1. Executive Summary

This report analyzes Termez State University's (TERSU) portfolio of active external partnerships with foreign institutions, drawing on the University's official register, "5-shakl" — the List of Contracts, Agreements, Memoranda and Protocols concluded with foreign partners and currently IN FORCE, as of 1 October 2025, certified by the Vice-Rector for International Relations, G. Tog'ayev. Expired and superseded instruments were excluded from the source register by design and are therefore not covered here.

As of the reporting date, TERSU maintains 113 active international partnership instruments with 25 countries and international entities across five geographic regions. The portfolio is heavily weighted toward the CIS and wider Eurasian space (51 agreements, 45% of the total), reflecting deep, long-standing ties with Russian, Belarusian, Kazakh and Tajik universities, alongside a fast-growing footprint in Turkiye, China, Malaysia and Indonesia. The pace of new agreement signing has accelerated markedly, from a single agreement in 2018 to 32 in 2024 alone.

The register is a partnership instrument log; it does not contain a facilities inventory (laboratories, dormitories, joint research infrastructure, or campus assets). Section 11 addresses this scope gap directly and identifies which partnerships carry facilities-relevant implications, while recommending a dedicated facilities audit to complement this analysis.

Two findings merit priority attention from the Rectorate and the Department of International Relations: first, 10 agreements have already passed their estimated validity term as of September 2026 based on the durations stated in the register, and a further 47 are due to expire by the end of 2027 — together representing over 42% of the active portfolio requiring near-term renewal decisions (Section 9). Second, several partners (Vladimir State University, Universiti Utara Malaysia, and Universitas Pendidikan Indonesia among them)

are governed by three or more concurrent instruments, suggesting an opportunity to consolidate into single framework agreements for clearer governance (Section 8).

2. Purpose, Scope and Data Source

This report was prepared at the request of the University to provide a structured, analytical view of TERSU's external partnership base and to assess, on a best-efforts basis, its intersection with institutional facilities and infrastructure.

2.1 Source document

The sole data source is the uploaded PDF register titled "5-shakl" ("Form 5"): List of Contracts, Agreements, Memoranda and Protocols concluded with foreign partners (higher education institutions, organizations, international organizations, foundations, and institutions) and currently in force, as of 1 October 2025. The register is signed by the Vice-Rector for International Relations, G. Tog'ayev, and lists, for each instrument: a sequence number; the name of the foreign partner; its country; the full name of the document; the date and place of signing; the stated validity period; and the host institution (Termez State University in every row).

2.2 Scope of this report

- External Partnerships: full coverage. Every active instrument in the register (113 in total) has been transcribed, translated into English, categorized, and analyzed by country, region, document type, signing trend, repeat-partner depth, and validity/renewal status.
- Facilities: partial coverage by necessity. The source register contains no inventory of physical or research facilities. Section 11 states this limitation explicitly and draws only the inferences that the partnership data can reasonably support.

All institution names, document types, and countries were translated from the Uzbek-language original into English for this report. Where an institution's commonly used English name differs from a literal translation (for example, "Beijing davlat universiteti"), the more literal rendering has been retained and flagged in Appendix B so that the University's International Relations Department can verify against the original agreement text.

3. Methodology and Data Quality Notes

The register was transcribed row by row into a structured dataset and validated by re-counting against the source PDF. The following data quality observations are reported transparently rather than silently corrected:

- Sequence gaps: the source register's own numbering jumps from row 98 to row 100 (row 99 is a stray, incomplete fragment reading only "Tatarist" with no accompanying data) and from row 109 to row 111 (row 110 does not appear in the source at all). Both gaps are preserved as in the original; the 113 agreements analyzed here are the fully-populated rows only.
- One undated entry: row 21 (Belarusian National Technical University) has no signing date in the source and is therefore excluded from the year-trend analysis in Section 5, though it is retained in all other counts.
- One irregular date format: row 5 (Tomsk Polytechnic University) is recorded in the source as "01.22.2022-yil", which is not a valid day.month.year date; it has been interpreted as 22 January 2022 and flagged in Appendix B.
- Composite validity periods (e.g., "5+1", "5+5") were summed for renewal-forecasting purposes (treated as 6 and 10 years respectively); this is an analytical simplification, since in practice such notations often mean an initial term plus an optional extension subject to mutual agreement, not an automatic extension.

