SCOPUS and WoS articles will increase** — publications in internationally recognised journals will improve the university's ranking.
3. **The number of academic staff with a Hirsch index (h-index) of 5 or higher (Scopus) will rise.**
4. **The activity of young researchers will strengthen** — scientific schools will be developed on the basis of the master–apprentice system.
5. **Innovative products (patents, software, platforms) will be created** — opportunities for commercialising the university's scientific developments will emerge.
6. **Start-up and spin-off projects will be formed** — young scientists and students will transform their research into entrepreneurial ventures.
7. **The linkage of research with practice will strengthen** — bachelor's theses, master's dissertations, and doctoral works will be directed towards solving regional problems.
8. **The innovation infrastructure will advance to a new stage** — scientific analysis and monitoring will be automated through digital platforms such as *journals.tersu.uz*, *daraja.ilmiy.uz*, *admin.anjumanlar.uz*, and *monitoring.ilmiy.uz*.
9. **Participation in international grants and projects will expand** — the university's scope of scientific cooperation will broaden.
10. **The university will become a national and regional scientific centre** — a centralised ecosystem of science, research, and innovation will be formed.
11. **The university will strengthen its position in international rankings.**

3.3.3. IMPLEMENTATION MECHANISMS OF THE PROGRAMME

To ensure the implementation of this programme, under the leadership of the University Rector and the Vice-Rector for Scientific Affairs and Innovation, and in cooperation with the Regional Research Centre, the Scientific Department, faculties, and departments, the following implementation mechanisms will be introduced step by step:

- Targeted plans will be developed in each faculty and department to increase the number of DSc and PhD candidates defending their theses;
- Based on scientific capacity indicators, adjustments will be made to the work plans of academic staff;
- Programmes for developing scientific schools on the basis of the master–apprentice model will be prepared within departments, and the effectiveness of these schools will be analysed annually;
- In cooperation with the TerSU Regional Research Centre, master’s, PhD, and bachelor’s thesis (BMI) topics will be directed towards urgent issues in each district and sector;
- A system for receiving requests from sectors will be developed for selecting research topics based on regional problems;
- Recommendations, proposals, and projects formed as a result of research will be incorporated into practical reform processes;
- By fully operationalising the activities of the “Business Incubation and Acceleration” unit, plans will be created to develop start-up and spin-off projects from scientific ideas to final products;
- A mechanism for cooperation with the technopark will be developed for the scientific-applied developments of academic staff and students;
- A group of innovation managers will be established to manage patenting, licensing, and commercialisation processes;
- Researcher exchange will be organised on the basis of bilateral cooperation agreements with international higher education institutions (dual PhD, double degree, research consortium);
- Mentorship programmes and authorship workshops will be introduced for writing SCOPUS/WoS articles;
- A system will be formed to prepare scientific researchers for grants that send them on internships to scientific centres abroad;
- “Scientific analysis and results meetings” will be held every six months under the leadership of the vice-rectors;

- An annual competition will be held in the nominations “Researcher of the Year”, “Best Scientific Group”, and “Scientific-Innovative Project”.

3.3.4. PROGRAMME ROADMAP

1-chart

No	Stage / Activity	Term	Responsible parties (performer)	Expected outcome
1	Preparing a defence plan for DSc and PhD dissertations for each department	2025 year 3-quarter	Vice-Rector for scientific affairs, departments	A clear plan for enhancing scientific capacity
2	Developing scientific schools and the master–apprentice system	2025 year 3-quarter	Vice-Rector for scientific affairs, departments, Master’s department	The system of scientific supervision will be renewed
3	Creating a “scientific order” system (for regional problems)	2025 year 3-quarter	Vice-Rector for scientific affairs, departments	Research topics will be aligned with practical needs
4	Establishing a “Business Incubation and Acceleration” start-up incubator	2025 year 3-quarter	Scientific centre, innovation department	An innovation platform will be created for young researchers and academic staff
5	Launching a mentorship course for writing SCOPUS/WoS articles	2025 year 3-quarter	Scientific affairs department, departments	The number of international publications will increase
6	Forming a reserve pool of candidates for grant programmes for scientific internships	2026 year 1-2-quarter	Vice-Rector for scientific affairs, Scientific department, departments	Participation in overseas internships will intensify
7	Aligning scientific research criteria in the KPI system with international and national rankings	2026 year 1-quarter	Vice-Rector for scientific affairs, scientific department, departments	Positions in national and international rankings will improve
8	Ensuring the maintenance of data on ministry platforms	Regular	Vice-Rector for scientific affairs, scientific department	Interdepartmental information exchange will be strengthened

OFFICIAL TRANSLATION

9	Organising the “Researcher of the Year” and “Innovative Project” competitions	Annually in the 4 th quarter	Scientific department, commercialisation centre	Active researchers will be incentivised
10	Increasing the number of contractual economic agreements	Regular	Scientific department, commercialisation centre	Income generated from scientific services will increase
11	Establishing spin-off companies	Regular	Commercialisation centre	A commercialisation system will be established
12	Increasing the number of academic staff with a Hirsch index (h-index) of 5 or higher (Scopus)	Regular	Vice-Rector for scientific affairs, scientific department, departments	Opportunities for securing grants will increase
13	Increasing the number of scientific laboratories and centres	Regular	Vice-Rector for scientific affairs, scientific department, departments	Opportunities for applied research will expand
14	Selecting and supporting talented students	Regular	Vice-Rector for scientific affairs, scientific department, departments	The number of recipients of Presidential and named state scholarships will increase
15	Increasing the number of scientific circles	Regular	Scientific department, faculties	The pool of scientifically active students will expand
16	Organising scientific-practical conferences and symposia	Regular	Vice-Rector for scientific affairs, scientific department, departments	Scientific solutions and recommendations will be developed
17	Increasing the number of doctoral candidates	Regular	Scientific department, departments	A sufficient supply of scientific personnel will be ensured
18	Ensuring transparent admission examinations for independent researchers	Regular	Vice-Rector for scientific affairs, scientific department, departments	Trust and transparency in scientific activity will be strengthened

OFFICIAL TRANSLATION

19	Increasing the number of scientific projects	Regular	Scientific department, departments	The project portfolio will expand
20	Increasing the number of scientific projects (fundamental, applied, grants)	Regular	Scientific department, departments	A vibrant scientific environment will be formed
21	Participation in international scientific projects (Erasmus+, Horizon, etc.)	Regular	Scientific department, international department, departments	Scientific cooperation will be enhanced
22	Preparing projects based on contractual economic agreements	Regular	Commercialisation centre, departments	Integration between science and business will be strengthened
23	Increasing the total number of scientific works (articles, theses, patents, etc.)	Regular	Scientific department, departments	The scientific reputation of the university will increase

