**CABINET OF MINISTERS OF THE REPUBLIC OF UZBEKISTAN
DECISION
ON MEASURES TO IMPROVE THE SYSTEM RELATED TO THE
ORGANIZATION OF THE EDUCATIONAL PROCESS IN HIGHER
EDUCATION INSTITUTIONS**

In order to ensure the implementation of the tasks set out in the Decrees of the President of the Republic of Uzbekistan “ [On approval of the Concept for the Development of the Higher Education System of the Republic of Uzbekistan until 2030](#) ” dated October 8, 2019 No. PF-5847 and “ [On the State Program for the Implementation of the Strategy of Actions in Five Priority Areas of Development of the Republic of Uzbekistan in 2017-2021 in the “Year of Development of Science, Education and the Digital Economy”](#) ” dated March 2, 2020 No. PF-5953, the Cabinet of Ministers decides:

1. Starting from the 2020/2021 academic year, a procedure for gradually transitioning the educational process to a credit-module system should be introduced in higher educational institutions of the republic.

2. To approve the Regulation on the procedure for introducing the credit-module system into the educational process in higher educational institutions in accordance with [Appendix 1](#) .

3. Ministry of Higher and Secondary Specialized Education of the Republic of Uzbekistan:

together with ministries and departments with higher education institutions in their system, ensure the improvement of qualification requirements, curricula and subject programs of undergraduate and graduate programs in which the credit-module system has been introduced into the educational process within a month;

Together with the Republican Council of Higher Education, develop and approve within two weeks sample documents related to the organizational issues of introducing the credit-module system into the educational process in higher educational institutions.

4. In order to increase the scientific potential of higher education institutions and provide them with highly qualified professors and teachers, the proposals of the Ministry of Higher and Secondary Specialized Education

of the Republic of Uzbekistan and the Republican Council of Higher Education to implement the following measures at the expense of extra-budgetary funds from paid-contract training remaining after the implementation of primary expenses are approved:

a) based on the decision of the council of the higher education institution:

internships and advanced training of professors and teachers at prestigious foreign higher education organizations and scientific institutions, with the formalization of a contract providing for 3 years of work at a higher education institution;

To cover expenses related to training teachers based on doctoral programs at prestigious foreign higher education institutions and research institutions, by formalizing a contract providing for 5 years of employment at a higher education institution;

b) to strengthen the material and technical base of state educational and research institutions operating under the higher educational institution, allocate the necessary funds for construction, current and capital repairs, reconstruction and equipment.

5. It is determined that, in order to further expand the academic independence of higher education institutions, starting from January 1, 2021:

Hourly remuneration for the work of professors and teachers of higher educational institutions conducting training in technical schools under higher educational institutions is carried out in the same amount as hourly remuneration for teaching students of higher educational institutions;

When organizing the educational process, weekly school days are determined independently by higher education institutions;

The chairmen of the final state attestation commissions established in higher educational institutions are approved by order of the rector (branch director) of the relevant higher educational institution.

6. To make additions in accordance with [Appendix 2 to the Resolution](#) of the Cabinet of Ministers No. 967 dated December 3, 2019 "On the gradual transition of higher education institutions to a self-financing system."

7. The Ministry of Higher and Secondary Specialized Education of the Republic of Uzbekistan, together with interested ministries and departments, shall bring the regulatory legal acts they have adopted into line with this resolution within one month.

8. Control over the implementation of this resolution shall be entrusted to the Deputy Prime Minister of the Republic of Uzbekistan for Social Development BA Musayev and the Minister of Higher and Secondary Specialized Education of the Republic of Uzbekistan IU Madjidov.

Prime Minister of the Republic of Uzbekistan A. ARIPOV

Tashkent city,
December 31, 2020,
Issue 824

ANNEX 1 [to the Resolution](#) of the Cabinet of Ministers No. 824 dated
December 31, 2020

On the procedure for introducing the credit-module system into the educational process in higher educational institutions

REGULATION

Chapter 1. General provisions

1. This Regulation establishes the procedure for introducing a credit-module system of education based on the European Credit Transfer and Accumulation System (ECTS) into the educational process in higher education institutions.