- Estimated expiry years (Section 9) are calculated as signing year plus stated validity and are indicative only; the University's International Relations Department holds the authoritative originals and should confirm actual status before any renewal or lapse determination.
- Country/region groupings are the report author's analytical categorization for readability (e.g., grouping Russia, Belarus, Kazakhstan, Tajikistan, Armenia and Tatarstan under "CIS / Eurasian Economic space") and do not appear as such in the source register.
- Four instruments carry indefinite or unspecified validity (rows 32, 39, 52, and 75) and are excluded from expiry-based renewal-risk counts, since no lapse can be calculated for them.

4. Overview of External Partnerships

Table 1 summarizes the headline scale of TERSU's active external partnership portfolio as of 1 October 2025.

Metric	Value
Total active partnership instruments	113
Distinct partner countries / international entities	25
Geographic regions represented	5
Largest single-country share	Russian Federation — 22 agreements (19%)
Instruments with indefinite / unspecified duration	4
Instruments past estimated expiry (as of Sep 2026)	10
Instruments due to expire by end of 2027	47
Partners governed by 2+ concurrent instruments	15

Table 1. Key figures, TERSU external partnership portfolio (as of 1 October 2025).

5. Growth Trend in Partnership Signing

The number of new active agreements signed per year has grown almost every year since 2018, with a pronounced acceleration from 2022 onward and a peak of 32 new instruments in 2024 — more than the total signed across 2018-2020 combined. This trajectory reflects a deliberate expansion of TERSU's international-relations activity, diversifying beyond its traditional Russian and CIS partner base into Turkiye, China, the Gulf-adjacent Middle East, and Southeast Asia in the 2022-2025 period.

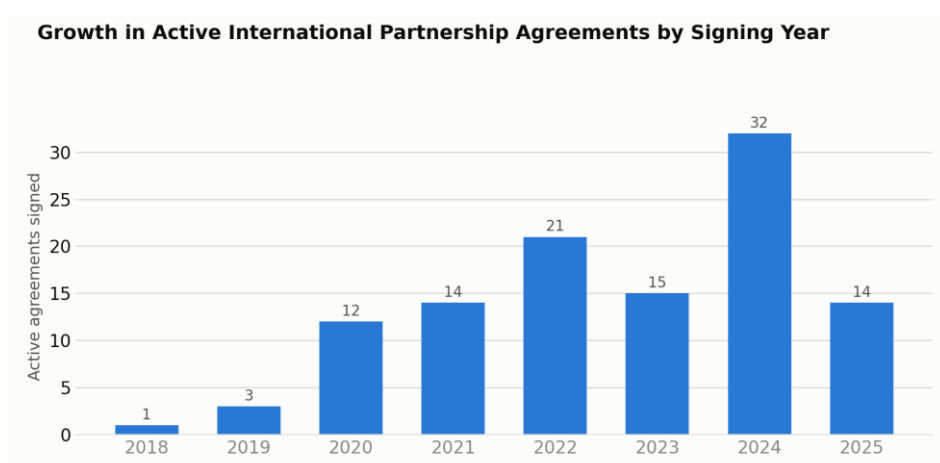

Figure 1. Active agreements by signing year, 2018-2025 (n=112; one undated instrument excluded).

The apparent decline in 2025 (14 agreements) reflects that the source register was compiled as of 1 October 2025 and therefore captures only nine months of that year; on a run-rate basis, 2025 is broadly consistent with the 2022-2024 pace.

6. Geographic Distribution of Partnerships

TERSU's external partnerships span 25 countries and international entities across five regions (Figure 2). The CIS and wider Eurasian space accounts for 51 of 113 agreements (45%), led by Russia, and remains the backbone of the University's international-cooperation network. Asia-Pacific and South/Southeast Asian partners — principally China, Malaysia, Indonesia and India — form the second-largest bloc and the fastest-growing one in relative terms, almost entirely built up since 2021.