3.3.5. PROGRAMME INDICATORS: TARGET METRICS

3.3.6. PROGRAMME ACTION PLAN

2-chart

No	Activity indicator	Implementation mechanism	Execution timeframe	Responsible executing parties
1	1. Enhancing scientific capacity	1. Strengthening programmes for enhancing the capacity of academic staff: - Organising regular training sessions and professional development courses on scientific research (Scopus, Web of Science, grant writing, research methodology). - Increasing the annual number of PhD dissertation defences to 60 and DSc defences to 8. - Increasing the number of academic staff holding scientific titles. - Increasing the number of academic staff with an <i>h-index</i> ≥ 3 to more than 30. - Ensuring that doctoral candidates (basic doctoral studies, doctoral studies and independent researchers) defend their dissertations within the prescribed timeframe. - Organising international academic exchange programmes (postdoctoral training, internships). - Conducting internal academic seminars by scientific fields. 2. Activities of the Postgraduate Education Institutes of TerSU - Opening new PhD programmes (in fields of strategic and regional importance). - Increasing the number of academic supervisors.	Regular During 2025-2027 years During 2025-2026 years Regularly uring 2025-2026 years Regular Regular Regular During the period prescribed by the regulations Regularly depending on the possibilities	Vice-Rector for scientific affairs and innovation, scientific department, Master's department, regional research centre, heads of departments

OFFICIAL TRANSLATION

		– Developing joint doctoral programmes in cooperation with international scientific organisations. – Organising internal monitoring in each specialisation of the postgraduate education institutes at least twice every six months. – Working more intensively with third-year doctoral candidates, basic doctoral candidates and their academic supervisors (consultants) and ensuring timely dissertation defences. – Organising admissions to independent research programmes each quarter based on submitted applications. – Organising admissions to basic doctoral studies, doctoral studies and trainee-researchership programmes based on the allocated quotas.	At least twice within 6 months Regularly Each quarter Annually, from 15 September to 15 October Regular Regular	
		3. Enhancing the effectiveness of scientific councils awarding academic degrees: – Developing measures to increase the number of dissertation defences in the scientific councils operating at the university. – Continuously monitoring the activities of scientific councils, analysing performance indicators, and taking appropriate measures to eliminate identified shortcomings. – Opening scientific councils in specialisations with sufficient scientific potential (for example, opening a scientific council in the field of Psychology). – Increasing the number of specialisations under existing scientific councils.	Each quarter Regular Regular Regular	
		4. Developing the tradition of academic mentorship: – Increasing teacher–student pairs based on the principle “one mentor – one young researcher”.		

	- Introducing a rating and financial incentive system for mentors. - Establishing a reporting system based on the outcomes of academic mentorship (Scopus publications, projects, grants). - Developing scientific schools based on mentorship: - Institutionalising existing scientific schools and allocating sufficient resources to them at the level of faculties and departments. - Developing joint projects, grants and publications within the framework of scientific schools. 5. Attracting talented students to the Master's and Doctoral School: - Introducing a special <i>Research Track</i> programme for gifted undergraduate students. - Piloting the "Young Researcher" and "Master's + PhD" system. - Creating opportunities for special student research grants, mentorship, internships and summer schools. 6. Organising the activities of the Youth Academy: - Promoting the activities of the Youth Academy. - Forming the membership of the Youth Academy and electing its leader. - Carrying out the necessary work to organise the activities of the Youth Academy. - Attracting candidates from among TerSU students to the Youth Academy team through its leader. - Promoting competitions such as "Best Idea", "Best Invention" and "Best Project" among the Youth Academy members.	Each quarter Regular Regular Regular

2	2. Implementation of the Resolution of the President of the Republic of Uzbekistan No. RP-307 of 06.07.2022	7. Implementation of Resolution No. RP-307: – Annex 7a, Clause 53: “Production of high-quality construction adhesives for reed–chipboards based on local raw materials.” – Annex 7, Clause 165: “Production of biogas from organic waste and distribution of biogas to the population and motor vehicles.” – Annex 7a, Clause 52: “Recovery of high-quality rubber through the processing of waste tyres and rubber products.” – Annex 7a, Clause 54: “Obtaining composite membranes based on graphene and applying them to high-efficiency wastewater treatment.”	During 2025-2027 years	
3	3. Directing scientific research towards regional and sectoral problems:	8. Ensuring the integration of science and practice: – To develop a map of applied research areas for each faculty. – To link the activities of departments with regional and sectoral partners (assigning each department to a local sector or enterprise, opening departmental branches). – To organise local forums and meetings on the theme of “Science – Practical Solution”. 9. Linking bachelor’s dissertations (BSc), master’s dissertations and PhD research topics to regional problems: – To create a “regional topics database” for students and announce it at the beginning of the year. – To compile, in cooperation with district sectors, industries and local enterprises, a list of research topics specific to each district. – To specialise the supervisor–student pairing in regional topics.	During 2025-2026 years Annually Regular Annually Annually	Vice-Rector for scientific affairs and innovation, scientific department, Master’s department, commercialisation centre, regional research centre, heads of department

		10. Establishing a system of “Scientific Orders”: – To require that bachelor’s dissertations (BSc), master’s and PhD research topics be based on a scientific cooperation agreement with the relevant district or sectoral organisation. – To request from organisations, at the start of each year, a list of scientific needs and orders. – To form master’s and PhD research topics on the basis of these orders and integrate them into educational and scientific programmes. – To introduce a grant/financial support system on a contractual basis for scientific orders. 11. Strengthening strategic cooperation with the state, business and universities: – To establish joint laboratories and research centres in cooperation with international organisations and local enterprises. – To create facilities within industrial enterprises for scientific internships and research activities.	Regular Regular	
4	4. Strengthening innovation activity:	12. Increasing the number of start-up and spin-off projects: – To establish a start-up accelerator for students and researchers in the fields of science, technology, industry, education and tourism. – To hold the annual “TerDU Start-up” competition at university level. – To strengthen the “Acceleration and Incubation” unit under the Scientific Department. – To provide legal and financial consultancy for spin-off projects on an entrepreneurial basis (through the University Incubation Centre). 13. Increasing the number of innovative products (patents, software, inventions):	During 2025-2027 years An annual report submitted	Vice-Rector for scientific affairs and innovation, scientific department, Master’s department, commercialisation centre, regional research centre, heads of department

