Termez State University, Doctor
of Technical Sciences, Professor
Marakhimov A. R.**

2021-year, November 13

PROCEDURAL REGULATIONS

**of Implementing ECTS system, Organizing the Educational
Process and Monitoring Students' Knowledge
at Termez State University**

Introduction

This Procedural regulations have been developed on the basis of the Law of the Republic of Uzbekistan “On Education”, the Decrees of the President of the Republic of Uzbekistan No. PF-5953 dated 2 March 2020 “On the State Programme for the Implementation of the Action Strategy on the Five Priority Areas for the Development of the Republic of Uzbekistan for 2017–2021 in the Year of the Development of Science, Enlightenment, and the Digital Economy”, No. PF-5847 dated 8 October 2019 “On Approval of the Concept for the Development of the Higher Education System of the Republic of Uzbekistan until 2030”, and No. PF-6108 dated 6 November 2020 “On Measures to Develop the Sectors of Education, Upbringing, and Science in the New Period of Development of Uzbekistan”; the Resolution of the President of the Republic of Uzbekistan No. PQ-4358 dated 17 June 2019 “On Measures to Fundamentally Improve the System of Training Highly Demanded Qualified Personnel and to Develop Scientific Potential at the National University of Uzbekistan named after Mirzo Ulugbek for 2019–2023”; the Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 824 dated 31 December 2020 “On Measures to Improve the System Related to the Organization of the Educational Process in Higher Education Institutions”; the Order of the Ministry of Higher and Secondary Specialized Education of the Republic of Uzbekistan No. 30 dated 15 January 2021; as well as the Charter of Termez State University (hereinafter referred to as the University).

Chapter 1. General Provisions

1. This Procedure establishes the procedure for organizing the educational process and monitoring students’ knowledge at the University (hereinafter referred to as the Academic Regulations) for students who begin their studies under the credit–module system starting from the 2020/2021 academic year in accordance with curricula.

2. The purpose of organizing the educational process effectively and monitoring the knowledge of University students (hereinafter referred to in the text as students) is to train highly qualified, competitive personnel capable of meeting the requirements of the reforms being implemented in the country and modern international standards, as well as to create opportunities for students' independent learning, ensure transparency of education quality, systematically analyse educational processes, develop general professional and specialized competencies, and introduce an objective and fair system for assessing students' knowledge.

3. The main objectives of organizing the educational process and monitoring students' knowledge are as follows:

- to monitor and analyse the level of formation of relevant knowledge, skills, and competencies among students in accordance with state educational standards and qualification requirements;

- to ensure the basic principles of assessing students' knowledge, skills, and competencies, namely: compliance with state educational standards and qualification requirements, accuracy, fairness, reliability, and transparency in knowledge assessment;

- to organize and analyse the systematic mastery of educational materials by students within established timeframes;

- to develop students' independent work skills and organize the effective use of information resource sources;

- to objectively and fairly assess students' knowledge and timely announce the results;

- to ensure comprehensive and continuous preparation of students within the framework of the curriculum;

- to create conditions for computerization (transition to digital or electronic form) of organizational activities of the educational process.

Chapter 2. Basic Concepts

OFFICIAL TRANSLATION

4. The following basic concepts are used in these Academic Regulations:

GPA (Grade Point Average) - the average value of grades achieved by a learner under the programme, calculated using the following formula:

$$\text{GPA} = \frac{K_1 * U_1 + K_2 * U_2 + K_3 * U_3 \dots + K_n * U_n}{K_1 + K_2 + K_3 \dots + K_n},$$

K - the number of credits allocated to each subject/module;

U - the grade obtained by the student for each subject/module;

academic mobility - the movement of students of a higher education institution for the purpose of study to another higher education institution within the territory of the Republic or abroad for a certain period of time;

mobility programme - an academic mobility programme organized on the basis of an agreement on mutual education between two or more higher education institutions;

credit - a unit of measurement of the academic workload mastered by a student in a particular subject based on learning outcomes. Credits may be expressed, as a rule, in whole or fractional numbers;

higher education institution - an institution that carries out the educational process and issues documents on education and qualification, taking into account the recognition of a specified number of credits;

award of credits - the process of officially awarding credits to a student or other learners based on achieved learning outcomes in accordance with the requirements set for a qualification or its individual components;

credit transfer - the transfer and recognition of credits obtained under the educational programme of one higher education institution to another higher education institution in order to ensure students' academic mobility;

credit accumulation - the accumulation of credit units awarded as a result of mastering educational elements and achieving other accomplishments;

individual educational trajectory of a student - a pathway (route) chosen by the student that provides the opportunity to sequentially accumulate knowledge and acquire a desired set of competencies. An educational trajectory may be formed through institutional documents and guidelines and may lead to obtaining the same qualification through different educational trajectories;

educational programme - a set of the main characteristics of education (volume, content, planned outcomes), organizational and pedagogical conditions, general requirements for subject programmes, as well as information resources and instructional-methodological guidelines necessary for organizing and implementing the educational process in a bachelor's degree field or master's specialty;

educational programme catalogue - information on the description of a higher education institution, introduction to the credit-module system, existing bachelor's degree fields and master's specialties, services and resources, subject programmes, and the description of specific elements of educational programmes;

learning outcomes - a description of the level of qualification mastered and confirmed by assessment, reflecting the skills acquired by the student and the ability to perform them after successful completion of the educational process;

academic workload - the volume of hours required for a student to achieve the expected learning outcomes through all types of academic activities, including lectures, practical classes, seminars, laboratory work, course projects (papers), internships, and independent study;

registration service - services that provide for the formation of databases on the educational process related to teaching staff, employees, and students using educational process management information systems and software products, as well as the organization of all types of registration