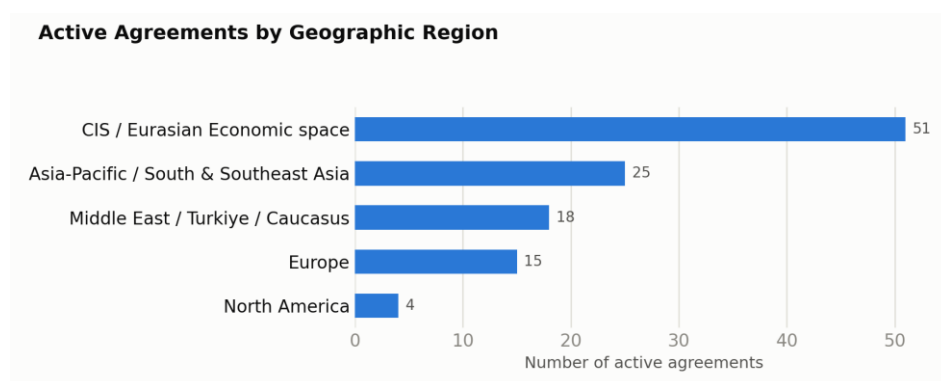

Figure 2. Active agreements by geographic region.

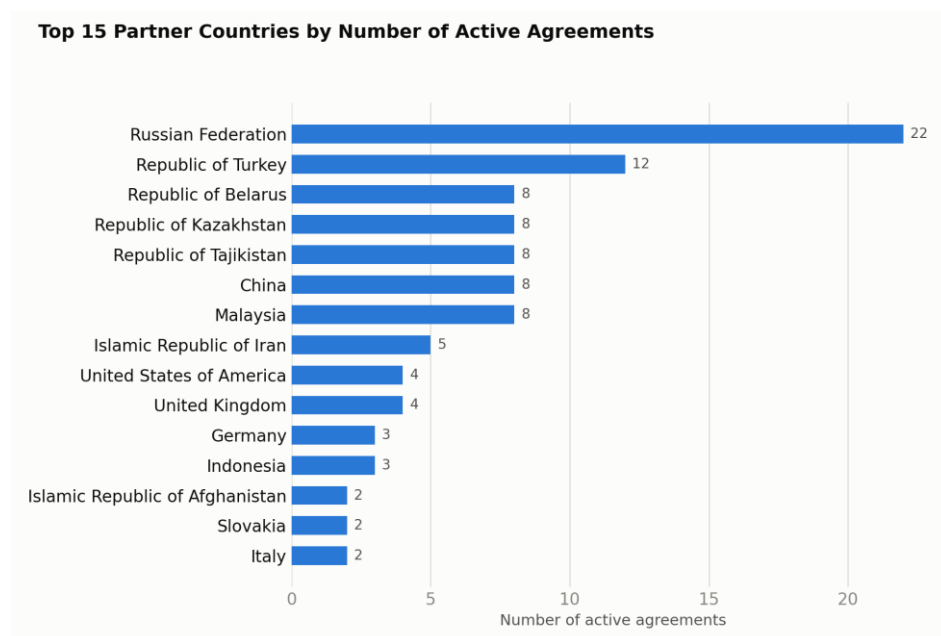

Figure 3. Top 15 partner countries by number of active agreements.

6.1 Full country breakdown

Country / Entity	Active Agreements
Russian Federation	22
Republic of Turkey	12
Republic of Belarus	8
Republic of Kazakhstan	8
Republic of Tajikistan	8
Malaysia	8
China	8
Islamic Republic of Iran	5
United States of America	4
United Kingdom	4
Germany	3
Indonesia	3
Republic of Korea	2
India	2
Italy	2
Slovakia	2
Latvia	2
Islamic Republic of Afghanistan	2
Uzbekistan	2
France	1

Country / Entity	Active Agreements
Azerbaijan	1
Poland	1
Russian Federation (Tatarstan)	1
Republic of Armenia	1
Uzbekistan (int'l org. presence)	1

Table 2. All partner countries and international entities, ranked by number of active agreements.

7. Nature of Agreements — Document Types

The portfolio is dominated by two instrument types: general Cooperation Agreements (63 instruments, 56%) and Memoranda of Understanding (39 instruments, 35%), which together account for over 90% of the register. A much smaller number of instruments create binding joint-degree or dual-degree programmes (4 agreements, all with Vladimir State University and, most recently, Universiti Utara Malaysia and Universitas Pendidikan Indonesia), representing the deepest and most operationally demanding tier of cooperation.