		- To organise seminars on patenting and copyright. - To establish a legal and technical support group for formalising scientific results in the form of patents, software and methodological works. - To cover part of the patent fees for innovations produced by academic staff, PhD researchers and master's students. 14. Creating an incubation and acceleration environment for young researchers: - To introduce coaching and mentoring programmes for adapting scientific results to production or societal needs. - To organise training seminars on writing and defending scientific grant applications. 15. Prioritising high-impact publications in prestigious scientific journals: - To launch specialised courses on the Scopus/Web of Science platforms for academic staff and PhD researchers. 16. Promoting TerSU's scientific activities through international conferences and forums: - To send TerSU researchers to international conferences. - To disseminate the outcomes of scientific events in a separate scientific information bulletin. 17. Increasing the dissemination of scientific results to society: - To create a dedicated "Research Outcomes" section on the TerSU website and publish videos, infographics and articles. - To organise a public awareness campaign for scientific results via local and national media, television, radio and social networks.		
--	--	---	--	--

		- To prepare practical guidelines based on research findings for problematic regions, sectors and population groups. 18. Increasing the efficiency of scientific research activities. In 2025 alone: - To increase the number of scientific publications to 3,200, including: - In local scientific journals recognised by the Higher Attestation Commission – 1,000 - In internationally recognised scientific journals (HAC-listed) – 1,000 - In Web of Science indexed journals – 100 - In Scopus indexed journals – 200 - At national conferences – 400 - At international conferences – 400 - Monographs – 100 - Patents for inventions and utility models – 10 - Certificates for software products – 300	In 2025	
5	5. Expanding international scientific cooperation:	19. Engaging PhD researchers and master's students in "1+1" scientific supervision and mobility programmes: - To conclude memoranda and agreements with foreign universities on joint scientific supervision (co-supervision). - To develop and disseminate a database of programmes such as Erasmus+, DAAD, KOICA, Fulbright, ISTTP and similar opportunities for PhD researchers and master's students. 20. Increasing the number of SCOPUS and WoS publications: - To introduce priority points within the KPI system for publications in international journals (Scopus Q1–Q3, WoS).	During 2025-2027 years Regular Regular Regularly during 2025-2027 years	Vice-Rector for scientific affairs and innovation, scientific department, commercialisation centre, regional research centre, heads of department

		- To organise seminar–trainings on writing, editing and submitting scientific articles to SCOPUS and WoS journals. - To establish special target groups for co-authored publications with foreign partners. 21. Participating in international scientific conferences and projects: - To organise training and mentoring programmes for participation in international projects (UNDP, Erasmus+, Horizon Europe, IICAS, etc.). - To establish a “Project Writing Hub” for the preparation and submission of joint project proposals with foreign scientific organisations.	Regularly during 2025-2027 years Regular	
6	6. Increasing the number of projects and contractual (economic) agreements:	22. Participation in competitions announced by the Agency for Innovative Development: - To distribute a special calendar schedule to faculties/departments regarding project competitions announced by the Agency for Innovative Development and other organisations. - To organise training sessions and working groups on writing grant proposals for participation. - To involve students and young researchers in the implementation of selected projects. - To conduct workshops and consultative sessions on applying for international grants. - To intensify the activities of the Commercialisation Department in providing services such as translation, financial planning and technical project design for grant submission.	During 2025-2027 years During 2025-2027 years Regular	Vice-Rector for scientific affairs and innovation, scientific department, commercialisation centre, regional research centre, heads of department

		23. Implementing joint projects with foreign organisations, research institutes and higher education institutions: - To develop applied research projects with foreign higher education institutions and scientific centres on the basis of Memoranda of Understanding. - To establish stationary research laboratories within joint project frameworks. - To develop long-term cooperation programmes in specific fields (energy, agrotechnology, climate, history, digital education). - To assign each department the obligation to prepare and submit at least 2–3 joint grant projects annually. 24. Strengthening cross-border research with international scientific institutions: - To send talented PhD researchers and young scholars to foreign institutes for fixed-term research placements. 25. Enhancing mechanisms for technology transfer and commercialisation: - To establish a regulatory framework and advisory service for supporting the processes of patenting, licensing, prototyping and commercialising scientific results. - To organise project exhibitions, investor meetings and presentation days. 26. Strengthening the content of scientific infrastructure and laboratories, and establishing new ones: - To conduct an inventory of existing scientific laboratories. - To compile a list of required equipment.	During 2025-2027 years During 2025-2027 years During 2025-2027 years During 2025-2027 years	
--	--	---	---	--

		– To take measures to procure necessary modern equipment for scientific laboratories such as “Polymers and Construction Composite Materials”, “Physical-Chemical Research”, “Oil and Gas Chemistry”, “Product Quality Assessment and Certification”, “Artificial Intelligence and Digital Technologies”, “Regional Research Centre”, “Archaeology”. – To expand access to international scientific databases required for research (Scopus, SciVal, ScienceDirect, link.springer.com, Web of Science, Pivot RP). 27. Increasing the amount of funds obtained through innovative and scientific research contracts: – To increase the number of contractual research agreements based on sectoral orders to more than 500 annually. – To increase annual income from research conducted on the basis of sectoral orders (contract research funds) to more than 1.5 billion UZS. – To expand the range of services provided. – To broaden cooperation with manufacturing enterprises. – To regularly analyse the performance and effectiveness of contractual research at the departmental level.	During 2025-2027 years	
7	7. Continuing the reform of the research management system:	28. Reforming the research management system: – To review institutional policies and regulations on research (analysis, funding, reporting, transparency). – To monitor scientific projects, research groups, authorship outputs and grants on the basis of a dedicated registry.	During 2025-2027 years	Vice-Rector for scientific affairs and innovation, scientific department, commercialisation