This Regulation does not apply to higher educational institutions under the Ministry of Justice of the Republic of Uzbekistan, the Ministry of Health, higher military educational institutions, Al-Khwarizmi University, non-governmental and foreign higher educational organizations operating in the territory of the Republic of Uzbekistan.

2. The gradual introduction of the credit-module system into the educational process in higher education institutions will be carried out in accordance with the scheme provided in the appendix to these Regulations.

3. Information on the organizational issues of introducing the credit-module system into the educational process, including the curriculum, subject catalog, documents related to ensuring academic mobility, recognition and transfer of credits, and forms of the diploma supplement, as well as indicators for determining the level of knowledge of the student during academic mobility and samples of other necessary documents, shall be developed and approved by the Ministry of Higher and Secondary Specialized Education of the Republic of Uzbekistan jointly with the Republican Council of Higher Education.

Chapter 2. Basic concepts

4. The following basic concepts are used in this Regulation:

GPA (Grade Point Average) is the average of a student's grades in a program, calculated using the following formula:

$$K_1 * U_1 + K_2 * U_2 + K_3 * U_3 \dots + K_n * U_n$$

$$\text{GPA} = \frac{\text{K}_1 * \text{U}_1 + \text{K}_2 * \text{U}_2 + \text{K}_3 * \text{U}_3 \dots + \text{K}_n * \text{U}_n}{\text{K}_1 + \text{K}_2 + \text{K}_3 \dots + \text{K}_n}, \quad \text{in this:}$$

K — the number of credits allocated to each subject/module;

U is the grade a student earns in each subject/module;

academic mobility - the movement of students from a higher education institution to another higher education institution within the republic or abroad for a certain period of time;

mobility program - an academic mobility program organized on the basis of a mutual education agreement between two or more higher education institutions;

Credit - a unit of measurement of the learning load mastered by a student in a particular subject based on the results of his/her education. Credits can be expressed in whole or fractional numbers, as required;

higher education institution - an institution that issues documents on education and qualifications, taking into account the recognition of a specified number of credits;

credit granting - the process of officially granting credits to students or other learners based on the results of education achieved in accordance with the requirements for a qualification or its individual parts;

Credit transfer - the transfer and recognition of credits earned under an educational program at one higher education institution to another higher education institution in order to ensure academic mobility of students;

credit accumulation — the accumulation of credit units awarded as a result of mastering educational elements and achieving other achievements;

A student's personal learning trajectory is a path (route) chosen by the student that allows him or her to sequentially accumulate knowledge and acquire the desired set of competencies. A learning trajectory is structured using institutional documents and guidelines, and different learning trajectories can ultimately lead to the same qualification;

educational program - a set of information resources and educational and methodological instructions necessary for the organization and implementation of education, including the main characteristics of education (volume, content, planned results), organizational and

pedagogical conditions, general requirements for subject programs, as well as the organization and implementation of education, intended for the implementation of the educational process in a bachelor's degree or master's degree specialty;

educational program catalog - information about a description of a higher education institution, access to the credit-module system, available undergraduate and graduate programs, services and resources, academic programs, and descriptions of specific educational program elements;

learning outcomes - a description of the skills and abilities that a student has acquired and demonstrated upon successful completion of the learning process, reflecting the level of competence acquired by the student and confirmed by assessment;

Study load - the number of hours required by a student to achieve the expected learning outcomes based on the implementation of all types of educational activities - lectures, practical classes, seminars, laboratory work, course project (work), internships and independent work;

registration service - services that involve the formation of a database of educational process information for professors, staff and students using educational process management information systems and software products, as well as the organization of all types of registration of all student learning outcomes, monitoring of their knowledge and calculating their academic rating;

educational elements - a type of teaching that is part of the educational program and contributes to the achievement of learning outcomes and the acquisition of knowledge specified in the educational program;

Transcript - a document of a prescribed form containing a list of subjects with an indication of the credits and grades acquired during the relevant period of study in letters and numbers.