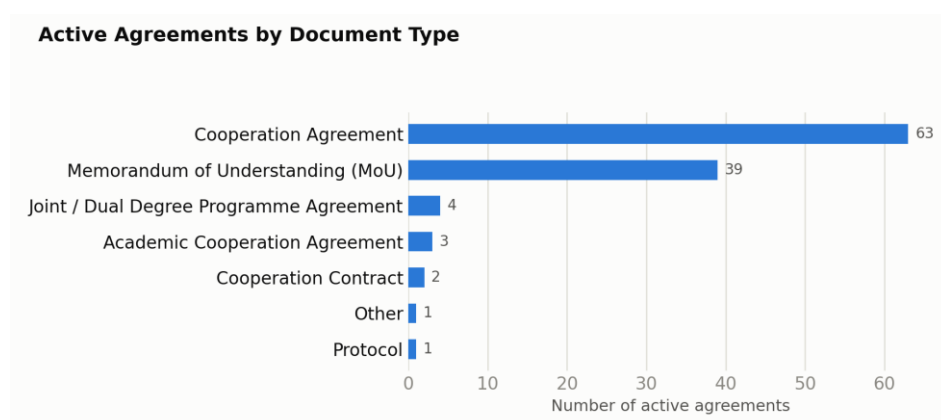

Figure 4. Active agreements by document type.

This distribution suggests a partnership base still weighted toward exploratory or framework-level cooperation (MoUs and general agreements) rather than programme-level commitments. Converting a larger share of high-value MoUs into concrete joint-programme, mobility, or research agreements is a natural next step for the University's international strategy (see Section 12).

8. Depth of Relationships — Repeat and Multi-Agreement Partners

15 partner institutions are linked to TERSU through two or more separate active instruments, indicating relationships that have matured beyond a single framework document. These deserve particular attention in relationship management, since multiple parallel instruments with the same partner increase the administrative and monitoring burden if not consolidated.

Partner Institution	Country	Active Instruments
Vladimir State University named after A.G. and N.G. Stoletov	Russian Federation	3
Universiti Utara Malaysia (UUM)	Malaysia	3
Universitas Pendidikan Indonesia (UPI)	Indonesia	3
Herzen State Pedagogical University of Russia	Russian Federation	2
Stieglitz St. Petersburg State Academy of Art and Design	Russian Federation	2
Institute of Archaeology of the Russian Academy of Sciences	Russian Federation	2
Pushkin State Russian Language Institute	Russian Federation	2

Partner Institution	Country	Active Instruments
Kazan (Volga Region) Federal University	Russian Federation	2
Vitebsk State Technological University	Republic of Belarus	2
Abai Kazakh National Pedagogical University	Republic of Kazakhstan	2
S. Aini Tajik State Pedagogical University	Republic of Tajikistan	2
University of Salento	Italy	2
Saint Petersburg State University	Russian Federation	2
International Education Accreditation Society	United States of America	2
Universiti Malaysia Perlis (UniMAP)	Malaysia	2

Table 3. Partners with two or more concurrent active instruments.

Vladimir State University (Russia), Universiti Utara Malaysia (Malaysia), and Universitas Pendidikan Indonesia are each linked through three concurrent instruments — in the latter two cases, three separate documents (an MoU, an academic-cooperation agreement, and a programme-opening cooperation contract) were signed within days of one another in September-October 2025, which likely reflects a single negotiated package rather than three independent relationships. Recording these as a single framework agreement with schedules, rather than as separate instruments, would simplify tracking and renewal.

9. Contract Lifecycle and Renewal Risk

Using the validity period stated for each instrument and its signing date, this section estimates when each agreement lapses. This is an analytical estimate only (see Section 3) and should be verified against original contract terms before any action is taken.

9.1 Agreements already past estimated expiry

10 agreements carry a stated validity period that, added to their signing date, would already have elapsed as of September 2026 — meaning they were still recorded as "in force" in the University's 1 October 2025 register but may since have lapsed, or may since have been renewed without the renewal yet being reflected in a register update.