OFFICIAL TRANSLATION

of students' academic results, knowledge assessment, and calculation of their academic rating;

educational elements - a part of an educational programme that represents a type of instruction facilitating the achievement of learning outcomes and mastery of the knowledge specified in the educational programme;

transcript - a document in an established format containing a list of subjects with an indication of credits and grades earned during the relevant period of study, expressed in letters and numbers;

module - a separate academic subject (or its part) that encompasses theoretical knowledge and professional skills related to a specific field or specialty and concludes with appropriate types of assessment of the knowledge, skills, professional qualifications, and competencies formed as a result of mastering subject programmes;

moderation - the process of organizing and monitoring assessment types for students, as well as expert review of assessment questions and answers;

moderator - a specialist in the relevant subject area who provides a conclusion on the compliance of assessment questions with the requirements derived from the module content and on the appropriateness of answers to assessment questions;

interim assessment - a type of assessment aimed at determining and evaluating a student's level of knowledge and practical skills after completion of a relevant section of the module syllabus (covering several topics of the module) during the semester;

final assessment - a type of assessment aimed at evaluating the level of mastery by students of the total theoretical knowledge and practical skills in a particular subject.

Chapter 3. Rights and Obligations of Students

5. In accordance with the Charter of the University, students have the following rights:

to receive knowledge corresponding to achievements of science, technology, and modern technologies in accordance with state educational standards and qualification requirements, and to use additional educational services provided by the University;

to freely use, in the prescribed manner, books, periodicals, electronic educational resources, and tools available in the University's information and resource center;

to receive free information, data, consultations, and explanations related to the general activities of the University and the educational process;

to freely use classrooms, educational and scientific laboratories, computer rooms, and tools related to the educational process in accordance with established procedures;

to use Internet resources only for educational and scientific-research purposes within the limits allocated by the University;

to submit proposals, comments, and critical opinions regarding the effectiveness of the educational process and improvement of education quality to the University administration and relevant structural units in the prescribed manner, and to demand their consideration;

to participate in all types of scientific research activities, conferences, and forums, and to submit their scientific works for publication, including in the University's periodicals;

to become members of public associations legally operating at the University and to participate in their activities;

to participate in the discussion and resolution of important issues of the University, including through public organizations and governing bodies of the higher education institution;

OFFICIAL TRANSLATION

to study, on a contractual basis and at their own discretion, other subjects taught at the University outside those included in the curriculum for the chosen field (specialty), within the scope of their interests or for the purpose of improving professional qualifications;

to take academic leave in the manner prescribed by legislation;

to transfer studies from one field to another or from one higher education institution to another in the manner prescribed by legislation;

to actively participate in mass events held at the University and faculty levels;

to use student accommodation on a contractual basis during the period of study (within available capacity);

to participate in the activities of University clubs and other structures, as well as in events organized by the University for students, during free time outside the educational process;

to file complaints against orders and instructions of the University administration in the manner prescribed by legislation.

6. A student has the right to exercise other rights not prohibited by legislation that are necessary for obtaining quality and high-level education and for becoming a highly qualified specialist in the chosen field.

7. A student shall not abuse their rights and shall not use these rights for purposes contrary to the interests of other persons.

8. Students are assigned the following obligations as established in the Charter of the University:

to strictly comply, during the educational process, with the requirements of the legislation of the Republic of Uzbekistan, moral principles of society, and spiritual values;

to familiarize themselves with and strictly comply with the Charter of the University, Internal Regulations, Code of Ethics, rules of student accommodation, and these Academic Regulations;

OFFICIAL TRANSLATION

to conscientiously acquire the knowledge, skills, and competencies provided for in higher education educational programmes and curricula;

to participate in all types of classes specified in curricula, not to miss classes without valid reasons, and not to be late for or absent from classes;

to complete, within the established timeframes and with proper quality, all types of tasks and assignments предусмотренные in the educational process, including those provided for in curricula;

to keep confidential personal logins and passwords provided for studying on the University's electronic education platform;

to fulfill the organizational and methodological requirements stipulated in curricula by the relevant subject professor;

to observe ethical rules during the educational process, including during lectures, seminars, practical and laboratory classes, and to behave appropriately (not to interfere with the professor's conduct of classes, not to behave rudely toward professors and students, etc.);

if unable to attend classes due to illness, to submit to the dean's office, within three days after recovery, a medical certificate of the prescribed form;

if absent from classes for more than two weeks due to illness or other reasons, to notify the dean's office by telephone or other means of communication (telegram, letter);

to inform the faculty dean's office or University administration if classes are not started on time or are conducted with poor quality by a professor;

to immediately notify a University employee in cases of technical safety, fire, or other situations posing a threat to human health on University premises, as well as when there is a risk of damage to University property;

to be courteous toward fellow students, students, teaching staff, and other employees, and to observe public order;

to use University property rationally and efficiently and to take care of it;

OFFICIAL TRANSLATION

to submit an explanatory note to the dean's office in cases of violation of academic discipline or rules of conduct;

to observe standards of dress culture and not to distinguish oneself from others by appearance or inappropriate behavior;

to refrain from actions that directly or indirectly obstruct the statutory activities of the University or the performance of official duties by University employees.

