

Semester-End Workload Surveys Report

At Termez State University, anonymous online surveys (via Google Forms and the [@TerSU_SurovnomaBot](#) Telegram bot) are typically conducted among students of all levels at the end of each semester. These surveys assess the quality of education and the workload levels created for students.

Scope of the Survey:

- Student evaluation of workload levels for specific subjects;
- Determination of the balance between classroom activities and independent study;
- Identification of excessive or insufficient workloads in the teaching process;
- Program structure and content;
- Quality of teaching methods;
- Availability of educational resources;
- Quality of instruction;
- Student-teacher relationships;
- Cultural and living conditions;
- Volume and relevance of information provided to students;
- Data collection for the improvement of curricula and subject syllabi in future semesters.

Additionally, student satisfaction levels regarding IT departments, administrative and management staff performance, and the condition of the university's classroom facilities are measured. The University monitors the quality of student learning. Results are analyzed and discussed in Scientific Councils, as well as the Academic-

Methodological and Scientific Councils of the faculties. In evaluating the quality of the educational program, the alignment between students' and graduates' actual results and expected outcomes is taken into account.

Survey Questions

1. Did the teacher conduct the lessons in an understandable and logically connected manner?

1. Lessons were always very clear and interconnected — 4
2. Mostly understandable, but there was some ambiguity in certain topics — 3
3. Only a few topics were understandable — 2
4. Often difficult to understand, with much ambiguity — 1
5. Almost incomprehensible, topics were not connected — 0
6. Cannot evaluate — -1

2. Were you encouraged to participate interestingly and actively during the lesson?

1. There was always discussion and activity; I didn't notice the time passing — 4
2. Often interesting; efforts were made to keep students active — 3
3. Sometimes interesting, sometimes boring — 2
4. Rarely interesting; no activity from students — 1
5. Altogether boring; students sit inattentively — 0
6. Did not observe; everyone waits for the lesson to end, conducted just for the sake of it — -1

3. Does the teacher link knowledge with practice? (Real-life examples, cases, practical assignments)

OFFICIAL TRANSLATION

1. Always links with real-life examples; gives assignments that force critical thinking — 4
2. Often links with real-life examples; provides cases and assignments — 3
3. Sometimes links with practice; we find assignments on the Internet — 2
4. Rarely linked to real-life examples; assignments are almost never given — 1
5. I have never seen the information mentioned in class used in real life; topics are not linked to practice — 0
6. Did not pay attention — -1

4. Does the teacher treat students with respect and provide help when needed?

1. Always open and polite; we feel free to ask questions and get answers — 4
2. Mostly good relationship — 3
3. Sometimes good, sometimes cold relationship — 2
4. Often indifferent — 1
5. Negative attitude; difficult to communicate with — 0
6. Cannot say; difficult to understand — -1

5. Do you believe this subject has been beneficial in terms of knowledge and skills?

1. Very beneficial — 4
2. Beneficial — 3
3. Average benefit — 2

- 4. Little benefit — 1
- 5. No benefit at all — 0
- 6. Cannot evaluate; did not understand the subject — -1

6. Do you consider the assessment process for this subject to be fair and transparent? (Exams, ratings, grading)

- 1. Always fully fair and transparent — 4
- 2. Mostly fair — 3
- 3. Questions arose in some cases; I have doubts — 2
- 4. Injustice was felt in many cases — 1
- 5. Not fair at all — 0
- 6. Nepotism and personal interests are involved — -1

7. Volume of weekly classroom activities (lectures, practicals, seminars):

- 1. Very low — 4; 2) Sufficient — 3; 3) Average — 2; 4) High — 1; 5) Very high — 0

8. Difficulty level of the lessons:

- 1. Very easy — 4; 2) Easy — 3; 3) Average — 2; 4) Difficult — 1; 5) Very difficult — 0

9. Volume of assignments allocated for independent study:

- 1. Very low — 3; 2) Sufficient — 2; 3) Excessively high — 1

10. Intermediate and final control assignments:

- 1. Proportional to the workload — 3; 2) Slightly heavy — 2; 3) Very heavy — 1

11. Were the assessment criteria clear?

OFFICIAL TRANSLATION

1. Yes — 3; 2) Partially — 2; 3) No — 1

12. Overall, the workload for the subject is:

1. Very optimal — 3; 2) Satisfactory — 2; 3) Needs to be reviewed — 1

13. Suggestions and comments: (Open-ended question)

This image shows a full page of blank white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page, providing a template for writing or drawing. There are no margins, text, or other markings on the page.