		29. Ensuring a balance between research and teaching workloads: - To introduce a “reduced teaching load” for academic staff engaged in active research. - To prepare a special timetable for the allocation of teaching and research time for research-active academic staff. 30. Promoting norms of scientific ethics and academic integrity: - To conduct mandatory courses and anti-plagiarism policy seminars on scientific ethics for all PhD researchers, master’s students and academic staff. - To adopt an Academic Integrity Code for the teaching and research process and to ensure compliance with it. - To introduce a unified information system for plagiarism checks (anti-plagiarism and similar systems) for scientific works and articles. - To establish the activity of an advisory group/committee on scientific ethics. 31. Enhancing the effectiveness of the University’s editorial and publishing activities: - To fully operationalise the journals “<i>TerDU Xabarlari</i>” and “<i>Economic Analysis and Research</i>”. - To maintain and supervise the University journals’ website. - To collect articles for the journal “<i>TerDU Xabarlari</i>” and ensure quarterly publication, as well as inclusion in the list of journals recognised by the Higher Attestation Commission. - To check all submitted scientific works using the anti-plagiarism system.	During 2025-2027 years During 2025-2027 years During 2025-2027 years	centre, heads of department
--	--	---	---	------------------------------------

		- To edit and prepare for publication the final versions of programmes, invitations, banners and collections of articles intended for international and national scientific and scientific-technical conferences planned to be held at the University, eliminating orthographic, stylistic and grammatical errors.		
8	8. Aligning scientific activity with international ranking criteria:	32. Analysing ranking indicators and identifying tasks: - To analyse indicators relevant to the <i>Research</i> component (citations, international collaboration, research income, etc.) in QS, THE (Times Higher Education), Greenmetric, ARWU and other rankings. - To determine target outcomes for TerSU for each ranking's scientific indicators. - To establish responsible groups within the Scientific Department and faculties for specific ranking indicators. 33. Integrating ranking indicators into the scientific planning and reporting system: - To reformat the scientific activity of faculties and departments in line with international ranking requirements. - To introduce an integrated ranking indicator in scientific planning which takes into account criteria such as citation count, h-index, international co-authorship and grant-based research. 34. Practical measures for achieving target indicators: - To place particular emphasis on interdisciplinary research and international co-authorship in order to increase citation counts. - To strengthen control over the correct indication of TerSU's name (affiliation uniformity) in articles indexed in Scopus and WoS.	During 2025-2027 years During 2025-2027 years During 2025-2027 years	Vice-Rector for scientific affairs and innovation, scientific department, commercialisation centre, international affairs department, heads of department

Note: The sources of funding for the Action Plan may include the University budget, initiative-based budgets, grants and commissioned services. The Action Plan shall be implemented in an integrated manner in cooperation with enterprises, local authorities and international partners.

3.4. “STUDENT DEVELOPMENT BASED ON SOCIAL ACTIVITY AND MORAL IMMUNITY” PROGRAMME

“**Student Development Based on Social Activity and Moral Immunity**” is the strategic leadership programme of Termez State University in the field of spiritual and educational affairs.

Programme purpose: To ensure that students grow into well-rounded, responsible and proactive individuals by fostering social engagement, civic consciousness, loyalty to national and universal values, ideological stability and moral immunity.

Programme tasks - to develop a sense of civic and social responsibility among students; to cultivate ideological resilience and moral immunity in young people; to establish a system of promoting morality and culture that is harmonised with modern technologies; to encourage social projects, volunteering and public engagement; and to expand opportunities for students to demonstrate their abilities and initiatives.

3.4.1. Main Components of the Programme

- **Spiritual and ideological stability** – strengthening in students the national idea, patriotism and respect for national values, and fostering them as individuals possessing ideological immunity against ideological threats. Through this component, regular preventive measures are carried out against radicalism, religious extremism and violent ideologies.

- **Developing students’ social engagement** – transforming students into active participants in university and community life, ensuring their active involvement in public affairs. Within this process, students participate in volunteering, mass campaigns, public oversight and forms of social partnership.

- **Forming personal development and leadership skills** – developing students’ initiative, speech culture, capacity for independent decision-making in problem situations, teamwork skills and soft skills. For this purpose, mentoring, debates and leadership seminars are organised.

- **Engagement in cultural, artistic and sporting activities** – ensuring students’ general aesthetic and physical development by actively involving them in national music, theatre, literature, performing arts and various sports. Through these clubs, talented students are identified and encouraged.

- **Use of innovative means of outreach** – presenting topics such as spirituality, patriotism, ethics and a healthy lifestyle through modern formats, including video clips, infographics, podcasts, blogs and social media. These tools ensure that the impact of outreach is strengthened.

- **Organisation of youth weeks and social campaigns** – providing students with opportunities for creative expression, initiative and public engagement through monthly projects such as “Youth Week”, “Youth Initiative Day”, “Student Festival” and the “Student Entrepreneurs’ Exhibition”.

- **Promotion of a morally healthy lifestyle** – providing knowledge and skills to counter harmful habits, narcotics, internet addiction and moral corruption, and systematising psychological preventive measures. This serves to strengthen moral immunity.

3.4.2. Expected Outcomes of the Programme

1. **A morally resilient and well-grounded generation is formed** – students acquire ideological stability and immunity against various ideological attacks, alien ideas disseminated via the internet, radicalism, and harmful tendencies.
2. **The proportion of socially active, initiative-taking and responsible students increases** – students become proactive participants in the life of the university, the community and society, actively engaging in volunteering, public oversight and social partnership.
3. **Incidents related to crime, offences, and the consumption of cigarettes and narcotic substances among young people decrease** – as a result of promoting a healthy lifestyle and moral education, strong immunity against harmful habits is developed.
4. **Students acquire personal development, soft skills, cultured speech and leadership abilities** – their competitiveness in the labour market and their capacity for social adaptation are strengthened.
5. **Talented young people in culture, arts and sports are identified and encouraged** – the university’s internal environment develops positively, and students’ talents are revealed.
6. **The number of student-initiated social projects increases** – students’ creative and collective activity expands, and the university’s public image is strengthened.
7. **Modern information technologies and media products are used effectively in moral-educational work** – the impact of outreach efforts is enhanced, and the reach among students increases through visual and digital materials.
8. **A comprehensive moral and social monitoring system covering all students is established** – enabling systematic evaluation, analysis and continuous improvement.