9. If a student behaves inappropriately during classes, a professor has the authority to remove the student from classes while informing the dean's office.

10. If a student does not attend classes for a prolonged period, the dean's office has the right to inform the student's parents (or other legal representatives).

Disciplinary measures (warning, reprimand, expulsion from the student body) shall be applied to students who fail to comply with the above obligations. Lack of awareness of these rules does not exempt students from the application of disciplinary measures.

Chapter 4. Structure of the Educational Programme

11. The structure of the educational programme for an academic year consists of educational elements comprising one or several modules and is approved by the University Council. The educational programme may consist of classroom activities, scientific projects, independent learning, industrial internship, and other educational elements.

12. The structure of the educational programme is developed taking into account that 60 credits correspond to one academic year of study, indicating the learning outcomes corresponding to each educational element (at least 6 indicators). The number of credits in the educational programme is indicated on the basis of the academic workload.

13. Requirements for the successful completion of the educational programme by students and for obtaining the required qualification are

clearly defined. Mastery rules may be expressed in the number of credits or within a range of credits established for various stages of instruction under the selected educational programme.

14. In order to assist students in successfully completing the educational programme, consultations and explanations are provided by the faculty dean, the Educational and Methodological Department, including the unit responsible for managing the credit system of education, the group tutor, and other relevant divisions of the University. Within the scope of consultations, students are informed about opportunities for recognition of achievements and experience gained as a result of learning.

15. Detailed information and up-to-date data on the educational programme catalogue and teaching conditions are uploaded to the University website by the Educational and Methodological Department in a user-friendly format, usually one month before the start of the academic year.

16. Professors and instructors responsible for implementing the educational programme and its elements must ensure alignment between teaching and assessment processes and the learning outcomes specified in the educational programme. This constructive alignment between learning outcomes, teaching, and assessment processes is considered an essential requirement for educational programmes.

Chapter 5. Planning and Monitoring of the Educational Process and Ensuring Education Quality

17. The educational process includes a set of instructional and assessment activities. Instructional activities provide for the organization of all types of classroom classes, internships, and independent work. Assessment activities provide for the mastery by learners of knowledge in the relevant subjects included in the curriculum and the evaluation of their results.

18. The educational process is planned on the basis of a student-centred approach in the form of open dialogue between students, employers,

teachers, and administration, taking into account educational standards. In this process, the needs and expectations of employers and students are discussed. All interested parties may be involved in discussions on the development and implementation of the educational programme. In such discussions, student representatives may participate with voting rights.

19. Planning of the educational process consists of the following stages:

- development of a model curriculum and subject catalogue (structure) based on advanced foreign educational experience, taking into account reforms being implemented in sectors of the national economy, the requirements of employers, and national values, as well as the formation of an additional catalogue of elective subjects, and development of model subject programmes for the subject catalogue based on local and foreign new-generation literature;

- development of working subject programmes (syllabi);

- formation of each student's individual educational trajectory in accordance with Annex 1 to these Academic Regulations, with the assistance of the group tutor and under the supervision of the Educational and Methodological Department and the faculty dean, in line with the curriculum and the list of elective subjects;

- preparation of working curricula;

- preparation of the educational process timetable;

- preparation of class schedules by academic groups.

20. The number of credits to be accumulated by a student during a semester may include compulsory and elective subjects specified in the curriculum. The composition of elective subjects and the number of credits allocated for their study are determined independently by the University. Students may independently choose subjects within the elective subjects specified in their individual educational trajectory.

OFFICIAL TRANSLATION

21. The duration of the academic year is up to 36 weeks, of which 30 weeks are allocated to the academic period, 2 weeks to registration for subject selection, and 4 weeks to assessments. The duration of the academic year may be determined differently by a decision of the University Council in accordance with the academic calendar.

Under the credit-module system, 1 credit equals 30 academic hours of academic workload. That is, for a student to accumulate the relevant credits in a particular subject, a certain amount of academic workload must be mastered. In bachelor's programmes, the academic workload is divided into 40-50 percent classroom hours and 50-60 percent independent study hours; in master's programmes, 30-40 percent classroom hours and 60-70 percent independent study hours (excluding professional internships and final qualification works). The number of hours per credit and the volume of academic workload are determined by the University Council and published on the University website.

In bachelor's degree fields and master's specialties, a student may accumulate no more than 30 credits per semester and no more than 60 credits per academic year. The volume of credits to be mastered by a student during a semester includes compulsory and elective subjects specified in the curriculum. When forming an individual educational trajectory, a student must plan to master subjects amounting to no more than 30 credits per semester, which must include compulsory subjects specified in the curriculum.