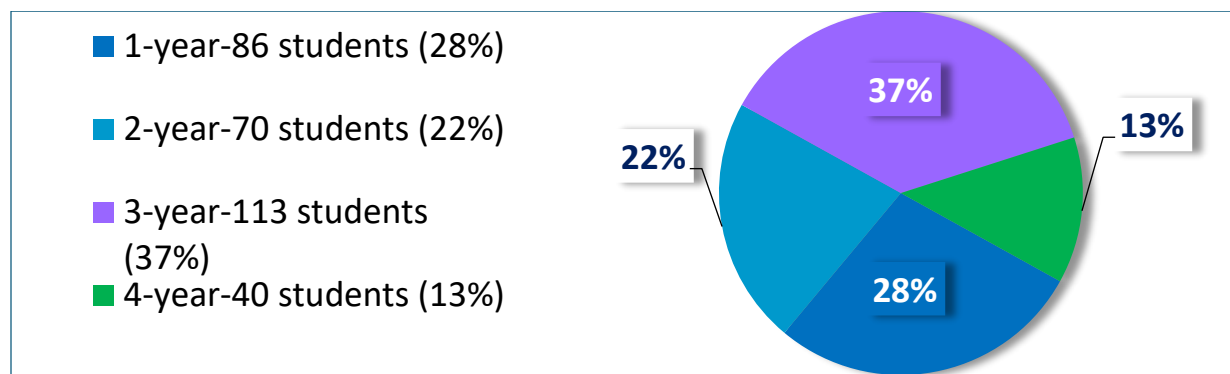

Analysis and Application

The results of this survey analysis are used extensively in department and faculty meetings for reviewing curricula and syllabi, and for providing students with convenience and quality education. Furthermore, the survey results are utilized in accreditation, quality of education monitoring, and internal evaluation for international rankings.

Example Case: Faculty of Chemistry Survey processes are organized not only for all students generally but also specifically by faculty. For instance, the results of a survey conducted on January 13, 2024, regarding the satisfaction level of students at the Faculty of Chemistry with the socio-spiritual environment and the quality of the educational-pedagogical process are as follows:

Number of students involved in the survey: 309

Participant Activity: 309 students (60% of the total) studying in 4 undergraduate fields of the full-time education department participated. Of these, 235 (76%) are male and 74 (24%) are female.

OFFICIAL TRANSLATION

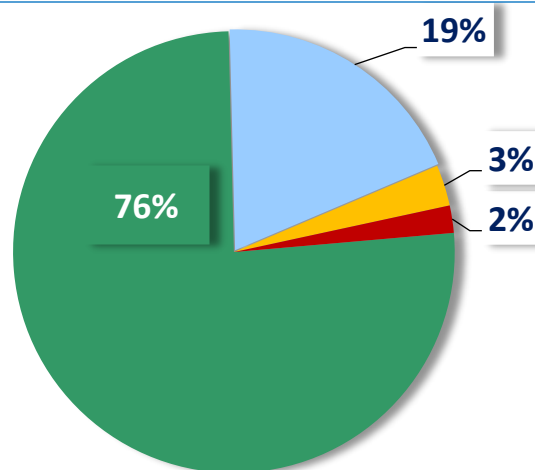

1. Are you satisfied with the faculty's teaching process?

■ "Yes, I have acquired sufficient knowledge and skills. (234 people - 76%)"

■ Yes, but not completely. (60 people-19%)

■ No, I did not receive sufficient knowledge. (9 people - 3%)

■ No, I am not satisfied at all. (6 people - 2%)

2. How would you evaluate the work of the Dean's office?

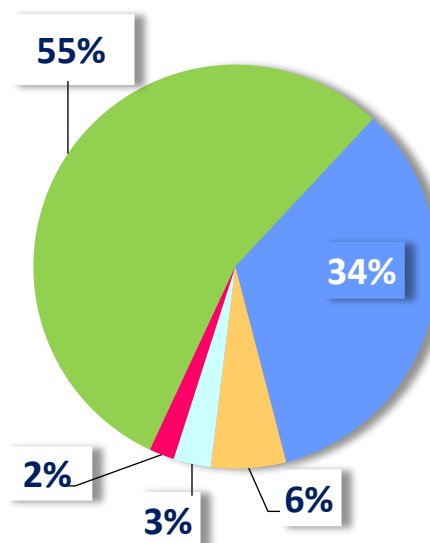

■ Excellent; they support the student and resolve issues quickly when needed. (171 people - 55%)