3.4.3. PROGRAMME IMPLEMENTATION MECHANISMS

To ensure the effective implementation of this programme, under the leadership of the Rector of the University, and headed by the Vice-Rector for Youth Affairs and Spiritual-Educational Work, the Department for Youth Affairs and Spiritual-Educational Work, together with the faculties and departments, shall gradually establish the following implementation mechanisms:

1. **Establishing a governance and coordination system for the programme:**
 - setting up a special headquarters (or working group) at university level;
 - reviewing and appointing youth councils and deputy deans for youth affairs at faculty level.
2. **Introducing a system for assessing and monitoring students' social activity:**
 - developing indicators such as the “Social Activity Index” and the “Spirituality Index”.
3. **Developing a system of ideological resilience-building for students:**
 - producing and disseminating educational and promotional materials using modern media tools (podcasts, video blogs, infographics).
4. **Establishing a system for identifying and encouraging student initiatives:**
 - introducing formats such as the “Bank of Social Initiatives”, the “Active Students' Club”, and the “Youth Forum”.
5. **Systematising and enriching spiritual-educational activities:**
 - organising intellectual competitions, debates, literary evenings, and enlightenment libraries.
6. **Implementing healthy lifestyle and preventive measures:**
 - conducting special campaigns against tobacco, alcohol, drug abuse, and preventing moral and behavioural disorders.
7. **Engaging gifted students in self-governance models:**
 - training young leaders and establishing the “School of Youth Leaders”.
8. **Introducing a regular quarterly analysis and reporting system:**
 - holding review and evaluation meetings twice a year under the leadership of the Vice-Rector.

3.4.4. PROGRAMME ROADMAP

1-chart

No	Stage / Activity	Term	Responsibles	Expected outcomes
1	Increasing the public engagement of academic staff and students	Regular	Spiritual department, faculties	Participation levels will reach 80%.
2	Establishing a “Centre for Spiritual and Educational Studies”	2025 year 4 th quarter	Department of spiritual affairs	The effectiveness of analytical and moral-educational work will improve.
3	Launching the “Spiritual Leader” project	2025 year 4 th quarter	Department for work with youth	The number of active and exemplary students will increase.
4	Producing online webinars, podcasts and QR-code-based content	2025-2026 years	Information service, departments	Students will be provided with sufficient access to information.
5	Organising annual competitions with the participation of academic staff and employees	Regular	Administration, Trade union committee	Motivation and social encouragement will rise.
6	Increasing attendance at theatres and museums to 80%	Regular	Tutors, deans	Students’ moral and intellectual outlook will be enriched.
7	Holding at least 2 creative competitions and exhibitions each semester	2025-2027 years	Department of youth policy	Students’ creative activity will increase.
8	Engaging 1,000 students in creative clubs and societies	2025 year 4 th quarter	Deans, tutors	Leisure time will be organised meaningfully.
9	Organising the “Darband Seminar”	Regular	Department of youth policy	Talented young people will be nurtured.
10	Engaging 500 students in the volunteer club	Regular	Department of youth policy	Social engagement will increase.
11	Organising 5 charity and social projects	Annually	Department of youth policy	A sense of service to society will be fostered.
12	Conducting environmental campaigns and landscaping activities	Regular	University maintenance service, students’ union	A sense of responsibility towards nature will be formed.
13	Establishing the “Young Entrepreneurs” club and engaging 50 students in start-up activities	2025 year 4 th quarter	Innovation department, youth policy department	Students will acquire entrepreneurial skills.

Note: The funding sources for the Action Plan may include the university budget, initiative-based budgets, grants, and commissioned services. The Action Plan shall be implemented in an integrated manner in cooperation with enterprises, local authorities, and international partners.

3.5. “ACADEMIC GLOBALISATION AND INTERNATIONAL RANKINGS INTEGRATION” PROGRAMME

“Academic Globalisation and International Rankings Integration” Programme is the programme that defines Termez State University’s strategic leadership direction in the field of international cooperation.

Programme purpose: To elevate Termez State University into the category of internationally recognised higher education institutions, to secure a respectable position in global rankings, and to organise educational and research activities in accordance with global standards.

Programme objectives: To ensure the full integration of Termez State University into the global academic space; to secure a meaningful position in international rankings; to organise educational and research activities based on international standards; to increase the proportion of foreign students and academic staff; to obtain accreditation for educational programmes; and to enhance the university’s global reputation by developing joint programmes and attracting international investments.

3.5.1. KEY COMPONENTS OF THE PROGRAMME:

1. Integration into international rankings:

- Participation in the Times Higher Education (THE), QS, UI GreenMetric and ARWU platforms;
- Establishing responsible working groups for uploading university data to these platforms;
- Organising seminar-trainings at department level (preparation for rankings, the concept of KPIs, etc.).

2. Increasing the proportion of international students:

- PR campaigns, exhibitions and online promotional activities abroad aimed at raising the university’s visibility;
- Increasing the number of degree programmes delivered in English;
- Attracting international scholarships and grants for high-achieving students.

3. Increasing the proportion of foreign academic staff:

- Creating favourable conditions for foreign professors and lecturers and engaging them as visiting academics;
- Academic staff exchange with universities in Türkiye, China, Malaysia and the Russian Federation;
- Recruiting the most active foreign professors on a contractual (staff) basis.

4. Securing international accreditation of academic programmes:

- Cooperation with international accreditation agencies such as ACQUIN, ASIIN and AQAS;
- Aligning methodological documents with international standards;
- Securing accreditation for chemistry and other academic programmes through ASIIN.

5. Overseas internships and professional development:

- Internship programmes with universities in Turkey, China, Russia, Kazakhstan and similar countries;
- Establishing a working group responsible for coordinating professional development programmes within the university.

6. Attracting international investment and grants:

- Intensifying grant-related activities with Erasmus+, JICA, KOICA, UNDP, GIZ and other donors;
- Expanding project-based cooperation with Malaysia, Germany and China.

7. Establishing joint academic programmes:

- Joint programmes in STEM and social sciences with Universiti Malaysia Perlis and Universiti Utara Malaysia;
- Introducing double-degree models.

3.5.2. EXPECTED OUTCOMES OF THE PROGRAMME

1. Termez State University will enter the top 1000 range in international ranking platforms such as QS, THE and UI GreenMetric.
2. The proportion of international students will be significantly increased, and a fully developed environment for their education, accommodation and services will be created.
3. International professors and teaching staff will be engaged in the University's educational process, with appropriate conditions provided for their professional activity.
4. At least seven academic programmes will undergo international accreditation, and their curricula will be aligned with international standards.
5. Joint and dual-degree programmes will be implemented with Malaysia, Türkiye, China, Kazakhstan and other countries.
6. Grant and investment projects will be carried out in cooperation with international donors and organisations such as Erasmus+, JICA, KOICA, UNDP and GIZ.
7. Opportunities will be created for international internships, professional development, scientific expeditions and academic mobility for academic staff and students.