A bachelor's student must accumulate 180 credits if the duration of study is at least 3 years, and 240 credits if the duration of study is at least 4 years. In master's programmes, 60 credits are required for a minimum study duration of 1 year, and 120 credits for a minimum duration of 2 years.

22. Monitoring of the educational process is conducted for the purpose of achieving established learning outcomes and assessing their validity and compliance.

OFFICIAL TRANSLATION

23. Ensuring the effectiveness of education quality includes processes aimed at ensuring that bachelor's degree fields and master's specialties implemented by the University comply with the recommendations and requirements of authorized organizations.

In order to improve education quality and foster competition among professors and instructors, based on a decision of the University Council, students may be given the opportunity to choose professors and instructors within a subject. In this case, students register online through the education management information system portal to attend classes of their chosen professor or instructor for a period of one week at the beginning of the academic semester. Assignment of professors and instructors is carried out based on the formation of academic groups and the possibilities of distributing academic workload.

24. At the initiative of students with academic debt, a summer semester is organized by the University on a fee-paying basis during vacation periods in order to eliminate existing academic debts.

The duration of the summer semester is determined based on the academic calendar by bachelor's degree fields, master's specialties, and courses.

The summer semester is organized in accordance with the following regulations:

before the start of the summer semester, a student submits an application, in the form provided in Annex 2 to these Academic Regulations, to the faculty dean expressing their intention to study during the summer semester. The faculty dean consolidates the applications and submits them to the Educational and Methodological Department;

the faculty dean prepares the summer semester class schedule for these students in coordination with the Educational and Methodological Department, and students are admitted to classes after payment of the tuition fee;

the summer semester is organized on the basis of the current assessment system, in accordance with the principle of transparent assessment of students' knowledge.

Professors and instructors involved in the summer semester are remunerated on an hourly basis.

Chapter 6. Academic Mobility and Recognition of Credits

25. In ensuring academic mobility and the recognition of a student's credits by higher education institutions, the following documents are used:

course catalogue;

learning agreement in the prescribed form, transcript, certificate, and confirmation document (Annexes 3-7).

These documents reflect learning outcomes and constitute the basis for recognition and transfer of credits by the University.

26. On the basis of a recommendation from the sending higher education institution, a student submits the documents required to carry out academic mobility to the receiving higher education institution. A transcript in the prescribed form is issued to the student by the sending higher education institution.

27. During the period of academic mobility, the educational elements designated for completion by the student may not be changed without the consent of, and coordination with, the sending higher education institution. The learning outcomes of the educational programme of the sending higher education institution must correspond to or complement the learning outcomes specified in the educational programmes of partner foreign higher education institutions, centres, and organizations. During the mobility period, academic year indicators are analysed and recognition of credits is determined in accordance with these Academic Regulations.

28. The learning agreement must clearly indicate that the set of educational elements to be mastered by the student at the receiving higher education institution is integrated into the educational programme. The

OFFICIAL TRANSLATION

number of credits to be mastered at the receiving higher education institution, including foreign institutions, must be proportionate to the period of study (3-6 months or 1-3 years). Credits (fully or partially) mastered by the student during the mobility period are recognized by the sending higher education institution. After the student returns to the sending higher education institution, promotion to the next year of study or retention in the same year is determined in accordance with the established procedures, based on the number of credits accumulated during the mobility period.

29. The University registers the student in the prescribed form to master the educational elements planned under the academic mobility programme and undertakes the obligation to ensure opportunities for mastering these elements during the mobility period.

30. Within the framework of educational programmes developed jointly with partner universities, centres, and organizations, it is not considered necessary to conclude learning agreements for academic mobility.

31. In accordance with the learning agreement, during the period of academic mobility, indicators determining the student's level of knowledge are accepted on the basis of the table for converting the assessment systems of higher education institutions into other assessment systems, in accordance with Annex 8 to these Academic Regulations.

32. The internship agreement is signed on a tripartite basis by the student, the higher education institution, and the receiving organization.

It is recommended that the information provided for in Annex 9 to these Academic Regulations be reflected in the internship agreement.

33. In order to ensure transparency of the knowledge acquired by the student during the internship period and to confirm it, the receiving institution issues a certificate confirming completion of the internship.

Chapter 7. Assessment and Conversion of Grades

34. Students are assessed on the basis of assessment criteria established by the Ministry of Higher and Secondary Specialized Education of the Republic of Uzbekistan.

35. Credits are awarded to students who are assessed within the assessment procedure specified in the subject syllabus and who receive passing grades. If a student fails to achieve the established learning outcomes, credits are not awarded.

36. Assessment methods include written, oral, practical work, project, portfolio, and control activities that reflect and confirm a student's achievements within a subject or module. Assessment criteria must reflect the achievement of learning outcomes.

37. Credit transfer is carried out by comparing the University's grade conversion table for converting its assessment system into other assessment systems, in accordance with Annex 8 to these Academic Regulations, with a similar table established by another higher education institution.

Chapter 8. Monitoring of Students' Knowledge

38. In order to ensure compliance of the knowledge, skills, and level of mastery acquired by students during the semester with state educational standards, interim and final forms of monitoring students' knowledge, skills, and competencies are introduced at the University.