Partner	Country	Signed	Validity	Est. Expiry
Vladimir State University named after A.G. and N.G. Stoletov	Russian Federation	16.05.2019	5+1 years	2025
Voronezh State University	Russian Federation	28.01.2020	5 years	2025
Yanka Kupala State University of Grodno	Republic of Belarus	15.09.2020	5 years	2025
Nekan Group	Republic of Turkey	15.06.2022	3 years	2025
Ankara Haci Bayram Veli University	Republic of Turkey	24.01.2020	5 years	2025
University of California	United States of America	16.05.2020	5 years	2025

Partner	Country	Signed	Validity	Est. Expiry
University College London (UCL)	United Kingdom	15.12.2020	5 years	2025
Khazar University	Azerbaijan	26.02.2020	5 years	2025
Balkh University	Islamic Republic of Afghanistan	20.05.2020	5 years	2025
IKAS	Uzbekistan	09.11.2020	5 years	2025

Table 4. Agreements past estimated expiry as of September 2026 — priority candidates for renewal verification.

9.2 Agreements due to expire by end of 2027

A further 37 agreements are projected to reach the end of their stated term by 31 December 2027. Combined with Table 4, 47 instruments — 42% of the active portfolio — warrant a renewal-status review within the next 12-18 months.

9.3 Open-ended agreements

4 agreements (M. Auezov South Kazakhstan State University; Russian-Tajik (Slavonic) University; the Catholic University in Ruzomberok; and the Kazakhstan Center for Technology Commercialization) carry indefinite or unspecified terms and therefore do not require renewal, though periodic relationship review remains good practice.

10. Notable and Strategic Partnerships

- Quality assurance / accreditation: agreements with ASIIN e.V. (Germany, a specialized engineering/science accreditation agency) and the International Education Accreditation Society (USA, two instruments)

point to a deliberate push toward international programme accreditation — a facilities- and quality-infrastructure-relevant relationship even though it is not itself a facilities agreement.

- Joint and dual-degree programmes: the two 2020 agreements with Vladimir State University (Tourism, and Philology: Russian Language and Literature, both Bachelor's level, 5+1 year terms) are the University's clearest joint-degree commitments, later joined by programme-opening cooperation contracts with Universiti Utara Malaysia and Universitas Pendidikan Indonesia (2025).
- Applied / industry partners: Reikartz Hotels and the Polish Academy of Tourism and Hotel Management connect directly to TERSU's tourism and hospitality curriculum and imply a need for practicum facilities and industry-standard training space, discussed further in Section 11.
- International organizations: the International Organization for Migration (Tashkent office) is the only UN-system partner in the register, suggesting room to grow this category.
- Research infrastructure: two agreements with the Institute of Archaeology of the Russian Academy of Sciences and one with the A.Kh. Khalikov Institute of Archaeology point to active joint fieldwork in a region (Surkhandarya) rich in archaeological heritage — a natural candidate for a shared research-facility arrangement.

11. Facilities — Scope Note and Related Infrastructure Implications

The source register provided for this report is a legal-instrument log (contracts, agreements, memoranda, and protocols). It does not contain, and was never intended to contain, an inventory of TERSU's physical or research facilities — buildings, laboratories, dormitories, sports or cultural infrastructure, equipment,

or shared-use spaces. This report therefore cannot state, from this source alone, what facilities TERSU operates, their condition, capacity, or utilization.

What the partnership data can support is a set of reasonable inferences about where facilities intersect with the external-partnership portfolio:

- Joint and dual-degree programmes (Section 10) with Vladimir State University, Universiti Utara Malaysia, and Universitas Pendidikan Indonesia imply a continuing need for classroom, library, and possibly dormitory capacity sized to accommodate any inbound mobility or shared cohorts under these programmes.
- Tourism- and hospitality-sector agreements (Reikartz Hotels; the Polish Academy of Tourism and Hotel Management; the Vladimir State University Tourism programme) suggest a functional need for a hospitality-training facility or simulated hotel/practicum space to support experiential learning, if one is not already in place.
- Archaeology-research agreements (Section 10) suggest a need for artefact storage, conservation, and laboratory space to support joint fieldwork with Russian partner institutes.
- Accreditation agreements with ASIIN and the International Education Accreditation Society typically carry facilities and equipment adequacy as a review criterion for the programmes they accredit, which is a further reason to pair this partnership analysis with a facilities audit before any accreditation site visit.