8. The University's website, information systems and electronic platforms will be upgraded in accordance with international requirements and enriched with open data necessary for rankings.
9. A portion of academic programmes (particularly in Master's and STEM fields) will be delivered in the English language.
10. The University will establish itself as a leading innovative and open higher education institution in the region in the field of academic globalisation.

3.5.3. PROGRAMME EXECUTION MECHANISMS

To ensure the implementation of this programme, under the leadership of the University Rector and headed by the Vice-Rector for International Relations, the International Relations Department, the Department for Work with International Rankings, the faculties and academic departments shall jointly establish the following execution mechanisms on a step-by-step basis:

1. **Establishment of the responsible leadership and structural framework:**
 - An international rankings and globalisation task force shall be formed under the leadership of the Rector for the execution of the programme;
 - Vice-rectors, the International Relations Department, the Department for Quality Assurance in Education and outreach groups shall be assigned to it;
 - Responsible units and individuals shall be designated for each ranking criterion.
2. **Establishing a system for working with international rankings:**
 - Each indicator of QS, THE, GreenMetric and other ranking platforms shall be analysed, and corresponding action plans shall be developed within the University;
 - An electronic system for collecting, editing and submitting data for participation in rankings shall be introduced;
 - A dedicated section of the University website shall host all indicators, statistical data and certificates.
3. **Attracting international students and academic staff:**
 - PR, advertising and admissions policies targeted at international students shall be developed;
 - Mechanisms for engaging international professors as visiting lecturers shall be introduced.
4. **Aligning academic programmes with international requirements:**
 - Specific disciplines (STEM, tourism, history, chemistry) shall be selected for international accreditation;

- Agreements shall be concluded with accreditation agencies such as ACQUIN, AQAS, ASIIN and others;
 - Syllabi and academic curricula shall be revised in accordance with international standards.
- 5. Developing joint academic programmes and academic mobility:**
- 1+1 and 2+2 formats shall be developed with universities in Türkiye, China, Kazakhstan, Italy and Malaysia;
 - Negotiations shall be held on joint-degree programmes under bilateral agreements;
 - Academic mobility systems, as well as conditions for accommodation and study, shall be facilitated for students and academic staff.
- 6. Strengthening the activity on international grants and investment projects:**
- A specialised group or “project office” shall be established for work with grants;
 - Relations shall be established and proposals prepared with organisations such as Erasmus+, Horizon, GIZ, KOICA, UNDP;
 - A mechanism for monitoring projects and submitting reports shall be developed.
- 7. Monitoring and evaluation system:**
- All activities shall be assessed based on KPIs, including the number of international students, international projects, ranking position, and other indicators;
 - Each semester, the progress of programme implementation shall be reviewed, results analysed, and—if necessary—corrective sessions held;
 - All data shall be maintained on the University website and in a unified database.

7	Developing Joint Academic Programmes	1. Organising a joint academic programme in mathematics, semiconductor physics and chemistry with the University of Perlis in Malaysia. 2. Organising a joint academic programme in economics, finance and tourism with the University of Utara in Malaysia.	2025 year July-August 2025 year July-August	Vice-Rector for academic affairs (O.Ahmedov), Vice-Rector for international relations (G. Togayev), head of the international relations department (M. Begamov)

3.6. “SUSTAINABLE INFRASTRUCTURE AND GREEN CAMPUS” PROGRAMME

“Sustainable Infrastructure and Green Campus” is the strategic leadership programme of TerSU in the field of construction, infrastructure and the development of material and technical capacity.

Programme purpose: To establish a modern, sustainable and environmentally safe infrastructure at the University, to strengthen its material and technical capacity, and to implement the “green campus” concept by effectively utilising renewable energy sources and resource-saving technologies.

Main tasks of the Programme: To develop the infrastructure within the University territory, including constructing new buildings and carrying out capital renovation of existing academic and residential facilities; to equip the material and technical base with modern educational and laboratory equipment, energy-efficient systems and safe engineering communications; to ensure the University’s energy independence through solar panels and micro-hydropower plants, reducing electricity costs; to introduce drip irrigation, sensor-based lighting and thermal insulation technologies for saving water and electricity resources; to transform the “Darband” educational practice base into a centre for education and tourism; to organise educational and practical activities aimed at enhancing environmental culture at the University and engaging students in a “green lifestyle”; to plant a large number of trees and ornamental plants within the framework of the “Green Space” initiative; to establish waste management and recycling infrastructure; to develop mechanisms for the efficient use and commercialisation of unused buildings and land plots, thereby achieving financial sustainability.

3.6.1. MAIN COMPONENTS OF THE PROGRAMME

1. Modernisation of Infrastructure:

- Construction and renovation of new academic and residential buildings (an 800-bed student dormitory and registrar’s office buildings);
- Repair and reconstruction of existing buildings (Dormitories No. 1–3–5, academic buildings No. 5–10);
- Improvement of technical infrastructure for production, education, and scientific activity;
- Development of extreme tourism at the “Darband” educational practice base.

2. Strengthening the Material and Technical Base:

- Equipping academic and laboratory buildings with modern devices and equipment;

- Providing energy-efficient, safe, and innovative engineering equipment.

3. Renewable Energy Sources and Energy Efficiency:

- Installation and relocation to secured areas of 500 kW and 790 kW solar photovoltaic panels;
- Use of small-scale hydropower through the construction of a micro-HPP at the “Darband” educational practice base;
- Installation of sensor lighting systems, reflectors, and autonomous lighting devices.

4. Water Conservation and Rational Management:

- Expanding drip irrigation systems across the university campus;
- Installing and monitoring water-saving equipment (sprinklers);
- Organising educational activities and seminars on the rational use of water.

5. Greening and Improvement of the Environmental Environment:

- Planting seedlings within the framework of “Green Space”, increasing the number and area of green zones;
- Further systematising and automating landscaping works across the university campus.

6. Promoting Environmental Culture and Youth Engagement:

- “Green Campus” weeks: environmental campaigns, waste collection, educational and skills-development activities;
- Programmes to enhance environmental literacy among students and staff.

7. Waste Management and Recycling Infrastructure:

- Installing waste bins and constructing waste collection areas, introducing a waste-sorting system;
- Creating eco-friendly infrastructure and implementing measures to reduce industrial waste.

8. Mechanisms for Ensuring Rental and Financial Sustainability:

- Leasing unused land and buildings through “E-auksion”;
- Introducing business models contributing to the financial independence of the university.