Chapter 3. Curriculum structure

5. The structure of the educational program for the academic year consists of educational elements consisting of one or more modules and is approved by the council of the higher education institution. The educational program may consist of classroom lessons, research projects, independent learning, industrial practice and other educational elements.

6. The structure of the educational program is developed taking into account the fact that 60 credits correspond to one academic year, indicating the learning outcomes (at least 6 indicators) corresponding to each educational element. The number of credits in the educational program is indicated based on the training load.

7. The requirements for students to successfully complete the educational program and acquire the required qualifications are clearly defined. The rules for completion can be expressed in the number of credits or in the range of credits for different stages of training in the selected educational program.

8. To assist students in successfully completing the educational program, relevant departments and employees of the higher education institution, including the department or division responsible for managing the credit system of education, and the group mentor, provide advice and explanations. As part of the advice, students are explained the opportunities for recognizing their achievements and experience as a result of their education.

9. The higher education institution must post and publish detailed information about the educational program catalog and teaching conditions, as well as current information, on the website of the higher education institution in a convenient downloadable format at least one month before the start of the academic year.

10. Teachers responsible for implementing the curriculum and its elements should ensure consistency between the learning outcomes specified in the curriculum and the teaching and assessment process. This constructive connection between learning outcomes, teaching and assessment is an important requirement for educational programs.

Faculty members responsible for implementing educational elements must ensure a balance between the outcomes outlined in the curriculum and the teaching and assessment processes.

Chapter 4. Planning, monitoring and ensuring the quality of education

11. The educational process includes a set of educational and control measures. Educational measures include the organization of all types of classroom exercises, practice and independent work. Control measures include the assimilation of knowledge by students in the relevant subjects of the curriculum and the assessment of their results.

12. The educational process is planned taking into account educational standards, based on a student-centered approach in the form of an open dialogue between students, employers, teachers and administration. In this process, the needs and wishes of employers and students are discussed. All interested parties can be involved in the discussion on the creation and development of the educational program. Student representatives can participate in such discussions through the right to vote.

13. Planning the educational process consists of the following stages:

develop a model curriculum and a catalog of subjects based on advanced foreign educational experience, taking into account the reforms being implemented in the sectors of the republic's economy, the requirements of personnel consumers, and national values, and additionally form a catalog of elective subjects, and develop model subject programs based on the catalog of subjects based on local and foreign new generation literature;

development of a working program (syllabus) of subjects;

Formation of an individual educational trajectory for each student under the supervision of the educational and methodological department (management) and the dean of the faculty, with the help of a group coach, in accordance with the curriculum and the list of elective subjects;

creating working curricula;

creating a learning process schedule;

Creating a schedule of classes for academic groups.

14. The number of credits that a student must accumulate during the semester includes the mandatory and elective subjects specified in the curriculum. The composition of mandatory subjects and the number of credits allocated for their study are determined by the base higher education institution. The composition of elective subjects and the number of credits allocated for their study are determined independently by the higher education institution. Students can independently choose subjects within the framework of elective subjects specified in their personal educational trajectory.

15. The duration of the academic year is up to 36 weeks, of which 30 weeks are allocated to the academic period, 2 weeks to register for the selection of subjects, and 4 weeks to take certifications. The duration of the academic year may be determined differently by the decision of the council of the higher education institution in accordance with the educational process schedule.

In the credit-module system, 1 credit is equal to an average of 25-30 academic hours of study load. That is, in order for a student to accumulate the corresponding credits in a particular subject, he must master a certain amount of study load. The study load is divided into 40-50% classroom hours and 50-60% independent work hours for bachelor's degrees, 30-40% classroom hours and 60-70% independent work hours for master's degrees (excluding internships and graduation projects). The amount of credit in hours and the amount of study load are determined by the council of the higher education institution and are transparently posted on the website of the higher education institution.

In undergraduate and graduate programs, students are typically required to earn 30 credits per semester and 60 credits per academic year. The number of credits a student must complete during a semester includes the required and elective subjects specified in the curriculum. When forming their own personal educational trajectory, students should consider completing 30 credits per semester, which must include the required subjects in the standard curriculum.