39. Information on module assessment schedules, types and forms of assessment, the number of assessments, as well as the maximum and threshold grades established for interim and final assessments, is announced to students by the professor at the first class of the subject.

A student is obliged to independently monitor the results of interim and final assessments through the electronic system for recording student ratings in the prescribed manner and through announcements posted in visible locations within University buildings.

Chapter 9. Conduct of Interim Assessment

40. Interim assessment is aimed at evaluating the degree to which a student has mastered the content of the relevant sections of the syllabus, as well as the student's ability to interpret and analyse educational material, perform written and test-based assessments, carry out systematic analysis and prepare information-analytical documents, work with normative legal acts, make correct decisions in non-standard situations, resolve problem situations (case studies, cases, etc.), and prepare scientific and methodological presentations.

41. Interim assessment questions for a module are prepared by the relevant department. The questions shall:

be aimed at analysing relevant topics of the module mastered by students and problem situations, and be expressed in a logical and clear manner;

be designed to determine the level of mastery of the module by students, their analytical skills, independent thinking, and ability to make independent decisions in future professional activities;

be precise, based on norms of normative legal acts, and directly related to practice;

be updated annually in accordance with changes in the subject content.

42. The head of the department is responsible for the quality and timely preparation of interim assessment questions in accordance with the requirements of paragraph 41 of these Academic Regulations prior to the start of the semester.

43. Interim assessment is conducted during classes after completion of the relevant section of the working subject syllabus during the semester, for the purpose of assessing the student's knowledge and practical skills.

44. The type of interim assessment for each subject may be conducted up to two times, depending on the characteristics of the subject.

OFFICIAL TRANSLATION

The form and timing of interim assessment are determined by the relevant department based on the characteristics of the subject and the number of hours allocated to the subject.

45. Tasks for interim assessment are developed by professors and instructors of the relevant department and approved by the head of that department. Periodic analysis of the quality of these tasks may be organized by the Vice-Rector for Academic Affairs.

46. Interim assessment is not conducted for subjects with less than two academic hours per week during the semester.

47. A student's performance in practical, seminar, and laboratory classes, as well as completion of independent learning assignments and the student's activity during these classes, is assessed by the subject instructor.

When assessing a student under interim assessment, the grades obtained by the student during classes are taken into account.

Chapter 10. Conduct of Final Assessment

48. Final assessment is aimed at evaluating the degree to which a student has mastered the content of the subject syllabus, as well as the student's abilities in logical thinking, working with normative legal acts, applying practical skills, resolving problem situations, conducting systematic and critical analysis, and consistently and clearly expressing their views.

49. Final assessment for subjects of the academic semester is conducted once at the end of the semester for each subject, in the form of written, oral, test-based, or written-oral examinations, depending on the content and specific characteristics of the subject. The form of final assessment is determined by the relevant department for the subject and is provided for in the working subject syllabus.

50. Final assessment schedules are developed by faculty deans on the basis of the curriculum at least one week before the start of final assessments, consolidated by the Educational and Methodological Department, and approved by the Vice-Rector for Academic Affairs.

OFFICIAL TRANSLATION

51. Written examination questions, as a rule, include logical questions and problem situations within the scope of the subject syllabus. The content of final assessment questions for modules is discussed and approved at a department meeting.

52. The following requirements are imposed on final assessment questions:

- they must be aimed at analysing relevant topics and problem situations of the module mastered by students and be expressed in a logical and clear language;

- they must be aimed at determining students' level of mastery of the module, analytical skills, independent thinking, and ability to make independent decisions in future professional activities;

- they must be precise, based on norms of normative legal acts, and directly related to practice;

- they must be updated annually in accordance with changes in the subject content.

53. The head of the department must ensure submission of final assessment questions to the Educational and Methodological Department no later than the beginning of the fourth week of the academic semester.

The Educational and Methodological Department organizes moderation of the final assessment questions within two weeks from the date of receipt. Final assessment questions that have undergone moderation are added to the single electronic database of final assessment questions for the relevant modules. The single electronic database of final assessment questions is expanded annually by adding newly submitted final assessment questions. The Educational and Methodological Department ensures access to the single electronic database of final assessment questions for students and teaching staff.

54. On the basis of the questions contained in the single electronic database of final assessment questions, the Educational and Methodological

OFFICIAL TRANSLATION

Department prepares examination tickets according to the sequence of relevant chapters of the subject using special computer software and, if necessary, involves the relevant head of department (or the subject professor). In this case, it is recommended that a single examination ticket does not contain two questions from the same chapter.

Employees of the Educational and Methodological Department, as well as heads of departments involved in preparing examination tickets for final assessment, are obliged not to disclose the content of examination tickets. In case of violation of this requirement, disciplinary measures, up to and including liability in accordance with the установленном порядке, shall be applied to the responsible persons.

55. Final assessment is conducted by an auditorium supervisor and observers appointed from among teaching staff of departments and approved by the Vice-Rector for Academic Affairs. Other University employees appointed by the Rector may also participate in conducting final assessments.

56. As a rule, the process of conducting final assessment is recorded on video. Employees of the Educational and Methodological Department have the right to monitor the final assessment process through video surveillance.