Recommendation: to produce a genuine "External Partnerships & Facilities" report, TERSU's facilities management or planning unit should supply a facilities inventory (building-by-building floor area, laboratory and equipment listings, dormitory capacity, and any joint or co-funded infrastructure arising from a partnership). This report is ready to be extended with that inventory as

soon as it is made available, cross-referenced against the partnership categories established above.

12. Risks and Recommendations

- **Renewal audit (high priority):** commission an immediate review of the 10 agreements flagged in Table 4 and the 47 flagged for 2026-2027 expiry, confirming actual status (renewed, lapsed, or in force under an unrecorded extension) and updating the register accordingly.
- **Register hygiene:** resolve the two sequence gaps identified in Section 3 (rows 99 and 110), correct the malformed date on row 5, and add the missing signing date for row 21, so the register can serve reliably as a management tool rather than only a compliance artifact.
- **Consolidate multi-instrument partners:** for partners governed by three or more concurrent documents (Section 8), consider migrating to a single framework agreement with annexed schedules at the next renewal point, to reduce administrative overhead and renewal-tracking risk.
- **Convert MoUs to operational agreements:** review the 39 active Memoranda of Understanding for ones now mature enough (two or more years old, per Section 5-7) to convert into concrete mobility, joint-research, or joint-programme agreements with measurable outputs.
- **Facilities inventory:** commission a facilities and infrastructure audit, structured to align with the partnership categories in Section 10-11 (joint-degree programmes, hospitality/tourism practicum space, archaeology research facilities, and accreditation-relevant laboratory and equipment adequacy).
- **Standardize document-type naming:** the register uses at least seven overlapping labels for what are functionally three tiers of commitment (MoU, cooperation agreement/contract, and programme-level

agreement); adopting a controlled vocabulary would materially improve future reporting.

13. Conclusion

TERSU's external partnership base is substantial, geographically diverse, and growing quickly, with 113 active instruments spanning 25 countries and international organizations as of 1 October 2025. The portfolio's center of gravity remains the CIS and wider Eurasian space, but the 2022-2025 period shows a clear, deliberate diversification into Türkiye, China, Malaysia, Indonesia, and the Middle East. The principal near-term management task is not signing more agreements but governing the existing ones well: verifying and renewing the 47 instruments approaching or past their stated term, consolidating fragmented multi-instrument relationships, and — outside the scope of the source data used here — pairing this partnership analysis with a proper facilities inventory so that "External Partnerships & Facilities" can be reported on as a single, integrated picture in future.

Appendix B. Data Quality and Translation Notes

- Row 5 (Tomsk Polytechnic University): source date recorded as "01.22.2022-yil"; interpreted here as 22 January 2022.
- Row 21 (Belarusian National Technical University): no signing date given in the source; excluded from year-based trend analysis only.
- Rows 99 and 110: absent or incomplete in the source numbering; not included in the 113 analyzed agreements.
- "Beijing davlat universiteti" (row 71) and "Pekin shahar universiteti" (row 100) are rendered literally as "Beijing University" and "Beijing City University" respectively; the University's International Relations Department should confirm whether either refers to a specifically named institution (e.g., Peking University) in the original signed agreement.
- "Norvest universiteti" (row 69, China) is rendered as "Northwest University"; "Shimoli-g'arbiy universitet" (row 107, China) is separately rendered as "Northwestern University" — these may or may not be the same institution and should be verified against the original contracts.
- "Erasmus+" (row 67) is listed in the source with country "Slovakia" and is retained as recorded, though Erasmus+ is a European Union programme rather than a single institution; the counterpart institution's name was not given in the source.
- Composite validity terms "5+1" and "5+5" were summed to 6 and 10 years respectively for the purposes of the Section 9 expiry estimate only; this is a simplifying assumption and does not necessarily reflect the automatic-extension terms of the underlying contract.
- This report was produced by transcription and analysis of a single-source PDF register; no external verification against original bilateral agreement texts, University archives, or partner-institution confirmation was performed.