3.6.2. EXPECTED OUTCOMES OF THE PROGRAMME

1. Expenditure on electrical energy will be reduced by 30–40%.
2. Energy independence will be ensured through solar panels and a micro-HPP.
3. The 800-bed student dormitory and renovated buildings will be commissioned.

4. Water and energy will be saved through drip irrigation and eco-equipment.
5. A large number of trees will be planted within the framework of “Green Space”, and the environmental conditions will be improved.
6. A waste management system will be introduced.
7. Environmental culture among students and staff will be enhanced.
8. Financial sustainability will be ensured through income generated from unused buildings.
9. The educational practice base for students will be improved.

3.6.3. IMPLEMENTATION MECHANISMS OF THE PROGRAMME

To ensure the implementation of this programme, under the leadership of the Rector of the University, headed by the Vice-Rector for Financial and Economic Affairs, and in cooperation with the chief engineer, chief power engineer, construction technical condition inspector, faculties and departments, the following implementation mechanisms will be introduced step by step:

1. **Design and planning stage:**
 - Separate technical specifications (TS) will be developed for each infrastructural and “green” initiative;
 - design and estimate documents will be prepared and an internal expert review will be organised;
 - sources of financing will be identified, including extra-budgetary funds.
2. **Tendering and contracting works:**
 - Tender procedures will be organised for carrying out construction and equipment installation works;
 - transparent and efficient procurement will be ensured through conducting tenders via electronic public procurement platforms (“E-auksion”);
 - contracts will be concluded with the winning contractor organisations.
3. **Execution and supervision:**
 - Special working groups will be established for each direction (energy, construction, ecology, etc.);
 - technical supervision will be carried out by the University’s chief engineer and chief power engineer;
 - monitoring of compliance with established deadlines and quality standards will be conducted during the implementation process.
4. **Information dissemination and public engagement:**
 - Educational activities, “green weeks”, and campaigns will be organised with the participation of students and staff;
 - analytical and informational updates will be published through the University’s website, social networks, and internal information system.

5. Effectiveness assessment and reporting:

- Quarterly internal reports and analyses will be prepared on the implementation of the programme;
- annually, the overall results will be reviewed at meetings of the Rector and vice-rectors, and necessary revisions and additions will be introduced.

3.6.4. PROGRAMME ROADMAP

1-chart

№	Direction / Activities	Timeline	Responsible
1	Installation of 500 kW solar panels	January-December	Vice-Rector, chief engineer, chief power engineer
2	Relocation of 790 kW panels to a secure area	January-March	Vice-Rector, chief engineer, chief power engineer
3	Construction of a micro-hydropower plant (micro-HPP) and establishment and development of tourism infrastructure at <i>“Darband”</i>	February-December	Vice-Rector, chief engineer, power engineer
4	Completion of the construction of a new 800-bed student dormitory	September-October	Vice-Rector, construction inspector
5	Renovation of student dormitories and academic buildings	March-September	Vice-Rector, chief engineer
6	Introduction of a drip irrigation system (200 sprinklers)	2 nd quarter	Vice-Rector, department of ecology
7	Installation of sensor detectors and reflectors	2-3 quarters	Vice-Rector, chief engineer, power engineer
8	Planting and maintenance of saplings within the <i>“Green Initiative”</i>	1 st quarter	Vice-Rector, youth union, department of ecology
9	<i>“Green Campus”</i> weeks	Each quarter	Youth union, Vice-Rector for spiritual and educational affairs
10	Installation of waste bins and construction of a waste collection point	2 nd quarter	Vice-Rector, chief engineer

OFFICIAL TRANSLATION

11	Seminars and trainings on water and resource saving	1 st quarter	Ecology department, youth union
12	Leasing of vacant buildings via "E-AUCTION"	Regular	Vice-Rector, legal department

3.6.5. PROGRAMME ACTION PLAN

3-chart

No	Name of the measure	Implementation mechanisms	Deadline	Funds / Sources of financing	Responsible executors
I. Priority tasks for material and technical support and the provision of modern equipment for educational laboratories					
1	Installation of 500 kW solar photovoltaic panels for electricity generation	1. Developing and approving the technical specification for the installation of solar photovoltaic panels. 2. Preparing project-estimates documentation. 3. Announcing tender procedures to identify a contractor organisation for the installation of solar photovoltaic panels. 4. Installing and commissioning the 500 kW solar photovoltaic panels.	2025 year February 2025 year March 2025 year April 2025 year December	From extra-budgetary funds	Vice-Rector for Financial and Economic Affairs, chief engineer, power engineer
2	Implementation of the extreme tourism and micro-HPP project at the "Darband Training Practice Base".	1. Developing and approving the technical specification for the construction of a micro-HPS. 2. Preparing project-estimate documentation. 3. Announcing tender procedures to identify a contractor organisation for the implementation of the extreme tourism and micro-HPS project at the "Darband Training Practice Base". 4. Construction and commissioning.	2025 year February 2025 year March 2025 year June 2026 year	From extra-budgetary funds	Vice-Rector for Financial and Economic Affairs, chief engineer, power engineer
3	Carrying out repair works in the Registrar's Office building,	1. Preparing project-estimate documentation.	2025 year March 2025 year	From extra-	Vice-Rector for Financial and Economic Affairs,

	buildings No. 5–10, and student dormitories No. 1–3–5.	2. Announcing tender procedures to identify a contractor organisation. 3. Carrying out and completing building repair works.	April 2025 year May	budgetary funds	chief engineer, power engineer
4	Completion of construction works of the new 800-bed student dormitory located at Termez city, “Sahovat” mahalla, Shimoliy Darvoza Street, house 15.	1. Monitoring compliance of the construction process with the project-estimate documentation. 2. Supplying the student dormitory with the necessary equipment.	2025 year September 2025 year October	From extra- budgetary funds	Vice-Rector for financial and economic affairs, chief engineer, power engineer, inspector for monitoring the technical condition of construction works
5	Providing academic buildings and laboratories with modern equipment and devices.	1. Procuring modern equipment for academic buildings and laboratories through electronic auctions.	2026-2027 years	From extra- budgetary funds	Vice-Rector for Financial and Economic Affairs, chief engineer, power engineer
6	Implementing the construction project of the sanatorium building at the “Darband Training Practice Base”.	1. Developing and approving the technical specification for the construction of the sanatorium. 2. Preparing project-estimate documentation. 3. Announcing tender procedures to identify a contractor organisation for the implementation of the sanatorium construction project. 4. Construction and commissioning.	2027 year	From extra- budgetary funds	Vice-Rector for Financial and Economic Affairs, chief engineer, power engineer
7	Developing a mechanism for the efficient use of vacant land	1. Listing vacant buildings and structures on the “E-Auction” electronic	Regularly in 2025- 2027 years	No funding required	Vice-Rector for Financial and Economic Affairs,