57. The approved list of auditorium supervisors and observers is communicated to the attention of the University's structural units at least one week before the conduct of final assessment. In this case, the professor who conducted classes for the relevant subject is prohibited from participating in the conduct of the final assessment.

Failure of an auditorium supervisor or observer to appear (or late arrival) without valid reason constitutes grounds for the application of disciplinary measures. The obligation to replace an absent auditorium supervisor and/or observer is assigned to the faculty dean.

OFFICIAL TRANSLATION

58. Students are admitted to the examination room for final assessment only after presenting a student ID card or another document confirming their identity.

59. Students who arrive late after the officially scheduled start time of a written examination specified in the examination timetable are not allowed to participate. In cases of late arrival or non-participation due to documented valid reasons, the examination is rescheduled to another date by the Educational and Methodological Department (and/or the faculty dean) in coordination with the Vice-Rector for Academic Affairs. Students' participation in the written examination is documented in accordance with the form provided in Annex 10 to these Academic Regulations.

60. Entry to the examination room during a written examination is strictly prohibited for any persons other than the auditorium supervisor and observers. The process of conducting the written examination may be monitored directly by the Rector, the Vice-Rector for Academic Affairs, the Head of the Educational and Methodological Department and their deputy, as well as faculty deans.

61. During the conduct of a written examination, the auditorium supervisor and observers must:

- familiarize students with the rules for conducting final assessment before it begins;

- ensure that students switch off and surrender mobile phones;

- ensure that students voluntarily hand over to observers all items prohibited for use during final assessment;

- ensure seating arrangements that prevent students from copying from one another;

- monitor compliance with the established rules during final assessment;

- if necessary, provide students with information about identified ambiguities, technical errors, or specific requirements for completing tasks;

OFFICIAL TRANSLATION

remove students who violate the rules for conducting final assessment from the examination, drawing up an official report.

62. The duration of the written examination is determined by the Educational and Methodological Department based on the characteristics of each subject. Examination time begins from the moment indicated by the auditorium supervisor. The start and end time of final assessment must be indicated by the auditorium supervisor on the classroom board.

63. Answer sheets (booklets) certified with the seal of the Educational and Methodological Department (and/or the faculty dean's office) are delivered to the examination room by the responsible employee of the Educational and Methodological Department. The auditorium supervisor recounts the examination tickets and answer sheets (booklets) and distributes them to students.

During the examination, students' appeals regarding the content of examination questions are not considered.

64. Final assessment must be completed by the student independently.

If it is established that a written work has been completed by another person on behalf of the student, or if, during verification, more than two-thirds of the content of two or more written works is found to be similar (excluding generally accepted formulas, equations, concepts, etc.), this constitutes copying, and the student is awarded a zero grade.

If circumstances affecting the objectivity of assessment of coded works are identified, including underlining or circling words, addressing the examiner by name in the work, placing graphic symbols in various parts of the answer sheet (including blank spaces), indicating the student's surname, name, or patronymic in the text, or writing the work in another person's handwriting, a zero grade is awarded.

OFFICIAL TRANSLATION

If it is established that another person has entered the examination room in place of the student, the student is awarded a zero grade and the violators are removed from the room.

65. Students must come to take the written examination with a blue ballpoint pen (and, in some cases, a notebook).

During the written examination, students are prohibited from leaving the room, talking to one another, giving their examination papers or tickets to other students, or bringing textbooks, teaching manuals, dictionaries, reference materials, other literature, notes, cheat sheets, calculators, smart watches, communication devices (including mobile phones), audio, photo, or video recording devices, etc.

Personal belongings must be placed on a separate table in the examination room.

If valid reasons arise during the examination, in particular if a student's health deteriorates, permission may be granted to leave the room. In such cases, the examination is rescheduled for the student to another date by the Educational and Methodological Department (and/or the faculty dean) in coordination with the Vice-Rector for Academic Affairs.

Depending on the characteristics of the module, the relevant department may establish exceptions allowing the use of calculators, devices, or other tables during final assessment.

Students who violate the requirements specified in the fourth paragraph of paragraph 64 and the second paragraph of this paragraph are removed from the examination room, an official report is drawn up in accordance with Annex 11 to these Academic Regulations, and they are deemed to have failed the final assessment.

66. Upon expiration of the time allocated for the written examination, the student must submit their examination ticket and answer sheet to the auditorium supervisor. The number of answer sheets written during the examination is recounted by the auditorium supervisor and submitted,

together with the list of students who participated in the examination and reports on removals from the room, to the responsible employee of the Educational and Methodological Department.

Conducting final assessment for more than one subject in one day is not permitted.

67. Based on the specific characteristics of certain subjects, the Academic Council or the Vice-Rector for Academic Affairs may establish a different procedure for conducting final examinations for those subjects.

Chapter 11. Ensuring the Objectivity of Assessment

68. In order to ensure impartiality of assessment during final examinations, students' written works are encoded by responsible staff in a specially designated room equipped with cameras and, on the same day, are handed over to professors and instructors responsible for checking, on the basis of an acceptance–handover record drawn up in accordance with the form provided in Annex 12 to these Academic Regulations.

The encoding of written works for final assessment is carried out by the auditorium supervisor and observers. In this process, the faculty dean creates the necessary conditions for the staff responsible for encoding.