A student must earn 180 credits for a bachelor's degree with a minimum duration of 3 years, 240 credits for a minimum duration of 4 years, 60 credits for a master's degree with a minimum duration of 1 year, and 120 credits for a minimum duration of 2 years.

16. Monitoring of the educational process is carried out to assess the achievement of the established learning outcomes, the nominal volume of work, and their validity and relevance.

17. Ensuring the effectiveness of the quality of education includes the processes of ensuring compliance of the educational program of undergraduate and graduate programs implemented by a higher education institution with the descriptions and requirements of authorized organizations.

In order to improve the quality of education and create competition among professors and teachers, in accordance with the decision of the council of the higher education institution, students are given the opportunity to choose professors and teachers within the subject. In this case, students register online through the education management information system portal at the beginning of the academic semester to participate in the training of their chosen professor for a period of 1 week.

18. At the initiative of students with academic debts, a summer semester is organized by a higher education institution, usually during the holidays, on a paid basis, in order to transfer existing academic debts.

The duration of the summer semester is determined by undergraduate majors, graduate majors, and courses based on the academic calendar.

The summer semester is organized based on the following regulations:

the student expresses his/her desire to study in the summer semester to the educational and methodological department (administration) of the higher education institution before the start of the summer semester;

The higher education institution will create a class schedule for these students for the summer semester, and the student will be enrolled in classes after paying the tuition fee;

The summer semester will be organized according to the principle of transparent assessment of student knowledge based on the current assessment system.

Faculty members hired for the summer semester are paid on an hourly basis.

Chapter 5. Academic mobility and credit recognition

19. The following documents are used to ensure academic mobility and to recognize student credits by a higher education institution:

catalog of sciences;

a training agreement, reference letter and certificate in the prescribed form.

These documents reflect the results of learning and are the basis for the recognition and transfer of credits to a higher education institution.

20. The number of credits accumulated by a student under the educational program of a higher education institution is considered equal to the number of credits acquired in accordance with the established learning outcomes at another higher education institution.

21. The student, based on the recommendation of the sending higher education institution, submits the necessary documents to the receiving higher education institution for the implementation of academic mobility. The sending higher education institution provides the student with a transcript in the prescribed format.

22. The elements of education that a student is expected to master during the academic mobility period cannot be changed without the consent and agreement of the sending higher education institution. The learning outcomes specified in the educational programs of partner higher education institutions, centers and organizations abroad must correspond to or complement the learning outcomes of the educational program of the sending higher education institution. During the mobility period, the academic year indicators are analyzed and the recognition of credits is determined in accordance with these Regulations.

23. The set of learning elements to be acquired by the student at the receiving higher education institution and their integration into the educational program of the higher education institution should be clearly specified in the learning agreement. The number of credits acquired at the receiving higher education institution should be proportional to the period of study abroad (3-6 months or 1-3 years). The credits acquired by the student (in full or in part) during the mobility period are recognized by the sending higher education institution. Upon the student's return to the sending higher education institution, based on the number of credits accumulated during the

mobility period, his/her transfer to the next course or retention in the course is determined in accordance with the applicable procedures.

24. The higher education institution registers the student in accordance with the established form to master the educational elements planned under the academic mobility program and undertakes to ensure the opportunity to master these elements during the mobility period.

25. It is not considered necessary to conclude educational agreements for academic mobility within the framework of educational programs developed jointly with partner universities, centers and organizations.

26. In accordance with the Agreement on Education, indicators determining the level of knowledge of a student during academic mobility are adopted based on the conversion table of the assessment system of higher education institutions to other assessment systems.

27. The internship agreement is signed by the student, the higher education institution, and the host organization.

28. In order to ensure the transparency and confirmation of the knowledge acquired by the student during the internship, a certificate of completion of the internship is issued by the receiving institution.

Chapter 6. Evaluation, conversion of evaluations

29. Students are assessed within the educational program, regardless of the form of training, based on the assessment criteria established by the Ministry of Higher and Secondary Specialized Education of the Republic of Uzbekistan.