■ Good; they listen to the student, and issues can be resolved. (104 people - 34%)

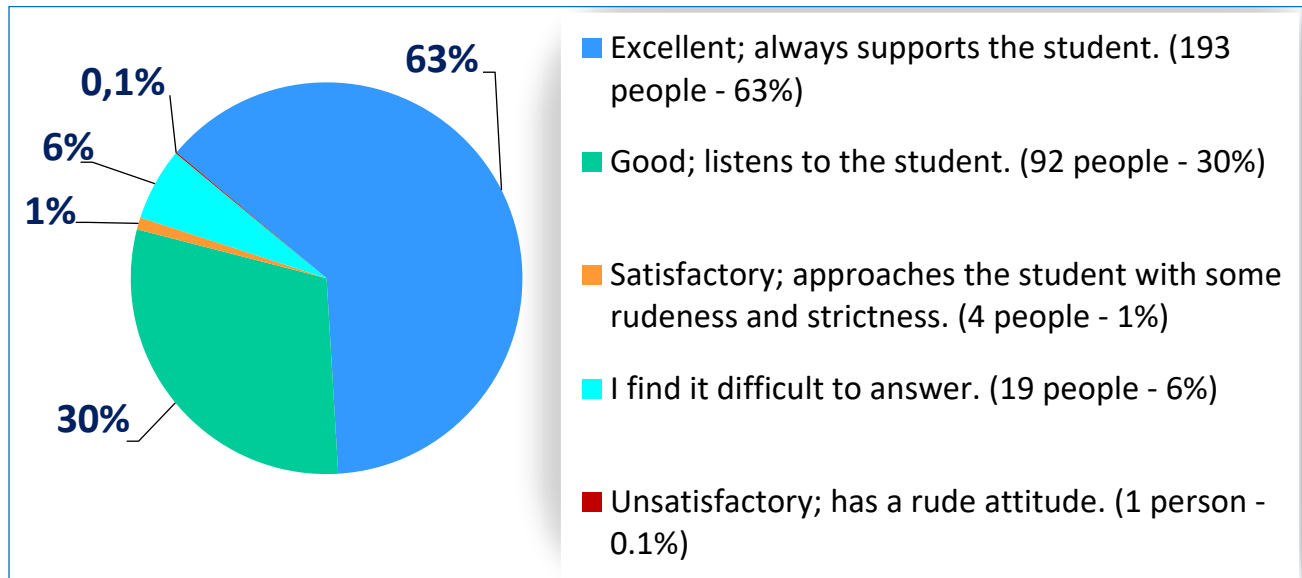

■ Satisfactory; they approach students with some rudeness and strictness. (18 people - 6%)

■ I find it difficult to answer. (9 people - 3%)