69. Teaching staff responsible for checking final assessment written works are appointed by the Vice-Rector for Academic Affairs upon submission by the Head of the Educational and Methodological Department.

Final assessment written works are checked within a period not exceeding one day. In exceptional cases, the time limits for checking may be determined by the Vice-Rector for Academic Affairs on the basis of a recommendation from the Educational and Methodological Department.

Activities related to checking final assessment written works are organized by the faculty dean in coordination with the Educational and Methodological Department.

OFFICIAL TRANSLATION

70. Checking of final assessment written works is carried out by professors and instructors in a specially designated room equipped with cameras within the University building.

Removal of written works from the specially designated room is prohibited.

In order to provide technical support for the activities of teaching staff during the checking process in the designated area, the faculty dean may be present. Entry into the designated area is prohibited for persons other than the Rector, the Vice-Rector for Academic Affairs, the relevant head of department, and the Head of the Educational and Methodological Department.

On the day the checking is completed, written works are returned to the faculty dean on the basis of an acceptance handover record in accordance with the form provided in Annex 12 to these Academic Regulations. The results of checking must be entered into the electronic system for determining students' ratings and must be formalized in the form of an assessment record approved by the professor or instructor who carried out the checking.

Teaching staff responsible for checking final assessment written works are fully responsible for the safekeeping of written works from the moment they receive them for checking until their return (signing of the acceptance–handover record). Checked written works must be returned to the faculty dean no later than the deadline specified in the acceptance–handover record.

The time limits for checking written works are reflected in the acceptance–handover record.

71. Violation of the established time limits for checking written works by professors or instructors constitutes grounds for the application of disciplinary measures on the basis of a report submitted by the Head of the Educational and Methodological Department.

OFFICIAL TRANSLATION

72. After completion of checking of final assessment written works, the department may, within one week, conduct consultations for students on the most frequently occurring errors in written works. Such consultations are organized by the departments that delivered instruction in the relevant subjects.

73. Assessment records of final examinations are prepared by professors and instructors responsible for checking written works in a manner that does not allow identification of the student's identity (without indicating surname, name, or patronymic), and are formalized only with the student's identification code.

In accordance with Annex 13 to these Academic Regulations, on the basis of the final assessment record, the faculty dean identifies students' surnames, names, and patronymics and prepares a list of students reflecting the final assessment results. The list of students is approved by the Head of the Educational and Methodological Department upon submission by the faculty dean, and the final assessment results are communicated to students.

74. If, upon reviewing rating records for final assessment results, the Head of the Educational and Methodological Department identifies a large number of excessively low or high grades, they shall inform the Vice-Rector for Academic Affairs.

On the basis of a report by the Head of the Educational and Methodological Department, the Vice-Rector for Academic Affairs has the right to arrange moderation of written works by a group of moderators established by rector's order.

The work of the moderators is usually supervised by the Vice-Rector for Academic Affairs. Professors and instructors from other higher education institutions and practitioners (by agreement) may participate as moderators. Disclosure of the identities of moderators is not permitted. The primary task of moderators is to re-check written works on the basis of approved

OFFICIAL TRANSLATION

assessment criteria and to determine whether the assigned grades are appropriate or inappropriate.

Based on the results of re-checking, the group of moderators submits a conclusion signed by its members and approved by the Vice-Rector for Academic Affairs, which constitutes grounds for changing the relevant grades. The conclusion is submitted to the Educational and Methodological Department for preparation of a consolidated record.

Until the conclusion of the moderators' group on written works subject to moderation is formalized, final assessment results are considered undetermined and may not be announced to students. Responsibility for maintaining confidentiality of results until the conclusion is formalized rests with the responsible employee of the Educational and Methodological Department. The Head of the Educational and Methodological Department is responsible for ensuring the necessary conditions for staff to perform their official duties.

The responsible employee must immediately inform the Head of the Educational and Methodological Department of any cases of breach of confidentiality of final assessment results. If, on the basis of the moderators' conclusion, deficiencies are identified in the assessment process carried out by professors or instructors who checked final assessment written works, disciplinary measures may be applied to teaching staff upon submission by the Vice-Rector for Academic Affairs.

75. The faculty dean creates conditions for students to review their checked written works and the works assessed by professors or instructors.

If a student disagrees with the assigned grade, they may submit an appeal complaint addressed to the faculty dean within one day after reviewing their work. The faculty dean consolidates such appeals and submits them to the Educational and Methodological Department. In such cases, on the basis of a report by the Head of the Educational and

OFFICIAL TRANSLATION

Methodological Department, an appeals commission of at least three members is established by rector's order. Decisions of the appeals commission are adopted by a simple majority vote and are formalized by minutes approved by all members present at the meeting.

The student's application is considered by the appeals commission with the participation of the student and, if necessary, the teaching staff member who assigned the grade for the relevant assessment.

When considering the application, the appeals commission comprehensively reviews the assessment works.

Based on the outcome of reviewing the student's application, the appeals commission adopts one of the following decisions:

- to leave the assigned grades unchanged;

- to change the assigned grades.