30. Credits are awarded to students who are assessed within the framework of the assessment procedure and positive grades established in the subject program (syllabus). Credits are not awarded if the student fails to achieve the specified learning outcomes.

31. Assessment methods include written, oral, practical work, projects, portfolios, and tests that reflect and confirm a student's achievements within a subject or module. The assessment criteria must reflect the achievement of learning outcomes.

32. Transfer of credits is carried out on the basis of comparing the conversion table of the assessment system to other assessment systems at a higher education institution with a similar table compiled at another higher education institution.

Chapter 7. Organization of registration service in the credit module system

33. Registration services are organized to separately conduct educational and student assessment processes, automatically manage

academic information about students electronically, and conduct final examinations.

34. The registration service is aimed at helping the student achieve a high level of knowledge, skills and qualifications in his chosen specialty and includes the following functions:

- drawing up a schedule for the educational process and monitoring its timely implementation;

- monitoring student registration for courses;

- formation of academic groups;

- monitoring the conduct of intermediate, final assessments and final state certification;

- creating and regularly updating a database;

- archiving of student data;

- creating transcript forms and entering student information;

- maintaining statistics on the student contingent.

35. Registration services are carried out within the educational and methodological department (department). Higher educational institutions may establish a department for managing the credit system of education within the framework of budgetary funds or, depending on their financial capabilities, at the expense of extra-budgetary funds.

36. The registration service registers students for subjects in accordance with the established schedule and forms the student's personal educational trajectory. The student's personal educational trajectory is compiled by them independently with the help of a group coach for the general period of study based on a sample curriculum and a catalog of elective subjects. Changes or additions may be made to the personal educational trajectory before each academic year.

37. Based on the personal educational trajectory of students, the registration service forms academic groups and, in case of insufficient enrollment in any subject, informs students about the need to change the personal educational trajectory. After the formation of the student's personal educational trajectory, the registration service provides information about academic groups to the educational and methodological department (administration) of the higher educational institution to draw up a lesson schedule.

38. The Registrar's Office will determine the date and time for each student to register (usually based on the student's achievement of a sufficient GPA and payment of contract fees). Registration of first-year students begins after they have completed academic and career orientation activities.

39. Students may change their chosen subjects within the first week of each semester.

40. The registration process for first-year students is carried out in the following order:

The group coach receives the logins and passwords of the students in the assigned group from the registration service, explains the learning process to the student, introduces the educational program, provides a login and password, and teaches how to use the student portal;

The student participates in introductory presentations on subjects conducted by professors and teachers, becomes familiar with compulsory and elective subjects, and registers for subjects through the student portal in the education management system;

The student determines the class schedule and attends classes through the portal in the learning management system.

Chapter 8. Mechanisms for Expelling, Reinstating, and Transferring Students from Course to Course

41. A student who misses 25% or more of the classroom hours allocated to a subject without a valid reason is excluded from this subject, is not included in the final examination, and is considered not to have acquired the relevant credits in this subject. A student who is not included in the final examination, or who has not received an unsatisfactory grade in this examination, is considered to be in academic debt.

Students with academic debts have the right to retake unlearned subjects at their own expense after making a payment based on the base payment-contract amount, corresponding to the number of unlearned credits in the relevant subjects, during the vacation or during subsequent semesters.

42. Transferring a student from one course to another is carried out taking into account his/her GPA. When transferring students from one course to another, the university has the right to independently determine the GPA indicator. In this case, the GPA indicator must be in the range of 2.4 - 3.0. A student who fails to score a passing GPA score is left in the appropriate course for re-study. Students who have academic debts according to the results of the semester and academic year are not excluded from studying. Students who remain from one course to another master only the subjects for which they are in debt and pay the contractual funds accordingly. The number of re-studying in one course under the contract is not limited. The total period of study is set at 8 years after admission to 1 course for a bachelor's degree, and 4 years after admission to 1 course for a master's degree.