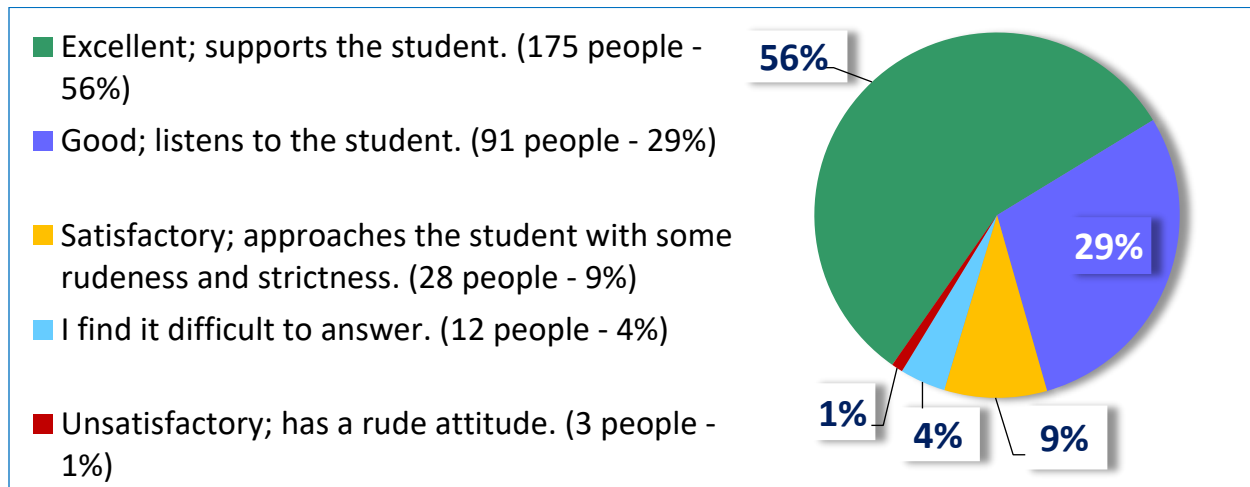

■ Unsatisfactory; they have a rude attitude, and you cannot get your work done through the Dean's office. (6 people - 2%)

3. What is your opinion of your Faculty Dean?

4. What is your opinion of the Deputy Dean for Academic Affairs?

5. What is your opinion of the Head of the Department? Write the full name of the Head of the Department.

Note: Out of the 309 students who participated in the survey, 1 person rated unsatisfactory, 8 people stated they don't know them, and 7 people did not record their opinions on this question. Positive feedback was provided by 293 students.

6. Evaluation of Competent Professors

Question: Write the full name, subject, and position of the professor-teacher whose lessons you are satisfied with (who is worthy of their profession).

Positive Recognition: 27 students (9%) acknowledged all professors/teachers.

Negative Feedback: 12 students (4%) stated that no such teacher exists.

No Opinion: 5 students (2%) left no comment.

7. Evaluation of Incompetent Professors

Question: Write the full name, subject, and position of the professor-teacher whose lessons you are dissatisfied with (who is unfit for their profession).

Overall Satisfaction: 267 students (86%) noted that there are no such teachers or that all are good.

No Opinion: 33 students (11%) left no comment.

Specific Objections: 9 students (3%) left critical remarks such as:

"It's useless anyway."

"There are many of them."

"I find it difficult to answer."

"They all just come to pass the time; they don't know the lesson or the subject."

8. Fairness in Grading

Question: Which professors/teachers and in which subjects are unfair in their assessments? Write the teacher's full name.

Fairness Confirmed: 217 students (70%) stated that there are no such teachers or that they are graded fairly.

No Opinion: 32 students (10%) did not leave a comment.

Uncertain: 15 students (0.5%) noted, "I don't know."

9. Preferences for Teaching Methods

Question: How would you like the training sessions to be conducted?

Students provided the following suggestions and feedback:

"Lessons should be taught more by teachers who have practical experience in the field."

"For upper-level students, the number of practical training sessions needs to be increased."

10. Practical Internships

Question: How are the internships (practicums) conducted? What did you learn from the internship?

Key Insights for the Report

Teaching Quality: The majority of the Faculty of Chemistry (86%) finds their teaching staff competent. This aligns with your academic pair standard (1 pair = 2 hours), suggesting that the time is generally used effectively.

Grading Integrity: 70% confidence in grading fairness is a strong metric for the Academic-Methodological Council.

Practical Bias: There is a clear demand from students for more real-world application and practitioners in the classroom, especially as they progress to higher levels of study.

Student workload surveys conducted at the end of the semester play a vital role in enhancing the quality of education in higher education institutions, organizing the educational process effectively, and determining the optimal academic load assigned to students. Through these surveys, classroom sessions, independent study assignments, the grading system, and the overall workload level per subject are analyzed from the student's perspective.

The provided survey samples serve to collect student opinions in a systematic and clear format. The use of both closed-ended and open-ended questions allows for the identification of not only quantitative indicators but also for the consideration of students' suggestions and remarks. This serves as a foundation for improving curricula, subject syllabi, and assessment criteria.

The implementation of end-of-semester workload surveys increases transparency in the teaching process, activates student

OFFICIAL TRANSLATION

participation, and strengthens the feedback loop between the teacher and the student.

In conclusion, this process serves as an effective tool for the continuous monitoring of educational quality at the university, balancing the academic load placed on students, and adapting to modern educational requirements.

I hereby testify that the translation is faithful to the original