As a result of consideration of the student's appeal complaint, the grade previously obtained by the student may be changed to a lower or higher grade. Where necessary, specialists from other educational or scientific institutions may be involved in the work of the appeals commission, or the work may be referred to another educational or scientific institution for impartial assessment.

76. Checked written works are stored at the faculty dean's office for one year. Upon expiration of this period, the works are destroyed in accordance with the established procedure.

Chapter 12. Organization of the Registration Service in the Credit-Module System

77. Registration services are organized for the purpose of separately managing educational and student assessment processes and automatically administering academic data on students in electronic form.

78. The registration service is aimed at assisting students in achieving a high level of knowledge, skills, and competencies in their chosen specialization and performs the following functions:

OFFICIAL TRANSLATION

compiling the academic schedule and monitoring its timely implementation;

monitoring students' registration for courses;

forming academic groups;

organizing and monitoring the conduct of interim assessments, final assessments, and final state certification;

forming and regularly updating the database;

storing data on enrolled students up to archival transfer;

generating transcript forms and entering students' data;

maintaining statistics on student enrollment.

79. Registration services are carried out by the Educational and Methodological Department and faculty deans.

80. In accordance with the established schedule, the registration service registers students for courses and forms the student's individual educational trajectory.

The student's individual educational trajectory is independently developed by the student for the entire period of study with the assistance of the group tutor, based on the model curriculum and the catalog of elective courses.

Amendments or additions to the individual educational trajectory may be made before each academic year.

81. Based on students' individual educational trajectories, the registration service forms academic groups and, if enrollment for a particular course is insufficient, notifies students of the need to revise their individual educational trajectories.

After the individual educational trajectories have been finalized, the registration service submits information on academic groups to the Educational and Methodological Department for the purpose of compiling the class schedule.

OFFICIAL TRANSLATION

82. Based on the student's accumulation of sufficient GPA indicators and completion of contract payments, the registration service determines the date and time of registration for each student.

In this process, the relevant unit of the University submits information on the completion of contract payments by each student to the Educational and Methodological Department and the faculty dean within three days after the expiration of the contract payment deadline.

Registration of first-year students begins after academic orientation and career guidance activities have been conducted with them.

83. Students may change their selected courses within the first week of each semester.

84. The student registration process is carried out in the following order:

the group tutor receives logins and passwords for the assigned group of students from the registration service, explains the educational process to students, familiarizes them with the educational program, provides logins and passwords, and teaches them how to use the student portal;

the student attends introductory presentations on courses conducted by professors and instructors, familiarizes themselves with compulsory and elective courses, and registers for courses via the student portal of the education management system;

the student determines the class schedule through the portal of the education management system and attends classes.

Chapter 13. Mechanisms for Dismissal from Studies, Reinstatement, and Promotion from Course to Course

85. A student who, without a valid reason, misses 25 percent or more of the classroom hours allocated to a subject shall be dismissed from that subject, shall not be admitted to the final assessment, and shall be deemed not to have mastered the relevant credits for that subject. A student who is not admitted to or does not attend the final assessment, as well as a student

OFFICIAL TRANSLATION

who receives an unsatisfactory grade for that assessment, shall be considered academically indebted.

Academically indebted students shall have the right to re-study, at their own expense, the subjects for which credits were not mastered during the summer vacation period or in subsequent semesters, after making payment based on the base tuition (contract) amount in proportion to the number of unmastered credits.

86. Promotion of a student from one course to another shall be carried out taking into account their GPA value. The GPA threshold is set at 2.5. A student who fails to accumulate the required GPA threshold shall be retained in the relevant course for re-study. Students who have academic debts based on semester and academic year results shall not be dismissed from studies.

Students retained in a course shall re-study only the subjects for which they have academic debts and shall pay the corresponding contract fees. The number of times a student may re-study a course on a contract basis is not limited. The total duration of study shall be established as up to 8 years from the date of admission to the first year for bachelor's degree programs, and up to 4 years from the date of admission to the first year for master's degree programs.

Calculation of the student's GPA value shall be carried out by faculty deans, and the resulting data shall be submitted to the Educational and Methodological Department.

87. A student has the right to be reinstated and transferred in accordance with the legislation of the Republic of Uzbekistan. The number of credits mastered by the student prior to dismissal shall be fully recognized by the University.

Chapter 14. Final Provisions

88. The cost of education at the University shall be determined in accordance with the current legislation of the Republic of Uzbekistan.

89. The cost of re-education for individual subjects shall be determined by the University based on the contract amount for the full academic year. The payment mechanism for re-education shall be determined by the University based on the calculation of the cost per credit. The cost of one credit shall be determined by dividing the base tuition (contract) amount payable for education during the academic year by the planned number of credits.

90. If a student successfully completes the University's educational program, a diploma confirming the academic degree shall be awarded to the student.

91. Disputes arising with regard to matters stipulated in these Academic Rules shall be resolved by the University Council.

Amendments and additions to the Academic Rules may be introduced by the University Council.

92. Relations related to the educational process that are not provided for in these Academic Rules shall be regulated in accordance with the current legislation of the Republic of Uzbekistan.

OFFICIAL TRANSLATION

These Academic Rules were discussed and approved at the expanded meeting No. 5 of the Termez State University Council held on 26 January 2021.