43. The student has the right to resume and transfer studies in accordance with the legislative acts of the Republic of Uzbekistan. The

amount of credits acquired by the student before the expulsion is taken into account in full by the higher educational institution.

Chapter 9. Final provisions

44. The cost of education at a higher educational institution is determined in accordance with the current legislative acts of the Republic of Uzbekistan.

45. The cost of re-training in subjects is determined by the higher educational institution based on the contract amount for the entire academic year. The payment mechanism for re-training is determined by the higher educational institution based on the calculation of the cost of one credit. The cost of one credit is determined by dividing the base contract amount paid for training during the academic year by the number of planned credits.

46. If a student successfully completes the educational program of a higher education institution, he or she will be awarded a diploma confirming his or her academic degree.

ANNEX to the Regulation on the introduction of the credit-module system into the educational process in higher educational institutions

Phased introduction of the credit-module system into the educational process in higher education institutions

SCHEME

Stages	Events	Those responsible for execution	Deadlines
Stage 1	To organize the learning process within the framework of the educational program, do the following: 1. Adaptation and approval of curricula and subject programs to world standards; 2. Distribution of credits for each subject; 3. Formation and publication of a catalog of disciplines.	Higher education institution	Before the start of the school year
Stage 2			

OFFICIAL TRANSLATION

	Admission of students (bachelor's and master's degrees) to the 1st year of study according to the established procedure under the credit system of education.	Higher education institution	Before the start of the school year
Stage 3	Defining the Student's personal learning trajectory, chosen by the Student, to enable him/her to sequentially accumulate knowledge and acquire the desired set of competencies	Higher education institution	Starting from the 2020/2021 academic year until the start of each academic year
Stage 4	To organize mobility, do the following: 1. Conclusion of agreements with partner organizations on the mobility of teaching staff; 2. Establish a mobility window in the educational trajectory of master's students; 3. Development and implementation of mobility programs for undergraduate students.	Higher education institution, relevant ministries and departments	Starting from the 2020/2021 academic year, always
Stage 5	To ensure the quality of education, do the following: 1. Concluding an agreement with authorized organizations on the accreditation of the credit-module system of education; 2. Accreditation of educational credit systems.	Higher education institution, relevant ministries and departments	Always starting from the 2021/2022 academic year

OFFICIAL TRANSLATION

Stage 6	Issuance of an internationally recognized higher education diploma to confirm the results of education.	Higher education institution	At the end of the educational program from 2022
---------	---	------------------------------	---

ANNEX 2 [to the Resolution](#) of the Cabinet of Ministers No. 824 dated December 31, 2020

Included in the Resolution of the Cabinet of Ministers No. 967 of December 3, 2019 "On the gradual transition of higher education institutions to a self-financing system"

ADDITIONS

1. Add the following paragraph [to paragraph 4](#) :

"Introducing additional new positions, structural divisions, and staff units into the organizational structure of a higher education institution by decision of the council."

2. Add the following paragraphs [to paragraph 8](#) :

"Higher educational institutions transferred to a self-financing system shall fully accumulate and spend the proceeds from the sale of fixed assets and tangible assets (except for buildings and structures and educational and scientific laboratory equipment) in their own treasury account under their development fund;

independently determines the share of all funds received by the Fund for the Development of Higher Education Institutions transferred to the self-financing system to be spent on strengthening the material and technical base, social protection and material incentives for its employees, and other measures related to the effective organization of activities;

Higher education institutions that have transitioned to a self-financing system determine the amount of remuneration for the labor of foreign highly qualified teachers and specialists involved in the educational process based on market conditions (in an amount not less than the amounts established by law);

Starting from January 1, 2021, 1 percent of the proceeds from the rental of real estate of higher educational institutions transferred to the self-financing system will be directed to state property rental centers under the territorial divisions of the State Assets Management Agency of the Republic of Uzbekistan, and the rest, after deducting the payment made to the operator of the electronic trading platform, will be directed to the development fund of this higher educational institution;

OFFICIAL TRANSLATION

Higher education institutions transferred to a self-financing system are considered state organizations that receive budget funds and have the status of legal entities.