OFFICIAL TRANSLATION

	areas within the university territory.	platform with the purpose of organising paid services.			chief engineer, power engineer
II. Use of Green Energy and Achieving Efficiency					
1	Carrying out dismantling works on the 790 kW solar panels installed on the roofs of university buildings in order to ensure safety;	1. Relocating the 790 kW solar panels installed on the roofs of the buildings to the area allocated to the University at the Northern Water Collection and Distribution Facility located on Tinchlik Makhalla, Shimoliy Darvoza Street, based on technical safety requirements.	2025 year January-March	From extra-budgetary funds	Vice-Rector for Financial and Economic Affairs, chief engineer, power engineer
2	It ensures energy independence, reduce the use of electricity and significantly decrease carbon dioxide emissions into the atmosphere.	1. Installing 500 kW solar panels in order to increase the University's energy efficiency. Constructing a micro-hydropower plant (micro-HPS) on the territory of the "Darband Training and Practice Base".	2025 year I-II- quarters	From extra-budgetary funds	Vice-Rector for Financial and Economic Affairs, chief engineer, power engineer
3	Installation of energy-efficient lighting systems.	1. Installing motion sensor detectors, which will help reduce electricity consumption. Installing 100 heat-reflective panels between radiators and walls.	2025 year II-III- quarters	From extra-budgetary funds	Vice-Rector for Financial and Economic Affairs, chief engineer, power engineer
III. Water-Saving Policy					
1	Introducing a drip-irrigation system - using drip-irrigation systems for watering green areas within the University.	1. 200 water sprinklers will be installed. This measure helps to conserve water resources and improves the growth of plants.	2025 year II-quarter	From extra-budgetary funds	Vice-Rector for Financial and Economic Affairs, chief engineer, power engineer
2	Awareness-raising programmes for university staff and students Special seminars, training sessions and awareness-	1. Special seminars, training sessions and awareness-raising events on water conservation will be conducted among staff and students. These programmes	2025 year I-quarter	No funding required	First Vice-Rector for youth affairs and spiritual-educational work, University

OFFICIAL TRANSLATION

	raising activities on water conservation will be conducted among students. These programmes will provide students with knowledge and skills on the rational use of water.	will provide students with knowledge and skills on the rational use of water.			youth union, ecology department
IV. Greening and waste management					
1	Organising tree planting within the University grounds under the national project "Green Space" and establishing a system for their maintenance.	1. New trees will be planted and landscaping works will be carried out on the university campus, creating a healthy environmental setting for students and teachers.	2025 year I-quarter	From extra-budgetary funds	Vice-Rector for Financial and Economic Affairs, First Vice-Rector for youth affairs and spiritual-educational work, University youth union, ecology department
2	Organising environmental campaigns among students.	1. "Green Campus" Weeks: Once every quarter, "Green Campus" weeks will be organised. 2. During these campaigns, students will actively participate in tree planting, waste collection and environmental awareness activities.	Once in each quarter	No funding required	First Vice-Rector for youth affairs and spiritual-educational work, University youth union, ecology department
3	Ensuring the timely removal of waste within the University territory.	1. A waste collection point will be constructed on the university campus and waste bins will be installed.	2025 year III-quarter	From extra-budgetary funds	Vice-Rector for Financial and Economic Affairs, chief engineer

The Development Strategy of Termez State University for 2025–2027 is a document developed on the basis of a comprehensive innovative approach that meets modern requirements and complies with national and international standards. This strategy aims to transition the university to the “University 3.0” model, envisaging the fundamental improvement of education, science, innovation, cooperation with society, infrastructure, and international standing.

The central concept of the strategy is the “Integrated Strategic Management and Development Model”, which ensures growth and transformation through six strategic institutional programmes. These are:

1. **“Regional Development Locomotive” Programme** – aims to turn TerSU into a decisive scientific and human resource centre in the socio-economic development of Surkhandarya region. For each district, scientific analyses, recommendations on local problems, cluster-based cooperation, start-ups and a regional research model will be introduced. The Regional Research Centre serves as the main driver of this activity.
2. **“Digital and Competency-Based Education” Programme** – envisages the digitalisation of the educational process, increasing efficiency through platforms such as EduVision AI, HEMIS and LMS, and developing modern competencies and practical skills among students. It includes the localisation of foreign educational programmes, the creation of SMART classrooms, and the teaching of specialised subjects in English.
3. **“Scientific Advancement and Innovative Transformation” Programme** – aims to enhance scientific potential, expand doctoral schools, develop research directed at regional issues, create start-ups and spin-off projects, stimulate patenting and licensing processes, and increase the number of Scopus/Web of Science publications. Achieving financial sustainability through the commercialisation of research results is envisaged.
4. **“Student Development Based on Social Activity and Spiritual Immunity” Programme** – focuses on strengthening youth morality, social engagement and civic responsibility. Through student clubs, volunteer activities, spiritual-enlightenment events and participation in public life, the links between the university and society are strengthened.
5. **“Academic Globalisation and Integration into International Rankings” Programme** – strategic measures are developed to ensure that the university achieves a worthy position in rankings such as QS, THE, GreenMetric and others. Particular attention is given to international

OFFICIAL TRANSLATION

joint programmes, 1+1 and 2+2 study formats, professor and student exchange, mobility programmes and attracting international grants.

6. **“Sustainable Infrastructure and Green Campus” Programme** – includes initiatives such as the use of green energy, environmental sustainability, modern laboratories, electronic libraries, residential facilities for researchers, and the creation of a SMART campus environment. It seeks to achieve high efficiency with minimal resource consumption.

Expected overall outcomes of the strategy:

- **TerSU** becomes a regional scientific and educational centre and an intellectual source for solving local problems;
- a new stage is reached in **improving the quality of education and training competitive specialists**;
- scientific activity is commercialized through the **integration of science and practice**, ensuring the financial independence of the university;
- the engagement of students and academic staff increases, strengthening the university’s internal academic environment and its connection with society;
- **international reputation and ranking** positions improve significantly;
- **the attractiveness of the university increases through environmental sustainability and modern infrastructure.**
